

## Wizard 409

### Chapter 409: A Breathing Technique That Surpasses Legendary! (1)

After pushing the Golden Horn Breathing Technique to its maximum, Levi did not immediately start assembling and mutating it with the Black Snake Breathing Technique.

He spent a few days adjusting his condition to its peak. This was the first time Levi had broken through the limits of a legendary-grade breathing technique. He did not know what would happen next, so he could not help but feel a little nervous.

On Black Fire Island, the Swordsman Mantises patrolled around the clock. The Seven Generals of the Living-dead Family hid in the dark, ready to deal a fatal blow to intruders. The Poison Fire Bone Snake, Igor, also guarded the island from his cave. Traces of colorless and invisible energy crisscrossed and surrounded Levi's cave. Once an intruder broke in, an alarm would be triggered.

Black Fire Island was now impregnable. In this region, no one could trespass onto the island aside from the Second-Circle Wizards from the large organizations.

With such thorough preparations, Levi took a deep breath and assembled the Black Snake Breathing Technique and the Golden Horn Breathing Technique in his cave.

Breaking through the limit of a level 11 breathing technique required 10 points. Maxing out a level 11 breathing technique contributed 8 points. Therefore, Levi needed an additional 2 points to aid in assembling the two breathing techniques. Fortunately, Levi had prepared beforehand and learned a basic defensive breathing technique to its maximum of level 5, which provided him with just enough points for this assembly.

"Let's begin!"

Levi focused internally. The majestic Black Snake with a Candle and the domineering Golden Horn Beast began to clash.

As soon as they clashed, Levi could sense that the Black Snake was slightly inferior to the Golden Horn Beast. It was at a disadvantage right from the start.

After all, the Black Snake Breathing Technique was once a breathing technique at the maximum of level 9

Thus, although they were both legends, the Black Snake's original level was not as high as the Golden Horn Beast's.

Levi was mentally prepared for this from the start. He looked at the Black Snake, which was constantly at a disadvantage, and sighed. The Golden Horn Beast would be the dominant of this assembly.

The Golden Horn Beast quickly pressed the Black Snake to the ground. It flapped its wings as if announcing its victory. The Black Snake coiled its body around the Golden Horn Beast, binding it tightly.

This was the first time Levi had experienced such an intense assembly. Deep down, he hoped that the Black Snake would win. After all, this was a breathing technique passed down from his ancestors, and it had grown stronger with him. In Levi's opinion, the Black Snake Breathing Technique had always been on par with the Golden Horn Breathing Technique. However, from the looks of it, even though Levi had forcefully broken through its limit to level 11 with his proficiency panel, the Black Snake was still slightly inferior when assembling.

"Oh well, I'll take whatever I get."

At this point, he had to break through the limits no matter what, so Levi was not concerned about which side emerged victorious. Anyway, with the proficiency panel, this mutation should be successful. As for what type of mutation came from, he had no control over it.

This assembly lasted for an exceptionally long time. The assembly of the Night Owl and the Man-Faced Spider could not be compared to it.

The mutation only ended on the third day.

Levi peered inside of himself. The Black Snake and Golden Horn Beast had disappeared entirely!

In its place was a gigantic object that surpassed the Seeds of other breathing techniques. It coiled around Levi's heart.

This giant had a slender and powerful snake body. Its entire body was covered in black-gold scales interlaced with gold and iron. The pair of golden dragon wings on its back covered the sky. Its head was still the same as that of a Black Snake, but a single horn shone with golden light on its forehead. When the giant snake extended its golden tongue, a candle could be seen burning with golden candlelight. The eyes of this giant were emitting a faint golden light, and it was majestic.

Looking at the new Life Seed, Levi had a strange expression. He muttered,

"Why does it feel like a hybrid between an eastern and western dragon?"

Levi opened his proficiency panel to see what changes had happened to the Black Snake Breathing Technique and Golden Horn Breathing Technique.

[Levi]

[Golden Snake Breathing Technique: Rank 11 (1/300000). Special Effect: Black Gold Scale (Solid State), Dragon's Intimidation]

[Black Gold Scale: A black scale formed by combining the characteristics of the Black Snake with a Candle and the Golden Horn Beast. It has extremely high defense.]

"The introduction is simplistic and very general. It's still written in the same tone as before." Levi could not help but complain.

As for how high extremely high defense was, the proficiency panel did not specify. Levi had to test it himself.

He turned his attention to the second special effect unique to this assembly.

[Dragon's Intimidation: You have obtained the power of Dragon's Intimidation that only dragons above the sub-dragon species have. Consume a certain amount of spiritual force to perform Dragon's Intimidation once. All dragon hybrids below the sub-dragon species will be affected by Dragon's Intimidation to a certain extent. All existences with weaker spiritual force than yours will also be

affected by it. This special effect cannot be upgraded, but it will increase as the purity of your dragon bloodline increases.]

"My defensive breathing technique finally has a second special effect. It's not easy to get to this stage.. However. Why does this special effect feel like the Seal

Of Dragon Might? Could it be that the Winchester Family is also a descendant of the Dragon Clan?"
