

Wizard 388

Chapter 388: Ultimate Undying Bird! Legendary Physique!

(1)

The membership card was an identification card issued by the Pan-Plane Wizard Council to every official wizard. It was proof that a wizard enjoyed all kinds of membership benefits.

In order to make it easier for him to travel in the Wizard World in the future, Levi naturally bound this membership card. Otherwise, it would be difficult for him to do anything in the future when he dealt with the officials. The membership card was directly bound to a trace of the wizard's spiritual force, forming an immutable spiritual mark. Every wizard's spiritual force was unique, similar to the ID number or fingerprint of his previous life. Therefore, even if someone else pretended to be Levi, or if Levi wanted to pretend to be someone else if the spiritual force of the witnesses was inconsistent, it would be investigated by the Pan-Plane Wizard Council.

Levi took out his membership card. There was no portrait of Levi on it, only his membership number and spiritual force imprint. In the Wizard World, appearances were not very useful. If one really wanted to do bad things, there were too many kinds of illusions or spells to change one's appearance.

The witch named Lina used a special Wizard Tool to scan Levi's membership card, and some basic information about Levi appeared on a slate.

[Member number: ... 9527] [Member Name: Levi Schneider] [Organization: Gray Tower (Third-Circle)]
[Member Level: One Star (First-Circle)]

[Criminal Record: None]

After confirming Levi's identity, Lina smiled and said, "Your Excellency Levi, I am Lina the witch. Please follow me to purchase the island."

Levi curiously looked at the Trading Hall. There were very few wizards here. The real estate industry in the Wizard World was in a slump. After experiencing the impact of the sea beast tide, wizards and wizard organizations were tightening their belts to live.

Under the guidance of the enthusiastic witch Lina, Levi came to a huge blue light screen. This light screen was a map of this sea area, and there were various islands dotted on it.

"This is the situation of all the islands in the southern region of the outer ring. Sir Levi, you only need to use your spiritual force to sense the green dots on this map and you will be able to sense the information of the islands being sold.

The islands in the Endless Sea were divided into nine levels. From level one to level nine, the elemental power around the island kept increasing. In the 9th region, the best island was the Whale Song Island. This was an island with

Grade 3 water elemental power. Of course, this is just an example. Whale Song Island cannot be sold to the outside world. What level of island do you want?" Lina asked with a smile.

"Let me take a look first," Levi said.

The area where the Gray Tower and Whale Song Island were located was officially known as the 9th District of the Southern Outer Ring Sea. This House of the Archipelago was just a branch of the 9th District. Levi looked at the screen. He wanted to choose an island that was not too far away from the

Gray Tower. As for the elemental power, the richer it was, the better. However, Levi did not force it. After all, he had the proficiency panel and potions, so the elemental power would not affect him much.

[Black Chicken Island (Level 1 Water Elemental Power)]

[Island Title Certificate Number: CXK250]

[Price: 5000 Aether Stones]

"It's too expensive."

Levi shook his head. Although this island seemed to be closer to the Gray Tower, it was too expensive. He could afford 5,000 Aether Stones, but it was not worth it.

[White Belt Island (Level 2 Water Elemental Power)]

[Price: 8000 Aether Stones]

"Level 2 water elemental energy is even more expensive. Also, it's a little close to Whale Song Island."

Levi looked at them one by one until he found an island in a relatively remote area of the sea. Although it was slightly far from the Gray Tower, it was also far from other organizations. This way, he would not be easily disturbed and could cultivate in peace.

[Black Fire Island (Level 2 Fire Elemental Power/Level 1 Water Elemental

Power)]

[Price: 4000 Aether Stones (discounted and shocking price)]

"Hmm? Black Fire Island, wasn't that Kane's island?" Levi muttered to himself.

"This island isn't bad. Not only does it have Level 1 water elemental power, but it also has Level 2 fire elemental power. It's also very cheap, even cheaper than the Level 1 Cockcrow Island," Levi analyzed in his heart.

Then he asked Lina, "Is there something wrong with this island? Why is the price so abnormal?"

Lina smiled and said, "Don't worry, Sir Levi. The current status of this island is clear. The ownership belongs to the Star Tower, and there are no problems. The reason why the price is so low is that this island is more suitable for the cultivation of the Burning Faction. The fire elemental energy on the island is quite violent. If a wizard of the Ocean Faction is on the island, it will be difficult to cultivate. Recently, there has been no need for a wizard of the Burning Faction in the 9th region, so we have been unable to sell it, so we have a promotion. Black Fire Island used to be the island of the magician Kane. Later, because of Kane's death, the island's property rights were taken back. All the assets left behind by Kane will also belong to Sir Levi.."
