

Wizard 365

Chapter 365: Level 9 Black Whale, Whale Back, Whale Mountain! (5)

Although he had advanced to legendary, he didn't know how much longer his lifespan had been enhanced by legendary.

This was because the path of knights was not like wizards. There was already a complete systematic theoretical system. The number of life extensions per ring was calculated by generations of wizards.

However, in the history of the seven kingdoms, those who could become legendary knights were as rare as phoenix feathers and qilin horns. Many of these legendary knights died before they could live to the end of their lives. There was no communication between legendary knights at all, because under normal circumstances, there was only one legendary knight in an era, and it was very difficult to have more legendary knights.

Therefore, Levi did not know how long a legendary knight could extend his lifespan. However, it should not be difficult for a legendary knight to live for two hundred years without illness or disaster.

However, Levi was not sure if the lifespans of legendary knights and wizards could be stacked. Therefore, Levi had always calculated his lifespan based on the lifespan of a wizard.

However, it was still too early to worry about this. Levi was not even 40 years old yet. He still had a lot of time to break through. In less than a year or two, Levi would be able to become an official wizard. At that time, he would truly embark on the journey of becoming a wizard.

Levi patrolled the island and killed some remaining sea beasts. He even went to the place where Leviathan was hiding to take a look at it. Leviathan was safe at the moment. It was sleeping in an underwater cave all day. Levi was relieved. With Leviathan around, he could run away with the bucket at any time.

Three days later, another wave of sea beast tide swept over. There were no transcendent sea beasts either. In the end, with everyone's combined efforts, they managed to resist this wave of sea beasts.

However, Levi could feel that after more than half a year of fierce fighting, everyone was physically and mentally exhausted. Even Levi himself was a little numb. Although they were all low-level sea beasts, there were too many of them and they caused a lot of trouble for the Gray Tower.

The Aether Stone reserves of the Gray Tower were also decreasing at a visible rate. The second-circle array had been open for half a year and was burning money every moment.

However, they didn't dare to let go. Once they did, it would take a lot of time for the array to be activated again. By then, the sea beasts wouldn't be able to make it in time.

Without the protection of the array, that apprentice wizard would definitely not be able to withstand hundreds or thousands of sea beasts for long.

In the outside world, some wizard organizations were not as lucky as the Gray Tower.

The second-circle wizard organization Mangrove Cottage was destroyed under the attack of the Sea Clan's experts.

The Mangrove Cottage was a Second-Circle Wizard organization that was even older than the Gray Tower. It had been established for more than 500 years, and this organization had even experienced the

previous sea beast tide and successfully survived. It was also possible that this organization had experienced it before, so they did not take this sea beast tide seriously. In order to save Aether Stones, this organization persisted for a few months. After sensing that the frequency of the sea beast invasion had decreased, they removed the array barrier. Soon, two Sea Clan Generals led the Sea Clan and the Sea Beast Army to flatten this organization. The leader of the organization, the Second-Circle Wizard, Mangrove Sage, was killed on the spot by the two Sea Clan Generals.

As the first second-circle organization to be annihilated in the sea beast tide, this was undoubtedly a wake-up call for the other second-circle organizations. With the lesson learned from the mangrove hut, the other organizations no longer dared to save money. The arrays were activated all day long, and many of those organizations without arrays had been flattened. Countless people had been displaced and fled on the sea. However, without ships and sea beast mounts, how long could these people last on the sea with just spells?

The sea was the home ground of the Sea Clan and the sea beasts!

In short, this sea beast tide had dealt a heavy blow to the Magi in this sea area.

On Whale Song Island, under the round-the-clock protection of the second-circle array Azure Sea Curtain, the Whale Song Organization, which had ten official wizards and hundreds of apprentice wizards, stood tall. So far, there were no casualties.

Morpheus' heart was cold as he watched these weak organizations being destroyed one by one.

If it weren't for the Pan-Plane Wizard Council, these organizations wouldn't have the right to share this sea with me. The law of the jungle is the truth, Morpheus thought.

Holy Brilliance Calendar Year 1024, Month of Harvest.

The disaster of the sea beasts continued. In the entire Endless Sea, more than a hundred wizard organizations might have been destroyed in half a year. However, this was nothing compared to the huge number of wizard organizations. Moreover, most of these destroyed organizations were first-circle and second-circle low-level wizard organizations. Only in the inner sea region of the Endless Sea had a few Third-Circle Wizard organizations been destroyed.

In short, these casualties were all within the expectations of the Pan-Plane Wizard Council. The true big shots of the Wizard World did not care about these trivial matters at all. They were concerned about the overall situation of the entire wizard civilization.

However, to the low-level wizards of the Endless Sea who were unaware of the decisions of these big shots, if they could not survive this sea beast disaster, the price was to lose their organization and even their lives.

At the end of the Month of Harvest, Levi received a piece of good news from Ms. Marlene.

The Tower Master, Herman, had come out of seclusion and reached the third circle..
