

Wizard 400

Chapter 400: Sea- Swallowing Whale! Third Form: Giant Whale! (2)

In addition to the second Special Effect, the legendary organ born from the Black Whale Breathing Technique was also relatively normal, which was Levi's lungs.

After he advanced to legendary, Levi's chest, which was originally filled with lungs, became even bigger and squeezed a lot of space, making Levi's chest even fuller.

"The lungs of the Black Whale. This is the supernatural organ born from the Black Whale Breathing Technique."

Levi opened his mouth and took a deep breath. An endless aura surged into Levi's lungs, as if it had become a bottomless pit. About half an hour later, Levi stopped breathing. His size did not look any different from before, but his body was much heavier than before. This was because he had absorbed a lot of aura and stored it in his Black Whale's lungs, causing the aura to turn into an extremely heavy liquid.

"I can breathe like Leviathan. I don't need to surface for three days and three nights. I can sleep in the sea. With the lungs of the Black Whale, I'm almost half a Sea Clan. I can fight more freely in the sea. This is an extremely useful supernatural organ for an environment like the Endless Sea. In the future, when I encounter the so-called sea beast tide, I'll hide in the mouth of the Dragon King Whale and go wherever I want."

Moreover, Levi felt that this Black Whale's lungs did not only have this function. There should be other magical uses, but he had yet to discover them.

Levi came out of the water and touched Leviathan's head. Then, he took out the Poseidon Trident and began to sharpen Leviathan's horns.

Levi patted Leviathan's head and said, "Go have fun. It's good for your blood circulation and longevity. I'm doing this for your own good."

Leviathan nodded and returned to the Deep Sea in satisfaction.

Levi returned to the Black Fire Cave with the dragon horn powder that was enough for him to use for a period of time.

Now, he had cultivated the Black Snake, Blood Beast, Red Lotus, Undying Bird, and Black Whale Breathing Techniques to the Maximum of the Legendary realm.

However, he was still not in the Legendary Five-Dimensional State. He could only call it the Legendary 4-5 -Dimensional State because the Black Whale Breathing Technique was also a part of the lower dimension of strength. In addition, there was also the strengthening of the arms of the Giant Breathing

Technique and the strengthening of the legs of the Ostrich Mountain Breathing Technique. Levi had also broken the limit of the Giant and Ostrich Mountain Breathing Technique some time ago.

Now, these two breathing techniques had both reached level 10 and were advancing towards the final level 11.

In Levi's current breathing technique system, only Legendary Endurance and Legendary Perception were far behind. Some time ago, after the delivery business in the human world and the Wizard World was restored, Andrew had sent a batch of breathing techniques. However, none of them were of the type that Levi wanted. Furthermore, the quality of these breathing techniques was getting lower and lower.

This meant that if he were to collect breathing techniques under normal circumstances, even with Andrew's ability, he would definitely gain less and less in the future.

Andrew had also asked Levi if he should just let go of the fight. Levi thought for a moment and told Andrew not to be anxious for the time being. The human world was not chaotic enough yet. Currently, the Multidimensional Plane's power that had descended on the human world was still too little. The main problem was the scattered disasters of the blue frost and the Blood Clan. They could not make the churches of the seven kingdoms panic. After some time, more powerful existences should infiltrate the human world. More and more Dark Wave items would arrive. They would definitely start a war with the Church and the hidden power of the Church. At that time, a large number of large families would definitely be destroyed. At that time, with Andrew's ability, he should be able to obtain many useful breathing techniques. He could even go straight to Heavenly Mountain and snatch the inheritance of the Van Helsing family that was suspected to have landed there.

According to the news that Levi had received, the Dark Wave was accelerating. The day of chaos in the human world was not far away. All Levi needed to do was to wait patiently.

In the middle of the Month of Flowers, the annual team-building event of the

Twilight Knights arrived as scheduled. Levi came to the island where he met Emperor Mu early in the morning. This time, they changed the place. The island had gradually fallen apart because of the long legendary battle.

He sat there and waited quietly. The Dragon King Whale was waiting for Levi in the Deep Sea. Not long after, a huge sword dragonfish rode the wind and waves. On the back of the sword dragonfish, Emperor Mu laughed excitedly. "Haha, Commander, I'm here! The sea beast mount you gave me previously is really good. In the future, I won't have to wait for the Azure Ship when I go out. That lousy ship doesn't have many shuttles and its speed is slow. It's too torturous on it."

"Although this sword dragonfish isn't a first-circle transcendent creature, it's still a descendant of the Dragon Clan. You have to cherish it in the future," Levi said.

Some time ago, Levi had chanced upon a sword dragonfish. He thought that Emperor Mu was still taking the bus and did not even have a personal mount. It would damage his reputation as the leader of the Twilight Knights. Hence, he spent some effort to tame this sword dragonfish and gave it to Emperor Mu. Emperor Mu insisted on giving him 500 Aether Stones. With Emperor Mu's capability, it would definitely take a lot of effort to save up 500 Aether Stones. At first, Levi refused to accept it, but in the end, he could not refuse. He reluctantly accepted it..
