

Wizard 368

Chapter 368: Legendary Red Lotus, Heart Furnace, Red Lotus Breath! (3)

This pain and suffering did not last long before Elsa disappeared...

The Queen of the Kingdom of Darkness, the Saintess, and the Goddess Knight Elsa had mysteriously disappeared on a cold night.

At first, the Church tried to hide this matter. It was not until Elsa's loyal guard, Knight Kader, leaked this matter to the outside world that the world learned of this shocking news.

The Queen was missing!

After that, Kader was beheaded for spreading rumors!

Some people guessed that he had been killed by the Snow Demon, while some conspiracy theorists guessed that he had been killed by the Church.

There were also rumors that Elsa was taken away by an old man in a black robe with "magic".

In short, there were many different opinions, but one thing was for sure: there was no longer a queen in the Evernight Kingdom.

The Church of Snow could only let the head priest temporarily regent and wait for the new king to take over.

Compared to the chaotic Evernight Kingdom, the Emerald Kingdom was much quieter.

The policy of recuperation allowed the aftereffects of the war in Montenegro Mountain to gradually recover, and the aristocrats also gradually recovered. It was the same for the royal family. However, after the White Horse Knight, no more brilliant knights were born in the royal family. Some prophesied that this was the end of the Jade Royal Family, which meant that the kingdom's fortune was approaching. In the near future, there would be a change in the world. The era ruled by the Emerald Dragon was about to come to an end.

Only the Church of Holy Light stood aloof and watched the changes in the world coldly, quietly waiting for the birth of their saint.

In Flower City, which was full of spring all year round.

"Chess Master" Anderson and "Lost Chess Venerable" Andrew were playing chess again.

As the Owlery in the Realm of Azure Cloud had temporarily stopped its mailing service, Andrew couldn't send the breathing techniques that he had collected recently to Levi. In the entire Emerald Kingdom, the breathing techniques that were easy to collect had almost been collected by Andrew. The remaining ones were either with the nobles, the royal family, or the Church. Therefore, Andrew sent people to other distant countries to search for more breathing techniques. However, due to the long journey, the efficiency was definitely not as high as before.

As for Anderson, he had successfully cultivated the Blood Beast Breathing Technique that Levi had given him to the knight realm some time ago. With his current realm and his long lifespan, it was only a matter

of time before he cultivated the Blood Beast Breathing Technique to the Maximum of the ninth rank. As for whether he could break through the limit like Levi, it was hard to say.

It was too boring to stay in the human world. All he could do was play chess with Andrew or chat with some old Blood Clan (members) friends. Anderson suddenly had the urge to head to the Realm of Azure Cloud to seek refuge with Levi.

However, considering that Levi was not an official wizard yet and might not be able to protect himself, he thought for a moment and decided not to cause Levi any trouble. He might as well do his job as the vice commander of the Twilight Knights and go to the human world to see if there were any hidden legendary Imights so that the Twilight Knights could grow stronger as soon as possible.

How powerful was a knight group made up of all legendary knights in the human world?

Holy Brilliance Calendar Year 1025, Month of Beginning.

The sea beast tide had been going on for almost a year.

Another Second-Circle Wizard organization was taken down by the Sea Clan. So far, three weaker Second-Circle Wizard organizations had been destroyed in the sea area where the Gray Tower was located. As for the first-circle ones, there were even more of them. This was an absolute disaster, and the sea beast tide still showed no signs of ending.

However, the wizard organizations that survived so many sea beasts' attacks were tough people. After encountering many obstacles, the Sea Clan's experts seemed to have stopped for the time being and started to discuss their next plan.

The few dark wizard organizations that were hiding behind the scenes were still waiting for the best opportunity. Harland was already rubbing his palms together, ready to teach that damned Herman a lesson. Once the defense of the array of the Gray Tower was broken, when both the Sea Clan and the Gray Tower suffered heavy losses, Harland would lead these Second-Circle Wizards into the Gray Tower and give that old dog Herman a big surprise.

In the Gray Tower, the apprentices were all exhausted, and many of them were injured. In the previous sea beast attacks, some sea beasts found a weak spot in the array. With the help of first-circle transcendent creatures, these sea beasts rushed in and caused a lot of trouble. Although these sea beasts were finally dealt with, the losses were enormous.

Then, Marko and Mr. Tim personally guarded this weak point, and the situation improved a little.

During this period of time, Levi had killed quite a number of sea beasts. In his house, there was a warehouse that specialized in storing storage bags. These storage bags were filled with all kinds of sea beast materials that Levi needed.

These materials could be used to refine potions or cast spells in the future.

Under normal circumstances, it would be very difficult to find these sea beasts. However, during this period of time, these sea beasts were delivered directly to his door. To a certain extent, Levi had benefited from this misfortune. "It would be even better if a sea beast like the Gray Naga was sent up." He was still thinking about his first-circle potion, Naga's Blessing.

On this day, in the secret room, Levi finished cultivating the Red Lotus Breathing Technique. He spat out a long stream of red smoke that burned the walls black.

"Red Lotus Breathing Technique, level 11."

Levi muttered to himself. He was in a good mood..
