

Wizard 391

Chapter 391: Maximum Undying Bird! Legendary Physique! (4)

Levi calmly took out the corpses of the Rock Troll couple, Green Ghost Carter, Kane, and Little Octo from his storage bag. Little Octo was the nickname Levi gave to the swordsman from the Sea Clan.

Apart from Little Octo, Levi had covered the five living dead with a layer of alchemy armor made of a mixture of brass and mithril. Assembled them tightly to strengthen their defense. In addition, there was also an isolation spell that Levi had asked the Tower Master to solidify on these armors. It could block the spiritual power of low-level wizards. This way, no one would be able to see the original appearance of the five living dead.

After injecting the Core of the Undead into the bodies of these living dead, the five living dead, who were comparable to First-Circle Wizards, stood up. These were the five generals of the living-dead family, Levi's Cyberpunk version.

"Very good. All of you find a place to hide," Levi muttered to himself.

Levi also moved the Black Flame Demonic Bird to the Black Fire Island. This demonic bird liked hot places to begin with, so it soon fell in love with this place.

After everything was ready, Levi settled down at his home on Black Fire Island to cultivate his breathing technique while waiting for Terrell's arrival.

Three days later, Levi, who was sitting on a red boulder, stood up. His aura was a little stronger than before because his Undying Bird Breathing Technique had reached its Maximum!

Levi—

Undying Bird Breathing Technique: Level 11 (Maximum), Special Effect: Blood Ember (Solid State), Resurrection.

Levi felt his body had been reborn. His entire body was covered in layers of blood-colored ashes. These ashes contained traces of magical power. He used the Poseidon Trident to open a hole in his arm, where bones could be seen.

Then, the Blood Ember quickly surged into the wound. The next moment, something magical happened. The Blood Ember turned into squirming blood-colored flesh worms and burrowed into Levi's wound, forming a trace of flesh and blood on Levi's arm. In about a minute, the wound recovered.

"I still can't compete with the regeneration speed of the Primary Blood Clan who rely on the Blood River Will. However, other than some spells of the Life School of Thought, other schools shouldn't be able to heal such a serious wound in a minute."

Levi wanted to cut off his arms and legs and test how long they would take to grow back. However, after thinking about it, he decided not to.

All in all, the level 11 Blood Ember's self-healing ability had improved a lot compared to before. Theoretically speaking, as long as Levi's vital organs, such as his head and heart, were still around, he could recover from any serious injuries through the Blood Ember.

Of course, if possible, Levi hoped that he would never be able to use the Blood Ember's self-healing ability.

The supernatural organ brought by the Maximum of the Undying Bird Breathing Technique was Levi's... palm.

With a thought, Levi's normal-looking hand suddenly became thin, long, and black. His knuckles were thick, and sharp claws grew out of his fingertips. They looked like eagle claws, burning everything with raging flames. This was the legendary organ of the Undying Bird, which Levi called the "Undying Fire Claw".

This pair of sharp claws was extremely powerful and had an extremely strong regenerative ability. Levi slashed gently and the huge rock under him was neatly cut apart by the Undying Fire Claw. The void seemed to have been torn apart.

He gave it a try. The hardness of the Undying Fire Claw was not much inferior to the Luminant gold. It could be said that the claw itself was a divine weapon. Coupled with the power of the Golden Revolving Slash, the defensive spell of a First-Circle Wizard would be instantly torn apart.

"Black Scale, Flame Body, Rock Heart, Frost Arm, Blood Ember, Bird Claw,

Dragon Spine, Whale Back, Hump, Blood Wings, Ostrich Feet, Tentacles..."

Levi admired his peerless appearance and couldn't help but smile. The feeling of becoming stronger was too good.

As the Undying Bird Breathing Technique advanced to legendary, Levi came to

The Legendary Four-Dimensional State.

Legendary Power, Legendary Speed, Legendary Defense, and Legendary Physique. These four important attributes had all reached the Legendary stage. All that was left were Legendary Endurance and Legendary Perception.

"The current me is gradually approaching the combat power of a Second-Circle Wizard," Levi analyzed in his heart. Of course, it was still far from enough.

In addition to the Maximum of the Undying Bird Breathing Technique, Levi would probably be able to reach the Legendary realm within two years with the Golden Horn Breathing Technique. By then, he wondered what powerful breathing technique he could mutate after fusing the Golden Horn and Black Snake two Legendary-level defense breathing techniques.

As for endurance and Perception-type breathing techniques, Levi could only leave it to fate. After all, there were too few of these two breathing techniques, especially Perception. It was rare to see it. The ones he saw were shallow, and those of excellent quality were very rare.

Holy Brilliance Calendar Year 1028, Month of Germinal.

Perhaps he was delayed by something, or perhaps he was planning something big. In any case, Levi was already prepared. He was not coming...

Naturally, Levi also sent someone to investigate Terrell's information. Then, he found out that Terrell was not a member of the Azure Fire Alliance at all. He was once a member of the alliance, but because he had violated many crimes of the Pan-Plane Wizard Council's law and ultimately deprived him of his qualifications and rights as a member, he became a dark wizard. If he had known earlier, Levi would not have needed to beat around the bush and just kill him on the spot. He could even go to the Star Tower in exchange for the bounty.

During this period of time, Levi had planted some seeds of first-circle herbs in the herb garden of Fire Dragon Peak. He also used the Flower Fairy's Dew to water them every day and took good care of their growth..
