

## Wizard 392

Chapter 392: Maximum Undying Bird! Legendary Physique! (5)

Many of these herbs were ingredients for refining the Sandman Potion. The Sandman Potion could also be used in the First-Circle Wizard stage, but its effect was far inferior to that of the apprentice stage. However, as the only meditation supplementary potion Levi currently had, he naturally could not give up on refining it. Therefore, other than letting Manla continue to collect ingredients for him, he also wanted to plant some himself. Even if these herbs matured in the future and he no longer needed the Sandman Potion, Levi could still use the Sandman Potion to earn money. In short, it was not a loss.

After more than a month, the layout of the Black Fire Island was almost complete. Levi looked at his own island with satisfaction. The happiness of an old farmer was overflowing on his face.

"Farming is really a beautiful thing. However, this island still lacks some servants and guards. I definitely won't be able to take care of it alone."

He wanted to refine some alchemical creatures to guard the house and do some chores in the future. Compared to humans who might betray him, these iron lumps and living dead were more obedient.

After he mastered the art of arrays, he could also set up some defensive arrays, trap arrays, and attack arrays on the island to make his Black Fire Island impregnable. After all, for a long time to come, the Black Fire Island would be his second home. Before he stepped into the Third-Circle Wizard, Levi did not plan to leave the outer circle. Although the resources here were a little poor, the wizards were generally weak. With Levi's strength, if he did not take the initiative to cause trouble, he could protect himself in this sea area. The inner sea region was different. It was the "Sea of Dreams". There were all kinds of people there. Only Intermediate Wizards could barely stand firm. If a low-level wizard like Levi went, he would easily be involved in all kinds of dangerous whirlpools. In accordance with the principle that he would rather be the head of a chicken than the tail of a phoenix, he would farm in the outer circle first, develop, and wait until he reached the third ring before thinking about entering the inner circle.

After waiting for a few more days, Levi still did not see Terrell. Since he did not come, Levi could not be bothered to wait any longer. He took Kane away and let the other Four Generals of the MO family take care of the house. He rode the Dragon King Whale to the Gray Tower. With the Dragon King Whale's speed, it would only take two days to travel from the Black Fire Island to the Gray Tower. If it was the Azure Ship, it would take at least seven days.

Back in the tower, all the official wizards were busy. Levi had already become an official wizard and was planning to start his alchemy training. Therefore, he went to the seventh floor of the White Tower and met the Tower Master.

"I heard that you bought an island outside. How was it? Did it go well?" asked the Tower Master.

"It's pretty good. With such an island, I can be considered to have a second home in the Wizard World other than the Gray Tower, haha." Levi laughed.

He did not hide the fact that he had bought an island from the Tower Master and Marlene, because he would definitely cultivate alone there for a long time in the future. He would only come back when he needed to attend classes or when there were activities in the tower. This was definitely not hidden from the Tower Master.

"That's good. As an official wizard, you have to have your own base."

Herman said. Outside the Gray Tower, there were several private islands that belonged to him. These private islands were mineral islands that could be mined for brass ores. Occasionally, some mithril ores could be found.

"Hehe, Tower Master, you're welcome to visit me in the future. If nothing goes wrong, I'll come back once a month to deal with some matters and classes in the tower. I'll stay on my island to cultivate the rest of the time."

Levi was now an official wizard. According to the rules of the tower, he needed to teach at least one course. Levi was currently in charge of the pharmacist course in the tower. As there were very few apprentices who were part-time pharmacists, Levi only needed to attend one course every month.

"Alright, let's not talk anymore. Let me bring you into the wonderful alchemy world." The Tower Master smiled.

In the following days, the Tower Master began to teach Levi alchemy knowledge.

Alchemy was a new school. So far, there were not many wizards in the school of alchemy. Generally speaking, most traditional wizards thought that the school of alchemy was not the right way. It was impossible for Legendary Wizards to be born.

In fact, according to the Tower Master's description, the alchemy faction was indeed in a miserable state. The strongest wizard in the entire faction was an eighth-circle wizard, which was naturally very strong for Levi. However, as a faction, at least a great wizard who specialized in this faction had to support them in order to be called a mainstream faction. For example, the four traditional factions, Earth, Fire, Wind, and Water, had several Legendary Wizards in each faction.

Therefore, alchemy wizards had a very low status. The Tower Master was also a wizard of the Ocean School of Thought at the beginning, but after receiving the inheritance of an alchemy wizard by chance, he realized that compared to the Ocean Faction, he seemed to be more talented in alchemy. He decisively switched to the alchemy faction that many wizards thought was "unorthodox" and quickly made achievements in this field.

In fact, in the Realm of Azure Cloud, there were not many people who were more accomplished in alchemy than the Tower Master. As the traditional school of the Ocean School of Thought, there were very few sorcerers who studied alchemy here.

With the guidance of the Tower Master. Levi's alchemy knowledge improved very quickly..
