

Wizard 386

Chapter 386: First-Circle Wizard and Official Wizard (4)

As for the qualification to be a civil servant of the Pan-Plane Wizard Council? It was fine to just take a look. Not to mention the “national examination”, just the “provincial examination” of the Ocean Faction’s Star Tower, if one wanted to really enter the job, one had to have a relationship with the higher-ups of the Pan-Plane Wizard Council or be a Third-Circle Wizard who was excellent enough. For example, Salman, the first Tower Master of the Gray Tower. Ordinary wizards could forget about it. Besides, Levi did not really want to join such an official organization. He could see that although the concept of the Pan-Plane Wizard Council was good, in fact, in this huge organization, the complicated power relations and network made him flinch. If he was not careful, he would become cannon fodder in the game of power and fall into the bottomless abyss. He had to be on thin ice when dealing with a group of politicians and ambitious people. It was better to be free.

Therefore, just like when he was in the human world, Levi still planned to find a place to farm quietly and cultivate at the same time.

Work?

Levi did not want to think about it anymore. With his personality, whether it was in his previous life or this life, he was destined to not be suitable for this path.

In the end, Levi did not choose to infuse his soul into the Soul Jade. It was not that he did not trust the Pan-Plane Wizard Council, but there was no need to keep it. He was already dead, so why would he worry about whether the General Plane Wizard Council could help him find the real murderer? Kane was a living example.

Levi sighed. No matter what, he had been officially certified by the council and became a member of the Pan-Plane Wizard Council.

He planned to buy an island after a while and become the island owner himself. Then, he would start fiddling with his living dead, Saint Scorpions, and other things.

It was the year 1027 of the Holy Brilliance Calendar, the Month of Beginning.

The news that the Gray Tower had produced two first-circle wizards in a short period of time spread throughout the sea. For a time, the Grey Tower was in the limelight. The Sighing Sea Breeze, an organization that had a good relationship with the Gray Tower, even sent a congratulatory gift. This shocked Emperor Mu when he heard the news.

They were both Children of Chaos, but how did Levi become an official wizard? Emperor Mu was still a wizard and did not know when he would become a high-level apprentice wizard. However, when he thought about how Levi's knight strength was definitely better than his, Emperor Mu felt relieved. Obviously, Levi had his own fortuitous encounter, just like Emperor Mu had his own.

In the Gray Tower, after a period of cultivation, Levi's Sun Meditation Art had also reached level 4.

After reaching level 1+ of the Sun Meditation Technique, Levi started learning the Fireball Technique. Just as he had expected, after learning the basic level of the Fireball Technique, Levi's proficiency in the Fireball Technique also started from level 4 due to the cantrip he had previously learned, the Small Fireball Technique.

Levi-

[Fireball Technique: Level 4 (1/20000)]

The power of the level 4 Fireball Technique was much stronger than the Small Fireball Technique. It had at least the attack power of a first-circle spell. However, it was still far inferior to the Large Fireball Technique.

During the Month of Flowers, Emperor Mu, who had been stimulated by Levi, decided to start his inner struggle and closed himself up for a long time. As Emperor Mu was in seclusion, the routine team-building activities of the

Twiling Knights were canceled. Levi could only continue to gain experience.

Not long after that, Levi's Night Crow Meditation Art and Deep Sea Meditation Art both reached level L.

After that, Levi began his long journey of cultivation.

Time flew by, and another year passed.

After this period of cultivation, Levi's First-Ring Spell system had already been completed.

Levi-

[Water Prison: Level 4 (1893/20000)]

[Fireball Technique: Level 5 (Maximum)] [Rock Body: Level 5 (Maximum)]

[Green Smoke Escape: Level 3 (3478/10000)]

Because of the special effects of the Divine Dance of Fire and the Earth Pulse, as well as the fact that both of them were level 4, it did not take long for Levi to reach the limit of level 5 with Fireball Technique and Rock Body.

The power of a level 5 Fireball Technique was no small matter. With the buff of [Fire Snake Bracelet], Fireball Technique had become Levi's most powerful spell attack. According to the standard of the Celestial Circle Shop, the Fireball Technique's attack power should be at B-rank. As long as Levi raised his maximum spiritual force to 30, reaching the standard of a veteran first-circle wizard, he could upgrade [Fireball Technique] to [Big Fireball Technique]. At that time, Levi would not need too many other attack spells. There was nothing that could not be solved with a big fireball. If there was, he would use another one.

All in all, Levi planned to practice the Fireball Technique to the end in the Burning Faction. As for the other fancy spells, Levi would temporarily not learn them.

As for the level 5 Rock Body, its defense should be at the same level as Levi's when he was in the liquid Black Scales stage. It was almost at the B-grade defense level. For Levi, it was more than enough. He did not want to cause any trouble, and now that he had stacked so many armors, he could be said to be invincible among those in the same realm.

As for Water Prison and Green Smoke Escape, they lacked the foundation of cantrips and did not have an affinity with elements like the Earth Pulse, so they were relatively slow to learn. However, with Levi's speed, it would not take long for him to learn these spells to their limits.

"Fireball Technique attack, Water Prison control, Rock Body defense, Green Smoke Escape! Perfect!"
Levi looked at his spell panel and felt very happy..
