

## Wizard 399

Chapter 399: Sea-Swallowing Whale! Third Form: Giant Whale! (1)

Levi had finally cultivated the Black Whale Breathing Technique to the maximum!

Levi's back was incomparably broad, as if it could carry everything in the world. His full muscles were beautiful and elegant, and there were ravines crisscrossing it. It looked like the back of a demon!

The Solid State Whale Back had improved Levi's strength quite a bit, but what could really show the power of the Black Whale Breathing Technique was the second Special Effect that was born after legendary.

[Sea-Swallowing Whale: Absorb a large amount of energy in a short period of time to accelerate blood circulation. The energy will gather in your body, causing your body to expand rapidly. Your strength will also increase as your body expands, but at the same time, your speed and agility will decrease. This special effect can't be upgraded, but it will increase slightly as your breathing technique realm increases.]

Looking at this Special Effect, Levi directly stored himself in the Blood Whale's sac and hump. The food energy that was enough for him to use for a year began to flow into his body bit by bit.

As the energy flowed into his body, Levi's body began to grow visibly. The blood in his body seemed to be boiling, and traces of aura surged into Levi's limbs and bones. Levi was like a rubber man filled with vitality, expanding from his usual height of about 2.5 meters.

2.7 meters, three meters, four meters, four and a half meters, four and a half meters... five meters!

After Levi's height reached five meters, the energy in his body was almost exhausted. He also felt that with his current realm, reaching five meters was his limit. If he continued to expand, with his current legendary knight body, he might explode.

He looked at his adult Rock Troll-like body and couldn't help but feel proud.

"Big is strong!"

Levi reached out and clenched his fist. His fist creaked as he punched the ground.

The effect of his casual punch was like the First-Ring Spell—Mountain Giant's Wrath. Levi had already transformed into a mountain giant with immense strength. Within a radius of dozens of meters, mountains collapsed and the ground cracked. The rocks were completely annihilated and turned into dust!

The terrifying force seemed to make the Black Fire Island tremble slightly.

Igor and the Black Flame Demonic Bird, who were sleeping soundly in the cave, thought that there was an earthquake. They stuck their heads out of the hidden cave and looked at each other.

In the end, after seeing Levi pounding the ground, the two of them returned to their abode helplessly.

They were already used to Levi causing trouble on the island every day.

"After transforming into a giant, my strength attribute should be three times stronger than before. This is even more terrifying than the enhancement of the Red Lotus Blood. The enhancement of the Red Lotus Blood on my strength is only two times, but the Red Lotus Blood wins in all aspects. As for Sea-Swallowing Whale, it emphasizes breaking all techniques with one strength. All of it is invested in strength. In order to pursue strength, I even gave up some other attributes."

In short, because he was afraid that he couldn't kill the enemy, he used all his strength.

Levi analyzed the advantages and disadvantages of Sea-Swallowing Whale and Red Lotus Blood, in the end, he felt that both had their advantages and disadvantages. Red Lotus Blood also had a weakness, it was in a weakened state after the eruption, but this was not the case for the Sea-Swallowing Whale.

About three minutes later, Levi's body began to shrink like a deflated ball. White gas spewed out from all kinds of pores on his body. Levi actually shot out like a bullet with the help of the recoil of the airflow.

Bang!

The next moment, Levi was shot to the surface of the sea.

"Damn it, it can be used like this? Fortunately, the alternate world is not under Newton's control." Levi was speechless.

The speed of the explosion just now was almost not inferior to the full speed of Levi's Blood Wings.

If he was caught off guard, he could also catch the enemy off guard. He could rely on the deflated push to close the distance and use his close combat advantage to take them down in one move!

Suddenly, Levi's expression changed as he felt a strong sense of hunger. This hunger reminded him of the gluttonous desire to devour everything after he cultivated the Black Snake Breathing Technique for the first time!

He immediately took out a large pile of dried meat that had been roasted with Levi's secret condiments and a large bucket of Bread Potion from his storage bag and threw it into his mouth. After doing this, the energy in his Blood Whale's sac and hump began to fill up, and the feeling finally dissipated.

Levi ate all the food in the storage item before burping in satisfaction.

"Therefore, there are some insignificant side effects after using the Sea-Swallowing Whale. It's the intense desire for gluttony that even a legendary knight can't tolerate! This seems to be the bestial instinct of the extraordinary bloodline in my body! Otherwise, a legendary knight like me wouldn't have almost lost control of my hunger."

In the Dast. Levi thought that those ordinary knights had become Lunatic

Knights because of hunger. Now, it seemed that Lunatic Knights had a deeper reason—the extraordinary bloodlines themselves!

The path of a legendary knight was to evolve into the form of the original ancestor. How to control the beast nature of the bloodline with the willpower and perseverance of a knight might be a problem to consider in the future.

Alchemy maniacs became insensitive because they lost their humanity, while Lunatic Knights became bloodthirsty and violent because they accepted their bestial nature.

"There's still a long way to go on the path of a knight." Levi sighed..
