

## **Wizard 378**

Chapter 378: Golden Horned Beast, Golden Spine, Level 4 Meditation! (2)

The Tower Master immediately opened Pinoz's storage bag. Levi estimated that there were tens of thousands of Aether Stones inside. As expected of a second-circle array wizard, he was really rich.

Then, there were various arrays of different shapes and sizes. These were the cores of the array. Levi had also given the array flags of the second -circle Shark Frenzy Array to the Tower Master. He was too far away from the second circle. Instead of letting himself be covered in dust, he might as well increase the strength of the tower.

In the end, the Tower Master found an ancient-looking book. The book was very thick and made of an unknown material. On the cover was a strange triangle with a blood-red eye.

The Book of Cypher.

The Tower Master flipped through it and showed it to Marlene and Levi.

Levi took the book. The blood-red eye suddenly opened its bloodshot eyes and stared at Levi.

Levi ignored the one-eyed man. These were just some evil interests and tricks of wizards. They did not mean anything.

He also roughly glanced at it. As expected, this was a book that recorded the inheritance of arrays. The value of this book was immeasurable and could not be measured with Aether Stones.

However, after he finished reading the book, he realized that it was incomplete. The Tower Master seemed to have noticed Levi's confusion. He said, "Obviously, what Pinoz obtained was only a part of the inheritance of this array master named Cypher. I looked at it and it should be some basic knowledge of arrays and first-circle arrays. A low-level second-circle array without any knowledge above the third-circle is not of much help to me. However, Marlene and Levi, if you have time, you can learn it and learn the second-circle array. If you are prepared in advance, there are few opponents of the same level."

Marlene and Levi nodded, and the Tower Master continued.

"The knowledge of arrays also involves a lot of alchemy, crafting, and ancient spell runes. Levi, if you want to learn arrays, you'd better come to me to supplement your knowledge of alchemy," said the Tower Master.

"Alright, Tower Master. I'm still focused on becoming an official wizard. I can learn about arrays and alchemy after I break through," Levi said.

"You can't ignore potions, Levi," Marlene reminded him helplessly.

"Of course not. Potions are my major. I only need to dabble in the rest. This way, I can deal with array wizards more easily in the future," Levi said. "That makes sense," said the Tower Master.

In the end, the Tower Master offered Levi 1,000 Aether Stones as a reward. Levi could not refuse and accepted it generously.

Levi left the White Tower and let the Tower Master and Ms. Marlene take their time to count the other spoils of war. Apart from the Lost Wizard, he did not contribute much to this battle, so he was not qualified to participate in the distribution. It was already a pleasant surprise that he was able to obtain the inheritance of the array.

"Third-Circle Wizards are really too powerful. They're on a completely different level from second-circles. If First-Circle Wizards have a reasonable combination of spells, have enough trump cards, and are well-equipped, they might be able to compete with Second-Circle Wizards. Then it's almost impossible for second-circles to challenge third-circles."

"Therefore, first-circle and second-circle wizards are only low-level wizards. After the third circle, they will be Intermediate Wizards. In the entire Star Sea, they will be a big shot.'

He never expected that the Tower Master could defeat so many enemies by himself. This made him even more eager to become an official wizard.

The battle with these dark wizards had made Herman, a third-circle powerhouse, appear out of the blue. The apprentice wizards who were kept in the dark all revealed happy smiles. Everyone's hearts, which had been in suspense all this time, were completely relieved.

With such a powerful Tower Master in charge of the Gray Tower, the Gray Tower's strength and status in this sea region would skyrocket, and it would be on par with Whale Song Island.

Apart from the fact that the number of official wizards was weaker than Whale Song Island, the Gray Tower was also considered a Third-Circle Wizard organization in other aspects.

Holy Brilliance Calendar Year 1025, Month of Wheatfield.

An even more important piece of news spread in this sea area.

A month ago, a Sea Clan lord, Baron Deep Sea, led four powerful Sea Clan Generals, thousands of Sea Clan members, and many sea beasts to attack Whale Song Island!

The Sea Clan lord displayed extremely powerful strength and shattered the defensive array of Whale Song Island with a single punch. Then, the Sea Clan and Whale Song Island engaged in a bloody battle.

In this battle, the Sea Clan's strength crushed Whale Song Island almost unilaterally. With the cooperation of the four generals, Baron Deep Sea killed a Second-Circle Wizard and pharmacist Angus from Whale Song Island, severely injured the Third-Circle Wizard Morpheus, and killed more than half of the official wizards and apprentice wizards on Whale Song Island. Just as the Sea Clan was about to completely take down Whale Song Island, a mysterious Fifth-Ring wizard descended on Whale Song Island with a spatial teleportation scroll and saved Morpheus at the critical moment. Then, he used a Fifth-Ring spell and killed more than half of the Sea Clan. However, Baron Deep Sea was indeed unusual. He and the two surviving Sea Clan Generals actually escaped under the noses of the Fifth-Ring wizards.

After this battle, the strength of Whale Song Island, which was almost destroyed, fell drastically. There were only five official wizards left, one Second-Circle Wizard was left with a Deputy Island Master, and the Third-Circle Wizard Morpheus was also seriously injured and in seclusion. The entire Whale Song Island encountered an unprecedented crisis..
