

Wizard 401

Chapter 401: Sea-Swallowing Whale! Third Form: Giant Whale! (3)

The reason why he gave the mount to Emperor Mu was because Levi had ulterior motives. He wanted more than just the Aether Stones; he wanted Emperor Mu's Saint Ape Breathing Technique and his loyalty as a legendary knight.

"Captain, my strength has improved greatly after I entered seclusion. You have to be careful from now on. I am no longer the Emperor Mu of the past!" Emperor Mu shouted confidently.

Levi smiled and said, "Bring it on. Let me see the results of your cultivation!"

Emperor Mu grinned. Black hair appeared on his body, and he was covered in layers of pale golden scales.

Levi knew that this defensive skill was the Golden Horn Breathing Technique.

Judging from Emperor Mu's appearance, he should have cultivated the Golden Horn Breathing Technique to level 9 gaseous golden scale stage.

Levi sighed internally. The proficiency panel was excellent.

He started cultivating this technique much later than Emperor Mu. Moreover, he had to balance between the many breathing techniques and meditation arts of the wizards. The Golden Horn Breathing

Technique was just a passing lesson for him, yet his achievements in this breathing technique were already stronger than Emperor Mu's. Levi's Golden Horn Breathing Technique was already at level 10, and he would probably reach its maximum next year.

However, he naturally wouldn't show off in front of Emperor Mu. He only used his Black Snake Breathing Technique to fight against the latter!

"Bring it on!"

Emperor Mu jumped up high like an angry gorilla. He swung his fist high into the air and brought it down on Levi.

Levi didn't dodge, instead using his Black Snake Scale to tank Emperor Mu's attack.

Bang!

The two of them fought on the island. Smoke and dust filled the air as they fought from dusk to night.

Levi's damned special effect, Favored By The Night, automatically took effect again.

Levi's strength began to grow uncontrollably.

"I'm sorry, Emperor Mu. I can't help but become stronger with this effect," thought Levi to himself. His all-round physical fitness was getting stronger by the minute. As his strength increased, it became more

and more difficult for Emperor Mu to deal with Levi's attacks. Eventually, Emperor Mu was struck to the ground by Levi's iron fist and could not move.

"I lost again," Emperor Mu sighed.

Levi consoled, "However, you are much stronger than before."

"This is my ancestral Saint Ape Breathing Technique. Take it and use it. You can return it to me after you're done practicing it," said Emperor Mu.

"This is the Black Whale Breathing Technique, the breathing technique of the Montenegro Mountain family of the Emerald Kingdom. It is comparable to your Saint Ape Breathing Technique," said Levi.

"Thanks." Emperor Mu put it away and lay on the ground, panting. Levi was also lying on the ground, staring at the starry night.

He had made a copy of all the breathing technique inheritance diagrams he had obtained. He kept the copies in a special storage bag. If he wanted to establish his own faction or family in the future, these breathing techniques might come in handy.

"I really envy you. Not only are you stronger than me in the path of knights, but you are also far stronger than me in the path of wizards," lamented Emperor Mil.

"There's no need to be envious of me. I just had some fortuitous encounters. Everyone has their own opportunities. With your strength, you will go down in the annals of history as a top-notch legendary knight. I reckon that even the Blood Knight might not be a match for you." Levi suddenly thought of Anderson in the human world.

"I'm still far inferior to him. The Blood Knight is unfathomable, and I can't compare to him. However, one day, I will definitely surpass him," Emperor Mu said. He had the Golden Spine Bone, which was a true treasure. As long as he could study it thoroughly, he might be able to truly stimulate the power of the Golden Bloodline. By then, he might even surpass Levi!

"Captain, when I have enough capital in a few years, I will leave the Realm of Azure Cloud. This place isn't suitable for me. I want to go to the Realm of Life," informed Emperor Mu.

"The Realm of Life? Are you trying to comprehend the mysteries of the Golden Bloodline? Or are you planning to learn more breathing techniques?" Levi asked.

Emperor Mu nodded and replied, "I have reached the end of the path of a legendary knight. What lies ahead is unfathomable for me with my current level of comprehension. I want to make myself as strong as possible first. My only option is to learn more breathing techniques."

"The path of wizards is also a good choice. Although the talent of the Children of Chaos is limited, there are still some ways for you to advance to an official wizard," Levi suggested.

"I know, but I realized that I might still prefer knights. Only this kind of physical battle can make my blood boil and give me the satisfaction I crave," Emperor Mu explained.

"Alright then. If you need any help, you can let me know," Levi offered.

Everyone had their own aspirations, and there was no problem with Emperor Mu's idea. Perhaps joining the Life School of Thought was the only way out of his current predicament.

However, entering the Realm of Life from this realm was expensive. Even with Levi's current wealth, he could barely make a round trip.

Although Emperor Mu was a legendary knight, it was still difficult for him to accumulate many Aether Stones and safely enter the Realm of Life.

After all, the laws of the Pan-Plane Wizard Council only protected official wizards, not legendary knights.

Levi could only wish Emperor Mu the best.

Emperor Mu said, "Oh right, Leader, I heard from Sage Mason that there is a powerful Fifth-Circle Wizard in the Star Sea. Her name is Flower Witch Elena.

She also has another title, the Flower Knight. It's a pity that she's too powerful.

Otherwise, we could have recruited her into our Twilight Knights.."
