

Wizard 379

Chapter 379: Golden Horned Beast, Golden Spine, Level 4 Meditation! (3)

At the same time, after Baron Deep Sea escaped with serious injuries, the sea beast tide in this area also began to gradually fade away.

From then on, the attacks of the sea beasts became weaker and weaker. In the end, during the Month of Northern Wind in 1025, the sea beast tide never came again.

This basically marked the end of the sea beast tide in this sea area, but looking at the Endless Sea, some areas were still suffering from the impact of the sea beast tide.

But overall, the sea beast tide had passed its peak period, the next step was to weaken.

All of this was within the expectations of the Pan-Plane Wizard Council.

Holy Brilliance Calendar Year 1026, Month of Beginning.

The messenger from the Star Tower brought good news again.

After nearly two years of resistance, the war between wizards and sea beasts had come to an end. The courage and perseverance displayed by the wizards were admirable. The final victor was still the wizards! The wizards once again proved with their strength that they were the true masters of this sea area! Evil did not suppress the good. Any evil would eventually be defeated!

Not long after, the Azure Ship's flights to and from the Endless Sea started moving again. The wizards who had survived the disaster cheered for the joy of victory.

The Blacksail Wizard Market slowly resumed its operations, and the usual liveliness gradually returned. However, the president of the law enforcement union was no longer Whale Song Island, but a sorcerer from the Dark Sea Cave. Whale Song Island announced the closure of its shops in the market and withdrew from the law enforcement management of the Blacksail Wizard Market. From then on, it was as if it was in seclusion and did not interact with other wizard organizations.

In contrast to the desolation of Whale Song Island, the Gray Tower was thriving. After the sea beast tide, the Gray Tower officially applied to the

Pan-Plane Wizard Council and became an officially certified Third-Circle Wizard organization. From then on, the organization could enjoy the treatment of the Third-Circle Wizard organization.

The Star Tower had also sent the reward for the Tower Master killing those dark wizards to the Gray Tower. The total amount was as high as 60,000 Aether Stones. As the leader of the second-circle dark wizard organization, the heads of these people were very valuable.

With these Aether Stones, the Tower Master could strengthen his alchemy body and increase his strength. He could also solve the urgent problem of the Gray Tower in the void of the treasury.

The current Gray Tower, after two years of sea beast tide, not only did it not decline, it even felt like it was thriving.

After all, compared to the other organizations, the Gray Tower suffered the least losses. In this sea beast tide, Whale Song Island suffered the most. When they betrayed the human race, they were also stabbed

in the back by the Sea Clan and were almost destroyed. On the other hand, on the Gray Tower's side, after the Tower Master attained the third circle, everyone felt proud and confident. In this sea area, the third circle had the deterrence of nuclear weapons.

Furthermore, the Undead Ship, their mortal enemy, had also been eliminated. It would be much safer for them to travel in the future.

In the later stages of this sea beast tide, there was still an outstanding high-level apprentice wizard in the tower who had successfully advanced to an official wizard.

This person was... Winnie.

This triple affinity blonde girl, who grew up in the wizard tower, successfully became an official wizard and moved into the White Tower, which made apprentice wizards envious.

Winnie was already ahead of most apprentice wizards because of her talent in affinity with the three elements. In addition, she was already doted on by

Granny Marlene. Under some special care, it was normal for her to become an

Official wizard after a long time of accumulation.

Now, including Winnie, the Gray Tower had a legendary knight, three First-Circle Wizards, one Second - Circle Wizard, and one Third-Circle Wizard. The Gray Tower was much more powerful than before!

In this sea region, the former overlord of Whale Song Island welcomed a powerful competitor, the third-circle organization, the Gray Tower. The situation in this sea region also changed from one super strong to two strong!

In such a good situation, Levi focused on his cultivation and made preparations to become an official wizard.

In the Pharmacy Room on the ninth floor of the Gray Tower.

Levi took a shower and changed his clothes. He calmed himself down and prepared to start making a particularly important potion.

That was the first-circle potion, Naga's Blessing, that he had been longing for!

During the later stages of the sea beast tide, Levi basically did not have to worry about the sea beasts because of the Tower Master's protection. Thus, he went all out to cultivate the Meditation Art.

In the end, he successfully cultivated the Earth Meditation Art to the Maximum Level 3.

Levi—

Earth Meditation Art: Level 3 (Maximum, breakthrough available)

In the later stages of the sea beast tide, after the crisis of the Gray Tower was resolved, Levi took advantage of the last opportunity and rode the Dragon King Whale to search the sea every day. In the end, he really found a group of Gray Nagas. After dealing with a family of five in this group, Levi collected a total of five Gray Naga's Tears.

The Gray Naga's Tears were not the Gray Naga's tears, but a blood-red diamond-shaped crystal on the chest of a transcendent creature like the Gray Naga.

This rhombus-shaped crystal was also the Gray Naga's main attack method. It could shoot out a ray of light that would knock out the enemy.

One Gray Naga's Tears could be used to refine the Naga's Blessing once, so Levi had five chances. As long as Levi could successfully refine the Gray Naga's

Blessing once, he would have a 90% chance of becoming an official wizard..
