

Wizard 395

Chapter 395: Paralysis Ring, Seven Generals Formation, Legendary Black Whale! (2)

Levi had already cultivated the Fireball Technique, the First-Ring Spell, to its limit, so its power was naturally not to be underestimated.

When Terrell saw Levi use the Fireball Technique, which was even more powerful than his, he started to doubt his life.

Wasn't Levi from the Gray Tower? Was he from the Burning Faction and Ocean Faction?

Boom!

The Fireball Technique exploded in front of Terrell, but it was blocked by his First-Ring Spell—Flaming Shroud.

At the same time, five powerful figures who had been hiding on the island suddenly appeared and attacked Terrell.

'I???' Terrell's expression changed drastically.

He roughly examined the five figures with Perception. They were all First-Circle Wizards. One of them was an eight-legged monster. It even waved eight bone knives and destroyed the Fireball Technique that Terrell had blasted.

The Rock Troll couple, Green Ghost Carter, Little Octo, Kane, and the five living dead, attacked Terrell with all kinds of attacks. For a moment, spells and spell-like abilities intertwined, and saber beams and flames soared into the sky.

It was fine if Levi did not make a move, but once he did, he used earth -shattering methods.

After a period of indiscriminate bombardment, Terrell's spell defense was completely torn apart. He was surrounded by the living dead army that had been lying in ambush for a long time and had nowhere to escape. Little Octo, who was the strongest among the living dead, was like the God of Death, destroying all of Terrell's spell attacks. The Eight Blades Sect, which had always been successful, displayed its might again!

Before long, Little Octo's bone knife pierced through Terrell's heart. If Levi had not asked them to leave their corpses intact, Little Octo would have torn him into pieces.

Although Terrell had just advanced to become a senior first-circle wizard and his strength had increased greatly, he was still no match for the five first-circle living dead.

In the end, it was Terrell who went up, and Terrell was instantly killed...

On the other side, Moot was dumbfounded. 'We agreed to kill him together, but you died right away. Why should I bother continuing?'

Levi saw that his enemies were all dark wizards, so he decided not to hide anymore. He unleashed all his Legendary Four-Dimensional States, including the Black Scale and Flame Body. In front of Levi, Moot was like a pitiful, shivering monster.

"So fast!" Moot was shocked. The defensive spells around him flashed crazily, and he felt a chill run down his spine.

Almost instantly, Levi's Undying Fire Claw pierced through Moot's spell defense. Then, Levi smiled sinisterly and tore the spell force field apart. It slowly dissipated in front of Levi.

At this moment, the Poison Fire Bone Snake broke through Levi's Water Prison

Spell and charged towards Levi's back. Levi used the invincible Whale Mountain and the recoil of the Hump! The Poison Fire Bone Snake's body, which was dozens of meters long, was sent flying and slammed into the Black Fire Island. It almost fell apart and swayed on the spot as if it was drunk.

At the same time, a Soul Flame smashed into Levi's head, and green flames enveloped Levi's head.

"Hahaha, die!"

Moot instantly distanced himself from Levi and was about to transform into Green Smoke Escape to quickly escape this place.

Amidst the raging green flames, a hideous Black Scale head appeared with green flames on its head. The blood vessels on Levi's face seemed to have turned into a channel of magma. His entire body was filled with scorching energy under the stirring of the Furnace Heart. Then, Levi opened his mouth, and the thick Red Lotus Breath wrapped in long flames instantly evaporated the seawater along the way into a void channel.

Boom!

A terrifying heat wave swept across!

"What?"

At the critical moment, Moot did not hesitate to use his life-saving trump card, the Body of Ghost Fire. Although the Body of Ghost Fire was immune to most physical attacks, it was only partially immune to spell-like breathing abilities like Levi's.

The breath dispersed the ghost fire and scattered it into sparks of flames.

These flames had just condensed into Moot's figure not far away.

Levi descended from the sky. The Ostrich Feet wrapped in endless black gas crushed Moot's shoulder and stepped him into the seabed!

Gulp!

Moot took a gulp of seawater.

The next moment, the blood-red tentacle pierced through Moot's heart. "You... What kind of monster are you..."

Before he died, Moot's eyes were unfocused, but they were filled with confusion and doubt.

Moot had once come into contact with the bloodline modification wizards of the Life School of Thought.

Those monsters who were proficient in the School of Mutation, organ transplantation, and bloodline studies transplanted the powerful organs of other transcendent creatures onto their bodies and made them into "biological prosthetics" similar to "alchemical prosthetics". They were used to transform the weak bodies of humans and obtain extraordinary power.

However, no wizard from the Life School of Thought could use the organs and abilities of these monsters as freely as Levi. It was as if Levi was not a human, but a real... monster!

In his fear and confusion, Carter's cousin Moot also died under Levi's claws.

"In front of me, all evil shall be brought to justice." The dark wizard terminator,

Levi, put away Moot's corpse. Since the summoner was dead, the Poison Fire Bone Snake's connection with the human world was severed. The summoning door from hell appeared to retrieve the Poison Fire Bone Snake..
