

Wizard 380

Chapter 380: Golden Horned Beast, Golden Spine, Level 4 Meditation! (4)

The Gray Naga's Blessing would only be effective when used for the first time. Therefore, if Levi could successfully refine it twice, he would have made a profit. Even if he sold it to the tower at a low price, it was worth 4,000 Aether Stones. If he sold it on the market, it could be 5,000 or even 6,000 Aether Stones. If he met those rich people who urgently needed it, it might be even higher.

After all, the cost of these materials alone was 2,000 Aether Stones.

It could be said that the Gray Naga's Tears was the most valuable first-circle potion. Needless to say, this kind of potion used to break through realms was worth a lot, and there was no need to worry about sales at all. After all, there were too many high-level apprentice wizards who were stuck at the advanced wizard stage.

During this period of time, Levi had been using other first-circle potions to practice in order to refine the Naga's Blessing. After consuming a lot of resources, he was now confident in refining the Naga's Blessing.

"I don't have many requirements. I just need to succeed once."

Levi calmed down and began to refine the potion.

He dried the Fog Lamp Grass and ground it into powder. He ground the Beak of the Bird of Joy into powder and ground it into powder. Then, he put in the other potion ingredients and proceeded in an orderly manner according to the steps and craftsmanship of the formula.

As a pot of blue liquid boiled in the crucible, Levi hurriedly added the Fog Lamp

Grass and chanted an incantation. The potion turned green, and Levi added the Beak of the Bird of Joy one after another. The potion turned black. Finally, Levi threw the blood-red Gray Naga's Tears into it and recited the final Assemble Potion incantation.

"Abba Modetto..."

Accompanied by an explosion, the crucible exploded, and potions splattered.

The Water Shield on Levi's Flying Fish Robe was activated, and the boiling potions were blocked.

[Pharmacy Proficiency +236] Levi's eyes twitched.

2,000 Aether Stones were gone...

"Keep going."

Then, he changed to a new set of Pharmacy utensils. His heart calmed down and he continued to refine.

Boom!

The newly replaced crucible cracked again. [Pharmacy Proficiency +222]

The second time, it exploded again.

"I'm tired. I'll refine it tomorrow. Didn't I lose 4,000 Aether Stones today... Failure is the mother of success!"

The next day.

Levi took a deep breath and continued to refine with a calm expression.

The third time was accompanied by the chanting of the Assemble Medicine.

After the blood-red Gray Naga's Tears were put into the crucible, the originally black potion began to turn into a viscous potion that was like blood. It emitted a fishy smell, as if it was a pot of boiling blood.

Then, not long after, the pot of potion was sucked into the Gray Naga's Tears and magically disappeared.

Finally, at the bottom of the crucible, a gorgeous and beautiful blood-colored ball stopped there. The blood ball emitted a strange phenomenon that made people want to swallow it. [Pharmacy Proficiency +450] "It worked. It's not a loss now."

"If I succeed next, I'll make a profit."

Levi used a bottle that he had prepared in advance to seal the potion to prevent the medicinal effect from evaporating. Then, he continued to refine.

The fourth refinement was successful!

Another Naga's Blessing was completed.

Levi was overjoyed.

"I've earned it."

On the third day, Levi continued to refine.

Then he succeeded again.

"I've made a killing."

"If these two potions were placed in the outside world, countless large organizations would fight for them. Even Third-Circle Wizard organizations would fight for them."

Although the Naga's Blessing was very expensive and apprentice wizards definitely could not afford it, those official wizards, second-circle and Third-Circle Wizards would usually prepare such potions for their beloved disciples or children so that they could successfully advance to become wizards.

In fact, many wizard organizations in the Endless Sea were led by wizard families. The seniors of these families would store some potions like Naga's Blessing for the sake of their descendants. Winnie's parents used to be high-level apprentice wizards in the Gray Tower, but they retired after that. Therefore, Winnie's life had been smooth sailing since she was young. She could successfully advance to a wizard because of her parents' support.

After all, the combination of wizards and wizards had a higher probability of giving birth to descendants with wizard talents. Therefore, over time, wizard clans of various sizes were formed. Especially in a huge wizard organization like the Star Tower, which was formed by various large wizard clans. Although the Pan-Plane Wizard Council was working hard to weaken this family attribute to avoid some degeneration and corruption, the effect was minimal.

In the end, Levi, who had obtained three Naga's Blessing potions, left two for himself to sell. Whether he would sell them to the organization or to the outside world depended on the situation.

Moreover, Levi still had extra Fog Lamp Grass and Beak of the Bird of Joy. If he obtained more Gray Naga's Tears in the future, he could continue to refine them. With the experience of successfully refining three times, Levi's success rate in refining in the future would only increase.

After refining the potion, Levi placed his hand on the Klein Crystal.

Spiritual Force: 20

Spell Power: 145

Now, everything was ready, and so was the potion.

He only needed to polish his spell power to the peak of 200 points and then choose a first-circle spell model to construct it. Then, he could try to break through to an official wizard.

There was no need to worry about spell power. Levi could naturally refine green potions to replenish it.

Levi had already thought of the first-circle spell model for the advancement to the first-circle.

The first-circle passive spell, Rock Body, was an advanced spell of the Stone Skin Technique.

In fact, the Stone Skin Technique was essentially a simplified version of the Rock Body. The Stone Skin Technique only strengthened Levi's skin defense, but the Rock Body went deep into his flesh and bones to strengthen Levi's defense from the inside. Therefore, Levi felt that the construction of this first-circle spell model should not be difficult for him..
