

Wizard 369

Chapter 369: Legendary Red Lotus, Heart Furnace, Red Lotus Breath! (4)

Levi—

Red Lotus Breathing Technique: Level 11 (Maximum), Special Effect: Flame Body (Solid State), Red Lotus Blood.

After transforming into the Solid State Flame Body, Levi's body was covered with a layer of armor that was as hard as lava. Scarlet cracks spread on it, and one could vaguely see the hot lava blood flowing in it. Levi's body erupted with even stronger power.

This was the power of a level 11 Red Lotus that could compete with Emperor Mu!

This meant that Levi had entered the Legendary Three-Dimensional State.

After obtaining Legendary Defense and Legendary Speed, Levi obtained Legendary Power!

The legendary knights of the three paths!

Levi didn't dare to say that there would be no one else in the future, but it should be unprecedented.

The Flame Body not only improved his strength, but also his resistance to Burning Faction spells.

Levi didn't need to use the Solid State Black Scale's defense. Normal Burning Faction cantrips couldn't burn Levi. Only the Small Fireball Technique could burn Levi in his Flame Body state.

He felt that if he met Kane and Carter again, it would be easier to kill them than before. Even if he faced the second-circle Nightmare Knight, Levi would be able to last longer.

After all, the second-circle creature did not have any spell-like abilities other than being strong and resistant to beatings.

In short, after the Red Lotus Breathing Technique advanced to level 11, Levi's strength increased again.

After the legendary Red Lotus Breathing Technique, a legendary organ was born.

Compared to the Black Snake's Message of the Black Snake Breathing

Technique and the Touch of the Blood Clan of the Blood Beast Breathing Technique, the location of the legendary organs was much more normal this time.

The legendary organ now was... the heart, one of the most important organs in the human body, the core of the blood circulation system. Levi's heart was completely different from before.

Previously, Levi was still a flesh and blood heart.

But now, Levi's heart had turned into a Magma Heart similar to the Stone Heart.

The surface of the heart was emitting a scorching aura, making Levi's chest always warm.

If it wasn't for the Flying Fish Robe, Levi's heart would have ignited the ordinary robe in no time.

At this moment, the powerful heart was beating.

"I'm burning up." Levi grinned as he felt the heat in his body.

With the beating of his heart, Levi's heart was like a huge furnace, boiling Levi's blood. Mysterious and powerful energy filled Levi's entire body. This state was similar to the state when Levi ignited the Red Lotus Blood Special Effect. Levi's strength and explosive power had increased a little, and there were no aftereffects. This was a normal increase in strength. Although the effect was far inferior to the Red Lotus Blood, it was good for lasting and there were no aftereffects.

Levi's current strength should be more than twice that of the Red Lotus

Breathing Technique before the Maximum. With the enhancement of the Burning Red Lotus Blood, his strength would reach an extremely terrifying level!

Apart from that, there was something special about the Magma Heart. With a thought, more and more scorching aura gathered at the furnace of Levi's heart, turning his heart into a small volcanic crater. The energy contained in it grew larger and larger, as if it needed to be vented.

Levi left the Gray Tower and left the barrier. He found a place with no one around and suddenly opened his mouth.

The burning power in his heart kept expanding, burning, and reacting. Finally, it reached the critical point and seemed to have an outlet.

Boom!

A red flame flow as thick as a bowl gushed out of Levi's mouth. Wherever the flame flow passed, all the trees were burnt and broken. Even a huge rock in front of him was blasted apart by the red flame flow.

. Burp."

Livy burped and exhaled a scorching, turbid breath that smelled strongly of sulfur and gunpowder.

He looked at everything along the way that was destroyed by the red flame flow and could not help but fall into deep thought.

"I'm used to it."

In the end, Levi sighed helplessly.

He actually used his mouth to expel a breath that only creatures of the Dragon Clan would have.

This was the most obvious effect of the legendary organization of Levi's heart. Levi had the ability to breathe out spells.

He named the legendary heart Red Lotus Furnace and the breath Red Lotus Breath!

The power of the Red Lotus Breath was even stronger than Levi's Seal of Flame, which meant that the Seal of Flame could basically be removed from the stage of history. Levi felt that this move should not be much weaker than the Big Fireball Technique. However, the Big Fireball Technique had a larger explosive range and a wider range of damage. The Red Lotus Breath had a longer range and its power was more concentrated. In general, each had its advantages and disadvantages and could complement each other.

However, the power of the Red Lotus Breath could be enhanced with the continuous advancement of the extraordinary heart. It could grow. If one day Levi could become a real Red Lotus Beast, the power of the breath would probably be feared by even Legendary Wizards.

At Levi's current level, it would take a long time for Red Lotus to gather its energy for a second breath. Thus, when and how to use this powerful killer move would require precise calculation and analysis..
