

Wizard 398

Chapter 398: Paralysis Ring, Seven Generals Formation, Legendary Black Whale! (5)

Holy Brilliance Calendar Year 1028, the end of the Month of Winter, the arrival of the new year.

Levi spent a total of several thousand Aether Stones to refine Eight Swordsman Mantises.

Levi was surprised that these Eight Swordsman Mantises could even fight against a first-circle creature as powerful as the Poison Fire Bone Snake.

"It's about time. The Eight Swordsman Mantises are enough to patrol my territory or do some simple chores for me. I can't afford more. In the future, I'll have to get a blueprint of first-circle alchemical creatures from the Tower Master to refine. However, that can only be tried with my Furnace Meditation

Art and the level 4 alchemical creatures. My current skills in the School of Alchemy are not enough to refine more precise and complicated first-circle alchemical creatures."

As soon as Levi walked out of the alchemy area, he saw a seagull-like bird soaring in the sky and landing slowly on Levi's Black Fire Island. After the seagull landed, it spoke in human language.

"Pan-Plane Wizard Council Number... Member 9527 Levi, the Pan-Plane Truth Journal you subscribed to has been delivered."

After the seagull finished speaking, it left behind a slate and left.

Levi took the slate and the information on it automatically appeared in Levi's mind.

This was a special service that Levi had activated after becoming a member of the Pan-Plane Wizard Council. If he paid 1,000 Aether Stones at once, he would be able to enjoy a major news push service from the council in the next hundred years.

Although Levi wanted to cultivate in seclusion, he could not completely ignore the news of the outside world. Only by constantly paying attention to some big events could he avoid being involved in some inexplicable dispute.

[The general election of the Pan-Plane Wizard Council has been successfully held. The Burning Faction's Legendary Wizard, the Blazing Sun God Wizard Edmund, has once again defeated the Ice Faction's Frost Witch, Gullwig, with a weak number of votes. He will be re-elected as the Grand Council Chairman of the Pan-Plane Wizard Council for the third time. Members, in the next millennium, let the Blazing Sun God Wizard lead our wizard civilization to greatness again! Let the light of Edmund's Blazing Sun shine on the Multidimensional Plane!]

"Ah? When was the election? Why didn't I, a member, know? Wouldn't my vote be wasted? Why didn't anyone spend money to buy my vote... Forget it, forget it. Anyway, such a big shot's matter has nothing to do with a small fry like me."

[A group of dark wizards from Chaos City, the darkest and most evil dark wizard organization in the Pan-Plane Plane, has recently created a shocking suicide attack on the Realm of Crimson. Many wizard organizations have been implicated, involving nearly a hundred wizards! In response, the Chaos City Lord, the Dark Wizard Emperor, and Astor, the Son of Chaos, announced that they were responsible for this matter. "Everything belongs to Chaos, and so do the wizards. The existence of the Pan-Plane Wizard Council is a blasphemy against Chaos. How disloyal is this! I, the Dark Emperor, the Lord of Destiny, Astor, will definitely bring Chaos to the Pan-Plane Wizard Council. Wait for my arrival!"]

"Are Legendary Wizards also so stupid? Looks like the dark wizards are going to start causing trouble again. It's better to go out less recently," Levi muttered in his heart.

[An incomplete "experimental subject" of the Life School of Thought, escaped from Ms. Rollin's laboratory when the lady assistant wasn't paying attention. She even erased the tracking mark on her own. Ms. Rollin hereby reminds all members that if you encounter this experimental subject, please contact the Pan-Plane Wizard Council immediately. Ms. Rollin will reward you handsomely. (Photo attached)]

"Fortunately, I'm in the Realm of Azure Cloud. The wizards in the Realm of Life are too miserable. They're always being disturbed by all kinds of experimental subjects." Levi sighed.

Ever since he subscribed to the Pan-Plane Truth Journal, Levi would read the newspaper to relax and relax during his daily cultivation. Unknowingly, half a day had passed by the time he finished reading the newspaper.

Levi memorized some useful information in his mind and continued to cultivate. When he was almost done with his alchemy research, Levi borrowed the Book of Cypher from the Tower Master and prepared to start studying arrays. He planned to learn arrays first and then set up a protective array around his cave abode.

Time always flew by when one was engrossed in research.

While studying arrays, Levi was teaching pharmacists in the Gray Tower and using more first-circle potion formulas to cultivate the progress of his pharmaceutical skills. During the Month of Flowers, Levi's pharmaceutical skills had also reached level 8 and reached the level of a first-circle senior pharmacist. However, the cultivation of arrays was still slow and had not even appeared on the

proficiency panel so far. This meant that Levi had not mastered arrays after several months of cultivation.

Fortunately, Levi was patient. He cultivated the array while advancing his cultivation realm.

Year 1029 of the Holy Brilliance Calendar. During the Month of Flowers, before Levi planned to hold a periodic team-building with Emperor Mu, Levi's Black Whale Breathing Technique reached the Maximum Level 11.

Levi—

Black Whale Breathing Technique: Level 11 (Maximum), Special Effect: Whale Back (Solid State), Sea-Swallowing Whale.
