

Wizard 390

Chapter 390: Ultimate Undying Bird! Legendary Physique!

(3)

The man named Terrell said with a smile, looking very kind.

Levi felt the hair on his arm stand up, and he knew that this was the effect of the Spider Sensing.

"Hah, you want to harm me? Why are you still pretending to be a good person?" Levi sneered in his heart.

Spider Sense could perceive danger and people who were extremely hostile to him. When a person who could pose a certain threat to him and was hostile to him appeared, Spider Sensing would alert him.

This person's acting skills were not bad, and his smile was very friendly. However, he was a notorious NPC! Under Spider Sensing, any evil would have nowhere to hide!

"Then you can leave. I won't hold it against you. After all, you don't know that this island has an owner," Levi smiled.

"Alright, Sir Levi, I'll leave now," Terrell laughed foolishly. Then, he held his wand and left the underground cave vigilantly.

Levi used his Advanced Perception to monitor his every move. If the other party did anything inappropriate, he would not hesitate to defend himself and kill him here.

In the end, Terrell rode his flying Wizard Tool and left the place.

Levi looked at the distant Terrell and pondered. The sense of hostility from his Spider Sensing had not disappeared yet.

Levi knew that the other party would definitely come looking for him again. Naturally, Levi would not let go of someone who was hostile to him.

A small slate appeared in Levi's hand. He chanted a spell, and the image of the conversation between him and Kane slowly appeared on the tablet.

This was a photographic slate. The solidification spell on it could record what happened within a certain range. It was the same as surveillance, but it was even clearer than surveillance. Moreover, the photographic slate was absolutely objective and could not be faked. Therefore, the contents of the slate could be used as evidence in the Wizard Tribunal.

With Kane's previous experience, Levi had a plan. He was a lawyer in his previous life, so he naturally knew the importance of this aspect. Therefore, he came prepared this time. In the future, if anyone trespassed on his island, he would record it with a photographic slate. That way, killing the other party would be justified. With this evidence, the Wizard Tribunal could not do anything to him.

After Terrell left, Levi immediately devoted himself to the exploration of the Black Fire Island. He first surveyed the entire island and memorized the basic situation of the Black Fire Island.

After some exploration, Levi decided to stay in Kane's cave dwelling. Kane's cave dwelling was not bad. It had a lot of space, but it was too hot. However, it was suitable for Levi to practice the Burning Faction. He changed the sign from [Kane House] to [Black Fire Cave].

The soil on Black Fire Island was more fertile than Levi had imagined. Due to the accumulation of volcanic ash, it looked a little dark. After some slight modification, he could open up a medicinal garden and plant some herbs that were compatible with the Fire Element. They would definitely grow well here. Originally, there was a medicinal garden on the hillside of Fire Dragon Peak that Kane had planted, but it had been completely destroyed because of the sea beast tide.

In addition, Levi also found a few good natural caves. He modified them and placed his Saint Scorpions in them. Levi planned to transform it into a "Saint Scorpion Breeding Base". He had also received the inheritance of the Spider Witch's School of Insects. This inheritance was much more comprehensive than the "Sacred Insect Control Technique" he had received in the human world. It systematically introduced the basic knowledge of the School of

Insects and many notes of the Spider Witch. These were all priceless treasures.

As for the thousands of Red-Faced Sea Ghost Spiders, Levi did not dare to let them out of the Bug House for the time being. These strange insects were quite ferocious, and he did not have a special method to control them. If he let them out, they might even backfire on him.

The Red -Faced Sea Ghost Spiders were not something that Levi could compare to the Saint Scorpions he had obtained in the mortal world. On the ranking list of mutated insects set up by the School of Insects, the Red-Faced Sea Ghost Spider was ranked 111th, the highest ranking among the low-grade mutated insects.

It should be noted that the top 36 of the rankings were all famous high-grade insects, while the 37th to 108th were middle-grade insects. The Red-Faced Sea Ghost Spider could be ranked 111th, which showed how terrifying it was. This was also the trump card of the Spider Witch to make a name for herself in this sea area.

Levi looked at the ranking list of mutated insects. His Saint Scorpion was ranked beyond 200, but the Saint Scorpion on the ranking list was the most ordinary kind. Levi believed that his Saint Scorpion was of much better quality than those. If he carefully nurtured it, it should not be inferior to the top 200. Moreover, the Saint Scorpions had the possibility of evolving into middle-grade insects in the future. Although it came from the human world, it was vaguely related to the Underworld Mythology of some civilizations. In many places, it was respectfully called the "Sacred Insect" or "Dark Worm." Therefore, Levi was very optimistic about the potential of these little guys.

Of course, it would be even better if he could subdue the Red-Faced Sea Ghost Spiders. However, the control spell was at the second circle, so Levi probably would not be able to deal with these fierce sea spiders in the short term.

After settling his Saint Scorpions, it was already day 2. Levi could still feel the danger from the Spider Sensing. He knew that Terrell was probably still thinking about how to deal with him..
