

Wizard 389

Chapter 389: Ultimate Undying Bird! Legendary Physique!

(2)

As an island salesman, Lina knew every island like the back of her hand.

"Sigh, Sir Kane is dead? I wonder who the hell did this. Sir Kane was such a good person," Levi shook his head and sighed.

"That's how the Wizard World works."

"How about this? I'll buy this island. I can't afford the other islands," Levi thought for a moment and said.

"Yes, sir. Please follow me." Lina was delighted. Another deal was closed. As a salesperson, she was happy.

In the end, Levi walked out of the House of Archipelago with something that looked like a Memory slate.

This was the [Contract slate], similar to the [Memory slate], they were both special tools developed by wizards.

The Contract slate was the carrier of the contract between wizards. The relevant rights and obligations and the wizard's spiritual imprint were engraved on the slate. No party to the contract could violate the contract on the slate. Once violated, the soul would suffer the backlash of the special contract spell solidification in the Contract slate. It was said that other wizards could not resist this backlash except for high-level wizards. As for high-level wizards and above, there were other high-level contract spells used by both parties to form a contract.

These seemingly inconspicuous slates were the cornerstone of the wizard civilization's system. If any civilization wanted to progress, the spirit of contract was indispensable.

According to the contents of the Contract slate, after Levi bought Black Fire

Island, he would have the property rights to the island for the next 100 years. He was the absolute master of Black Fire Island. If any wizard broke into Levi's territory without Levi's permission, Levi had the right to kill them directly. The protection of private property was very important to wizards.

"A hundred years is enough. Moreover, after a hundred years, I can renew the contract," Levi thought.

At the same time, the Contract slate was equivalent to the title deed or property right certificate of Black Fire Island. From now on, according to the bill of the Pan-Plane Wizard Council, Levi's rights to Black Fire Island would be protected by the council, and no one could take it away.

In principle, this prohibited some powerful wizards from bullying the weak and killing people for treasures. Of course, in reality, there would definitely be some people who broke the law for the sake of profit, or who had connections and backgrounds to bully the weak. It was inevitable.

In the Black Fire Island, Levi found a hidden abyss to hide the Dragon King Whale while he swam to the island.

The Black Fire Island was now in a bleak state. The staff of the Star Tower who had been guarding the island had long since been evacuated due to the sea beast tide. Traces of the sea monster attack were everywhere on Black Fire Island.

Levi looked at the desolate black island and sighed.

"I have a home. Hahaha, I bought it in full."

Black Fire Island spanned eight kilometers from east to west and five kilometers from north to south. It was much smaller than the island where the Gray Tower was located. However, the Gray Tower was prepared for the establishment of the wizard organization. There were also many mortals living on it to maintain the basic needs of the wizard organization. Levi only needed to live on his own and did not need to be too big.

According to the introduction of the House of Archipelago, the sea area below Black Fire Island was a huge group of active volcanoes. These active volcanoes had been erupting for a long time, forming this island. The highest peak of Black Fire Island, Fire Dragon Peak, was also an active volcanic crater. The last eruption was 30 years ago.

However, these geological disasters posed no danger to Levi. The rich fire elemental energy here greatly increased the power of his Burning Faction spell. It would also speed up his cultivation of the Sun Meditation Art and Burning Faction spells. Overall, this was a very good island.

Levi's Black Snake's Message was fully activated and could completely cover the entire Black Fire Island and the nearby sea area. In this way, he would know what was going on.

Suddenly, Levi's face darkened. He felt that something was moving under the Black Fire Island. At first, he thought it was a wild beast, but when he carefully used his Advanced Perception, he realized it was a person. Soon, Levi found an entrance at the crater of Fire Dragon Peak.

[Fireplay Master Kane]

"This is Kane's cave. The deeper you go, the denser the fire elemental power is. There was a wizard who seemed to be secretly staying in Kane's cave and cultivating there," Levi analyzed in his heart.

His Spider Sensing did not sense any danger, which meant that the enemy should not be strong. No matter who it was, Levi had the right to expel them. If the other party refused, Levi could make a move.

Thinking of this, Levi's expression was calm. He walked down the cave passage of Kane's House and gradually went down. The temperature was getting higher and higher, but Levi did not feel uncomfortable at all.

Finally, in a spacious underground cave, Levi's figure appeared. A wizard in a gray robe opened his eyes and looked at Levi, asking, "Who are you?" "Master of Black Fire Island, Levi, who are you? Why are you on my island?" After saying that, Levi took out his title deed.

The man looked at the title deed and suddenly smiled, "I'm sorry, I thought this was an ownerless island. My name is Terrell, an official wizard of the Azure Fire Alliance. Since this island has an owner, I'll be leaving.."
