

Wizard 383

Chapter 383: First-Circle Wizard and Official Wizard (1)

[Spiritual Force: 21]

[spiritual force: 203]

Holding the Klein Crystal ball, Levi looked delighted.

"I'm finally an official wizard."

After becoming an official wizard, Levi's spiritual force broke through the apprentice's maximum of 20 points and reached 21 points. It seemed like it was only a 1-point increase, but after becoming an official wizard, because the spiritual force had undergone a change in both quantity and quality, the upper limit of spiritual force represented by 1 point of spiritual force had changed from 10 points in the apprentice level to 20 points today.

This meant that an official wizard would have more powerful spellcasting abilities. They could cast many First-Ring Spells without worrying about the problem of spiritual force. As for the spiritual force consumption of the cantrip, it was not worth mentioning for an official wizard. Of course, other than a few auxiliary cantrips, most offensive and defensive cantrips would not be of much use to an official wizard.

"It's not easy. Since the millennium of the Holy Brilliance Calendar, I've been in this world for 26 years. I, Levi, have finally become an official wizard. From now on, a First-Ring Spell will enter my mind, and my

life will be up to me... Sigh, forget it. I just left the novice village. It's better not to say such words that only big shots have the right to say."

Levi, who was almost forty years old, could not help but sigh.

Although he had become an official wizard late, he had only been a wizard for about ten years. In Levi's opinion, other than Children of the Elements, even those with double affinity could not compare to his speed. Jagri had a double affinity, and he had only started meditating not too long after Levi. He even had a Third-Circle Wizard as his mentor and was still a high-level apprentice wizard. He had yet to become an official wizard.

Therefore, Levi's cultivation speed was already among the best in this sea area.

Of course, he could not be compared to those who were the Children of the Elements and had the support of resources from large factions. He started late and could only slowly catch up. For him, the most difficult part was the process of just starting. Once he was recorded on the proficiency panel, he could start to surpass them.

The reason why Levi became an official wizard so late was because he had spent most of his time in the human world, constantly searching for traces of wizards. There was no other way. Winnie was born in Rome, while Levi was born with no title. He could only play as a small lord in the human world.

In fact, it was not a waste of time. Along the way, what had helped Levi the most was not the path of the wizard, but rather the mortal breathing techniques that wizards looked down on, which were the path of knights. Without the path of knights, Levi would not have become an official wizard today. He knew this very well.

Levi finally heaved a sigh of relief. After becoming an official wizard, at least in this sea region, Levi was already a true high-level combatant.

As a knight, he was already in the Legendary Three-Dimensional State. In addition to his own official wizard realm, it was not an exaggeration to say that Levi was invincible under the second circle.

After advancing to becoming a First-Circle Wizard, Levi needed to think about his future plans.

There was no need to say much about the path of knights. Right now, Levi still needed the three breathing techniques of Golden Horn, Undying Bird, and Black Whale. Among them, Golden Horn and Undying Bird were the most important. After the Golden Horn reaches the maximum, Levi could let the Black Snake and Golden Horn fuse and mutate. On one hand, he could break through the limit, and on the other hand, he could create a new breathing technique that belonged to him.

All in all, Levi had reached a bottleneck in the path of knights. During this period, he could only break through the limits of the Black Snake Breathing Technique and transform into the Legendary Six-Dimensional State.

As for the path of the wizard, it would be Levi's next focus. After advancing to an official wizard, the big stage of the Wizard World would completely open up for Levi.

After the Earth Meditation Art had reached level 4, Levi was already very familiar with breaking through the limits of the Deep Sea, Sun, and Night Crow Meditation Art. Even without Naga's Blessing, Levi was confident that he could bring the other Meditation Arts to level 4. Therefore, he did not have to worry too much about them.

In terms of spells, Levi only had one First-Ring Spell, and that was [Rock Body].

[Rock Body: Level 4 (1/20000)]

What was worth mentioning was that after Levi had mastered [Rock Body], [Stone Skin], which was once at the maximum of level 4, had broken through its limit and transformed into [Rock Body], which Levi had mastered.

This made Levi overjoyed for a long time. He realized that his idea was right. To learn spells, one had to learn spells that had a clear path to advance in the future. This way, the proficiency gained from low-level spells could be perfectly inherited from advanced spells.

This way, Levi saved a lot of time to increase the proficiency of [Rock Body]. He could start from level 4. In the future, he could also cultivate the Fireball Technique in this way.

Levi's current body of flesh and blood was different from before. Within the flesh and blood, some spell runes could be seen flickering on the bones and flowing in the blood. This kind of passive defensive spell did not need to be cast or chanted. After it was solidified, it would take effect. Of course, although it did not need to be cast or chanted, it still consumed spell power. If Levi's spiritual force was depleted, the Rock Body would lose its effectiveness..
