

Wizard 382

Chapter 382: Golden Horned Beast, Golden Spine, Level 4 Meditation! (6)

As for Emperor Mu's other ancestral Saint Ape breathing technique, Levi had learned from Emperor Mu that the Saint Ape Breathing Technique's strengthening part was also the arms, which overlapped with his Giant Breathing Technique. Therefore, he did not have that much desire for the Saint

Ape Breathing Technique. However, if there was a chance that Levi and Emperor Mu's relationship improved, he could exchange a breathing technique of the same quality with Emperor Mu. He was curious to use the Giant Breathing Technique and the Saint Ape Breathing Technique to mutate. What kind of monster would be fused? Will the Giant Ape Breathing Technique be born?

After obtaining the Golden breathing technique, Levi began to prepare the

Golden Horn secret medicine. It was almost as he had expected. The Golden Horned Beast was similar to the Red Lotus Beast and was also a type of Dragon Clan, so their secret medicine also involved the Dragon Clan.

The most important ingredient of the Golden Horn secret medicine was "Dragon Horn Powder." It could be used on the horns of any dragon hybrid with Dragon Clan blood.

Thinking of this, Levi could not help but remember...Leviathan.

Good heavens, a Dragon Clan hybrid, and a dragon horn.

Who else if not Leviathan?

Leviathan was born to be a secret medicine material!

Blood, ambergris, and even the beautiful horn used for courtship were all treasures! Ever since he subdued Leviathan, Levi no longer had to worry about the secret medicine. Anyway, he could find it on Leviathan...Levi had to admit objectively that the reason he could have his current achievements was firstly because of the panel, secondly because of his own hard work, and lastly because of Leviathan's support!

As a result, the miserable Leviathan was once again used as a drug primer by Levi. Every once in a while, Levi would go to Leviathan's horn and scrape some powder off. Levi only used the trident to scrape a little powder from Leviathan's horn regularly, and it would not cause any damage to it. After all, he was not a great villain.

Just like that, he constructed spell models while cultivating the breathing technique. In the blink of an eye, three months had passed.

It was the year 1026 of the Holy Brilliance Calendar, the Month of Wheatfield.

Levi had successfully upgraded the Golden Horn Breathing Technique to the eighth level, giving birth to a Transcendent Defense. When this breathing technique reached the legendary level, Levi would be able to fuse the Golden Horn Breathing Technique and the Black Snake Breathing Technique, giving birth to a new breathing technique that could be cultivated to the limit of the twelfth level.

During the Month of Harvest, Levi had finally constructed the spell model of the First-Ring Spell, Rock Body, in his mind. His spell power had also reached the limit of 200 points under his persistent consumption of potions and polishing, keeping up with the pace of his spiritual force.

"Spiritual Force: 20 "

"Spell Power: 200

Now, Levi had completed all the preparations to advance to an official wizard. He told his teacher about his plan to advance, and she said that as long as she was around, she would not let anyone disturb Levi's seclusion.

Then, after adjusting his state to its peak, Levi placed the pill that was emitting a strange fragrance into his mouth. The pill melted in his mouth and turned into a strange energy that surged into Levi's mind.

He could vaguely hear the beautiful song of the Gray Naga echoing in Levi's mind, calming his restless spiritual energy.

Levi entered a state where there was no self or other, just like an old Buddhist monk sitting down. In his mind, above the sea of consciousness that carried spiritual force, even more, vast spiritual force poured into Levi's mind from the boundless void. Levi felt as if his entire body had been sublimated, and he felt as if his soul had left his body.

Of course, he knew that this was all his illusion. In the theories of wizards, spiritual force and the soul were different concepts. The soul was similar to a person's true soul and was a unique imprint of a person. If the soul was damaged, a person would basically die. Even if they did not die, their unique

"Life characteristics" would be changed. According to the theory of the School of Death, physical death was not true death. Only the dissipation of the soul, which was also known as the "scattering of the soul," was true death. Therefore, some wizards of the School of Death would devote themselves to researching a technique that placed the human soul in the "soul box." Through this method, short-lived humans would transform into long-lived extraordinary creatures: "Lich."

Spiritual force, on the other hand, was a kind of metaphysical power. spiritual force was not the same as the soul. If one's spiritual force was severely damaged, it could be recovered through potions or rest. Even if the soul was no longer in the body, the spiritual force would still exist in a container like the body. Therefore, even after the Saint Scorpions devoured the souls, the living dead still had mental strength in their bodies. This was also the reason why the living dead could continue casting spells. However, the source of mental strength for the living dead was no longer meditation, but the Undead Core.

It was said that at the level of a high-level wizard, the spiritual force and the soul would assemble into one, and the two elements would become one, so it was called the "primordial soul". The "primordial soul" was the core of a high-level wizard. It could do all kinds of incredible things such as the primordial soul leaving the body, casting spells, elementalization, and so on. As long as the primordial soul did not die, the wizard would not be destroyed. The wizard could protect the physical body in the wizard tower and use the "primordial soul" to travel outside the sky. Some people with extremely powerful primordial souls could even travel through the Multidimensional Plane with their primordial souls. Of course, Levi's current spiritual force was far from the Essence Soul Stage.

As time passed, Levi's spiritual force became more and more abundant. At a certain critical point, as if a valve had been opened, a powerful mysterious force surged into Levi's mind and limbs. This force made Levi feel light-headed. He opened his eyes, and his consciousness was clearer than ever before. The cantrip models in his mind were incomparably clear and simple in his eyes. With his current level of spiritual force, learning these cantrips or performing them would be as easy as flipping his hand.

At this moment, Levi had advanced to the First-Circle Wizard realm, and his spiritual force had undergone a qualitative change. From then on, for

First-Circle Wizards. there was no longer the so-called restriction of spell slots

For cantrips. As long as Levi wanted to, as long as his brain could hold it, as long as he had the time, he could learn any cantrip.

He opened the proficiency panel. As expected, the column belonging to the Earth Meditation Art had already changed.

Levi-

[Earth Meditation Art: Level 4 (1/20000)]
