Chapter 370: Legendary Red Lotus, Heart Furnace, Red LOCUS Breatn'. (5)

Levi's Black Snake's Message licked his lips and silently returned to the tower.

Now, the Red Lotus Breathing Technique was also at the Maximum Level 11.

With Levi's current strength-type breathing technique, it was enough for him to immediately break the limit of the Red Lotus Breathing Technique and advance to level 12. After some thought, Levi temporarily stopped breaking the limit of the Red Lotus Breathing Technique. This was his first time breaking the limit of level 11, and he did not know what would happen next. He had to be more cautious and break the limit of his Black Snake first. After the Black

Snake broke the limit, he would decide if he should break the limit of the Red Lotus Breathing Technique.

Next, Levi only needed to cultivate the Undying Bird Breathing Technique and the Black Whale Breathing Technique. He wanted to try his best to push all his breathing techniques and livers to their limits before the peak of the sea beast tide arrived.

Originally, this should be the time for the members of the Twilight Knights to form a team. However, because of this sudden "sea beast tide", Levi and Emperor Mu were trapped in their own organizations and couldn't come out, so this matter was dropped.

He knew that with Sighing Sea Breeze's strength, it shouldn't be a problem for him to tide through this sea beast tide. Although the other party didn't have a Third-Circle Wizard, they had two Second-Circle Wizards guarding them. As long as he wasn't particularly unlucky, it shouldn't be a problem. As a legendary knight, Emperor Mu could survive the pursuit of the Church of Humanity, so it shouldn't be a problem for him to survive.

It had been a year since the sea beast tide broke out. The entire Endless Sea seemed to be covered in a layer of gray mist.

In the following period of time, Levi led the apprentice wizards to repel another wave of sea beasts' invasion. His Undying Bird Breathing Technique had also successfully reached level 10.

The Gas Blood Ember had been upgraded to Liquid Blood Ember. Levi's physique was much stronger than before, and his self-healing ability had improved slightly. Every time Levi used the Blood Ember Special Effect, red ashes would fall to the ground with the wind, turning into sparks. It was very strange.

Due to the many high-intensity invasions of the sea beasts, the consumption of Aether Stones in the second-circle array increased day by day. The entire Gray Tower was about to reach its limit.

A month later, the second-circle array finally stopped working. The Tower Master asked Ms. Marlene to close the array, leaving only 10,000 Aether Stones for the last moment.

Gray Tower was not the only one. The other wizard organizations were also at the end of their rope.

Even the Third-Circle Wizard organization, Whale Song Island, was about to collapse.

Although the people on Morpheus had secretly reached an agreement with the Sea Clan that no Sea Clan would attack Whale Song Island, the location of Whale Song Island was relatively close to the inner sea region, and the water element was more concentrated. Therefore, the strength and number of sea beasts that were not under the control of the Sea Clan there were also less optimistic than the border regions like Gray Tower.

In Beech Castle in the deep sea, Baron Deep Sea sensed the current situation and revealed a satisfied smile. It had been a long time since the Sea Clan had been so proud.

Vandro had also sharpened his eight sabers. In the year-long sea beast tide, the power of those wizard towers was about to be completely exhausted by the sea beasts, so it was time to end this.

"Vandro, call the other three generals and go to Whale Song Island with me," Baron Deep Sea said with a strange smile.

"Lord Baron, didn't you say that the duke has reached an agreement with the people behind Whale Song Island?" Vandro thought that according to the plan, they should attack the other Second-Circle Wizard organizations. He didn't expect the baron to actually want to attack the local tyrants in this area.

"Heh, what does the duke and the others reaching an agreement have to do with me? It's already very kind of me not to send troops to attack Whale Song Island in the past year. I've already had enough of these arrogant big shots' plans. Do you think our Sea Clan can really reach an agreement with the wizards?"

"Vandro, humans love to kill people after they have outlived their usefulness. It's human nature to go back on their word and be cunning and greedy. The second-circle organizations that have been able to resist until now are all tough bones. They more or less have their own trump cards behind them. If we attack those Second -Circle Wizard Organizations one by one and consume all our living strength on them bit by bit, I'm sure that Morpheus will fight behind us and take the opportunity to finish us off so that Whale Song Island can rest easy in this sea area.

"After a year of invasion by sea beasts, the defense of Whale Song Island was at its weakest. I had to get rid of the person who was the most dangerous to me in this sea area. Only then could I eliminate the other organizations without any worries. Morpheus and the others could betray wizards and humans, and they could betray the Sea Clan even more. I never believed a single human.

"I only want to do what I want to do. As for the duke's plan, that's the duke's own business. As long as I don't do anything that goes against the empire and the Sea God, he can't do anything to me.

"Prepare the army.

"The target is Whale Song Island.

"After we destroy Whale Song Island, our next target will be the Gray Tower," Baron Deep Sea said.

He had made ample preparations for this day.

Vandro thought for a moment. What the baron said made sense, so he went to gather the troops.

In another area of the sea, Harland, who felt that the time was ripe, also led the other four Second - Circle Wizards towards the Gray Tower on his Three-Headed Hell Lizard.

"It's time to end our grudges, Herman.... This time, you're doomed!"
