

Wizard 366

Chapter 366: Legendary Red Lotus, Heart Furnace, Red Lotus Breath! (1)

The seventh floor of the White Tower.

He finally saw the Tower Master, Herman, whom he had not seen for a long time.

Rather than a person, the Tower Master looked more like a spherical monster.

Levi did not have the right to say that about the Tower Master. After all, he was a “Sea Clan bastard” who was despised by the ugly eight-legged Sea Clan experts.

The Tower Master had turned into a metal ball with a diameter of about three meters. The metal ball was made of mithril, and it gave off a heavy metallic aura. There were all kinds of rivets embedded in it, and spell runes flickered on the surface.

Levi had no idea how much time and effort the Tower Master needed to collect so much mithril.

It was obvious that the Tower Master had been waiting for this day for a long time. He had almost completely become an alchemical creature, not a human...

Marlene watched all of this speechlessly. Although she had expected this day to come, it was hard to explain how the Tower Master had completely given up on his human form and turned into a ball.

Suddenly, a hole appeared in the middle of the metal ball, and the Tower Master's head popped out. His neck was also an alchemical prosthetic made of mithril, and it could extend and extend freely. The parts on it were like the body of a centipede.

A bald old man's head at the end of the metal neck arrived in front of Levi and Marlene like a long snake.

"Marlene, Levi, long time no see. I'm relieved to see that you're doing well." The Tower Master showed his yellow teeth and smiled.

"Even your heart and skull have turned to metal. Why don't you turn your big yellow teeth into metal?" Marlene complained.

The Tower Master circled around them and smiled. "There's no more Luminant gold. Otherwise, I would have changed my teeth into a pair of Luminant gold shark teeth. That way, I could have bitten Harland's head off."

After the Tower Master finished speaking, his mouth enlarged as exaggeratedly as the mechanical alien's, revealing what looked like a cannon inside. Then, he closed it again.

Levi found it funny. The small Gray Tower actually had a "monster" in the sense of the Tower Master and himself.

One was an Alchemy Creature, and the other was a knight monster.

"You seem to be in a good mood. How does it feel to advance to the third circle?" Marlene asked.

"It's alright. It's different from how my teacher felt when he advanced to the third circle. I didn't advance to the third circle through conventional wizardry. I transformed myself into an alchemical creature. To be precise, I'm a third -circle alchemical creature with a wizard brain controlled by the brain. When I master the soul transfer technology of the School of Death, I'll upload my soul and consciousness into a soul box similar to a lich's and replace my brain with a second energy power core other than alchemy. At that time, I

Might have the same long lifespan as a lich and advance to the fourth circle, but it will take a long time to prepare," said the Tower Master.

Levi clicked his tongue. The Tower Master was walking further and further down the path of an alchemist freak.

Levi admitted that he could not do that.

"You don't feel any discomfort? You're not going to become an alchemy maniac, are you?" Marlene asked. She didn't expect the Tower Master to be so unsatisfied that he wanted to change his brain to an alchemy brain. By then, even if he succeeded, would he still be the Tower Master?

"I'm very successful, and I'm in a better state than I expected. It's all thanks to Levi's Stone Heart. It's definitely the best Stone Heart. He gave me a powerful alchemy heart."

After the Tower Master said that, he opened the top left corner of his spherical body, and a heart jumped out of it. It kept beating and making a cuckoo sound, like an ancient alarm clock.

The Stone Heart could be vaguely seen on the heart, but there were all kinds of alchemy tubes and runes flashing on it. The huge energy contained in it flowed in the Tower Master's complicated and precise alchemy body.

Levi could not help but laugh when he heard the cuckoo. He did not expect the Tower Master to have such a mischievous side.

Marlene rolled her eyes at the Tower Master. "In that case, what do you plan to do next? The sea beast tide is still in progress."

"As I said before, I won't show my face. Based on my understanding of Harland, he won't let go of any opportunity to add insult to injury. I have a feeling that Harland will definitely take this opportunity to cause trouble, so I'm going to wait for him and give him a big surprise. Hehehe, maybe Harland is also waiting for an opportunity to give me a big surprise."

The Tower Master rolled around on the ground and smiled happily. It was very funny, and Levi felt like he was looking at a "funny emoji" from his previous life.

"Understood. We'll guard it well. When ordinary second circles come, Jorman and I should be able to resist them." Marlene sighed and bid farewell to the Tower Master.

The Tower Master stopped Levi before he left.

"It's all thanks to you." The Tower Master rolled over and stuck his head in front of Levi.

"It's my duty. The Gray Tower and the Tower Master gave me the chance to become a wizard. Everyone has taken good care of me. It's my duty to do these things," Levi quickly said.

"Do you want to learn alchemy?" The Tower Master suddenly asked.

Levi's expression did not change, but he was suspicious.. Did the Tower Master want to pass him his alchemy legacy too?
