

Wizard 355

Chapter 355: Level 4 Black Devil Blade, Return to Origin, Nine Golden Swords! 2

Levi opened the small boxes and saw they all contained precious herbs and potions.

Next to the small boxes, there was a diary. Levi looked at it and saw that it was written by Syrcus. It was a record of the people who had given him gifts.

"One Three-leaf Dead Soul Grass, first-circle potion material, worth 20 Aether Stones, gifted by Hulin from Gloomy Store."

"Concentration Potion, first-circle potion, worth 180 Aether Stones, gifted by Bald Hans of the Valenke Gang from West Street."

The list went on and on.

Levi read through it and was impressed.

Syrcus collected so many things over a decade while serving as the president of the Blacksail Wizard Market enforcement union. Levi was at a loss of words. He applauded Syrcus for his ability to do so.

Judging from the list of gifts received by Syrcus, the gifts in these boxes alone were worth 4,000 Aether Stones. The most valuable item was the Concentration Potion.

There was no lack of good herbs among the gifts. Some of them were even materials for refining the Sandman Potion. Unfortunately, he was still missing a few ingredients.

Syracus was not a pharmacist. After he obtained these materials, he was not in a hurry to sell them. Unfortunately, he did not live long enough to enjoy his spoils.

Levi took out the Concentration Potion.

[Concentration Potion: refined by Grimm Walter, pharmacist registered with the Pharmacist Association. Effects: assist in meditation and enhance spirit.]

Levi thought, "This Concentration Potion is also a first-circle meditation supplementary potion. Its effect is similar to my Sandman Potion.

Unfortunately, Syracus didn't have the prescription. Otherwise, I could research it further. However, Grimm Walter is not a pharmacist from this area."

Levi put away the Concentration Potion. He planned to sell it in the future. Although this potion was legally certified by official channels, Levi did not use it out of caution as he could make similar potions himself.

These gifts and the Aether Stones made Syracus richer than most First-Circle Wizards.

Next was a spell book. Three spells were recorded on it, all of which were First-Ring Spells.

The three spells were Sailfish Arrow, Water Shield, and Water Prison.

Aside from Sailfish Arrow, Levi had already acquired the other two.

Other than that, there were also some abandoned magic wands. There were no Wizard Tools.

In a corner, Levi found a nautical chart.

He scanned the parchment.

He mumbled, "This is a map of a part of the outer ring of the Endless Sea."

On the parchment, Levi saw a vast ocean and coordinates. Some islands were marked on it.

"This is the Gray Tower."

According to the shape of the islands drawn on the map, Levi immediately found the island where the Gray Tower was located.

Then, based on the location of the Gray Tower, he roughly deduced the location of Whale Song Island, Sighing Sea Breeze, and other islands.

A place in the corner of the nautical chart, far from the Gray Tower, caught

Levi's attention

It was labeled The Lost Pan's Labyrinth.

"Pan's Labyrinth?" Levi had no recollection of such a term.

"Could it be the ruins of an ancient wizard organization?"

Levi recalled that a long time ago, Noz had invited him to explore the ruins of an ancient wizard organization, but he had rejected the invitation.

He had always thought that Noz was lying to him. There might actually be some ancient wizard ruins that had yet to be discovered by other wizards in this region.

The ancient wizard ruins were like the Shadow Realm. For wizards, they were a huge treasure trove.

There might be ancient spell books, Meditation Arts, ancient herbs, Wizard Tools, potions, and so on in the ruins.

Of course, exploring the ruins was risky business.

There were strange and dangerous mechanisms, evil spirits, bizarre arrays, and even some transcendent creatures or alchemy puppets that had been forgotten in these ancient ruins.

Levi wondered, "Could Pan's Labyrinth have something to do with the Gods? That seems unlikely."

Based on Levi's understanding, true Gods were generally powerful existences like the seven orthodox gods of the astral world. Of course, there were also some tribes and civilizations that viewed powerful transcendent creatures as their totems and gods. However, gods like these were plentiful. Even the Great Ice Ape King that Levi had subdued in the human world could be considered a god of the mountains to some extent.

He decided, saying, "Let's put this aside for now. When I am more powerful in the future, I can go there and take a look." He then put away the map.

After counting his spoils, Levi continued to cultivate. There should still be some time before the sea beast tide arrived.

It was challenging for him to quickly achieve breakthroughs in his breathing technique and Meditation Arts.

However, he was on the verge of breaking through to level 4 of the Black Devil Blade.

Levi would become more powerful with the level 4 Black Devil Blade.

Four powerful Second-Circle Dark Wizards were gathered on the Undead Ship in the foggy sea.

They were Melanda the Bone Witch from Bone Forest, Sarok the Bloodthirsty Wizard from Blood Sea Vortex, Elins the Spider Witch from Sea Spider Lair, and a powerful Second -Circle Nomadic Wizard, Pinoz the Lost Wizard.

Bone Forest, Blood Sea Vortex, and Sea Spider Lair were famous dark wizard organizations at the edge of the outer ring. Because they were good at hiding, the organizations' headquarters were also quite tricky to find. The dark wizards from these organizations had always been at large and would occasionally emerge from hiding to wreak havoc..
