

Wizard 384

Chapter 384: First-Circle Wizard and Official Wizard (2)

All in all, with Levi's current solid Black Scale and his Rock Body, the combination of these two types of defense allowed Levi's defense to reach an extremely terrifying level.

Apart from the Rock Body, the First-Ring Spell that Levi planned to cultivate was mainly the Fireball Technique and Fireball Technique of the Burning Faction. School of Death's Undead Summoning, Green Smoke Escape, and the Body of Ghost Fire; Ocean Faction's Water Prison Spell and the School of Insects' Sacred Insect Touch.

With the level of a First-Circle Wizard's spiritual power, in theory, he could learn at most 20 First-Ring spells and one Second-Ring spell for advancement. However, as far as Levi knew, there were very few wizards who could master twenty First-Ring Spells. If they could master more than five First-Ring Spells, they would be considered a senior wizard. If they could master ten, they could try to advance to the second circle. The reason for this situation was that most small wizard organizations did not have that many First-Ring spells to learn. Secondly, it was very time-consuming to cultivate spells to the point of perfection. Most wizards did not have that much time to master twenty First-Ring Spells. Therefore, the choice of spell for the First-Circle Wizard was also very particular.

They required the mental strength of a veteran first-circle wizard, which was at least 30 points of spiritual force. Levi could not learn them for the time being, but he could start the construction of the spell models for the other spells.

Next, when Levi had mastered all the Meditation Art of the other schools to level 4, he would be able to form a set of attack, defense, control, escape, and life-saving First-Ring Spell systems.

After stabilizing his realm at home for a while, Levi thought about it and decided to tell Marlene and the Tower Master about his breakthrough into the first ring.

In the Ashen Tower, there was no need for him to hide his strength. In fact, he could not hide it either. With the mental strength of Marlene and the Tower Master, it was easy for them to see through Levi's cultivation.

Only by showing his talent and potential could he be nurtured by the wizard organization. If Levi had not shown his talent as a legendary knight and pharmacist, he would not have been able to get the attention of the Tower Master and Marlene, nor would he have been able to obtain the care and respect of the organization. Moreover, the Gray Tower was not a dark wizard organization, and there were no elders who would always think of harming the younger generation. Therefore, there was no need to hide their strength and pretend.

Levi came to the third floor of the White Tower and found that Ms. Marlene was chatting with Senior Sister Winnie. Winnie was now an official wizard, and her status in the tower had also risen. However, Winnie's temperament was insufficient, so she was still allowed to experience the tower. "Winnie, you have to learn more from Levi in this aspect."

"Teacher, Senior Sister, you're all here," Levi smiled.

"Little Levi, you've become an official wizard?" Marlene could tell at a glance that Levi was different.

"Yes, teacher. I've advanced to the first circle," Levi smiled and replied.

"Congratulations, Junior Brother! Great news, haha, our tower now has four

First-Circle Wizards, only one less than Whale Song Island," Winnie clapped.

Levi smiled and thanked her. After chatting with Winnie and his teacher, Levi left. The Tower Master had recently received Harland's School of Death inheritance and began to study the knowledge of the School of Death. He was determined to gain inspiration from it and realize his idea of soul transplantation. In addition, the inheritances of other dark wizards, such as the inheritance of the Spider Witch from the School of Insects, the inheritance of the Bone Wizard from the Death School of Thought, and so on, were also used as inheritance resources for the Gray Tower. Any official wizard in the tower could use points and Aether Stones to buy them. Of course, they were only limited to their own cultivation and could not be spread. These were all restricted by the corresponding contract-type confidential spell. Once violated, the consequences were extremely serious.

Soon, the news of Levi's advancement to the first circle spread throughout the tower.

The Tower Master wanted Levi to move into the White Tower. Levi thought about it and did not refuse. He moved from his small home on the ninth floor of the Gray Tower to the more spacious second floor of the White Tower and lived below Marlene.

The White Tower had a complete set of facilities, and because there was an independent isolation circle, it was more private. Moreover, Levi was now an official wizard, so it was only right for him to move in.

The White Tower had seven floors. Other than the first floor, the other floors were already filled with people. The second floor was occupied by Levi, the third floor by Marlene, the fourth floor by Winnie, and the fifth and sixth floors by Marko and Mr. Tim, the seventh floor's Tower Master.

Perhaps, when the first Tower Master Salman built the wizard tower, he never thought that the small organization he created would one day be so prosperous.

However, after Levi and Winnie advanced to become wizards, there were not many high-level apprentice wizards left in the tower who had the hope of advancing to the first circle. In the future, there might not be any new blood for the first circle.

After Levi moved, Marko and Mr. Tim sent their congratulations one after another. Manla was also sincerely happy about Levi's current achievements. Being able to become a friend of an official wizard was obviously something to be proud of and celebrate.

It was rare for everyone to be so happy. The Tower Master thought for a moment and said, "Let's have a banquet tonight. Let's eat and drink together and have a good time. Let's not cultivate or study today. There have been many good things in our tower recently. First, Winnie advanced to an official wizard, and now, Levi has also become an official wizard. Hahahaha, I haven't been so happy in a long time.."
