Chapter 410: A Breathing Technique That Surpasses Legendary! (2)

Levi did not use the Seal of Dragon's Might much after maxing it out. He only occasionally used the special effect of Dragon Affinity to tame beasts. Now, it seemed that Levi's previous suspicions were correct. The Black Snake with a

Candle and the Golden Horn Beast were both dragon creatures, but the Golden Horn Beast was slightly higher.

These two breathing techniques had become the new Golden Snake Breathing

Technique. Levi's future evolution direction was no longer just the Black Snake Breathing Technique or Golden Horn Breathing Technique but a whole new path of evolution.

Although the name Golden Snake did not imply that it was of the Dragon Clan, a Golden Snake should be stronger than a Hunchback Dragon. Dragons were mighty, but there were still some powerful snake rulers in the

Multidimensional Plane that were not inferior to dragons at all.

In the future, Levi's evolution did not necessarily have to move towards the Dragon Clan. Instead, he had to combine the advantages of the Dragon Clan and other powerful existences to create a perfect, all-rounded, extraordinary existence with no shortcomings!

This was the path that Kars from JOJO dreamed of – becoming an ultimate creature!

Levi analyzed, “Although this Dragon’s Intimidation special effect was part of the breathing technique, it’s apparent that it is a pure mental attack type skill. However, this mental attack doesn’t come from a spell but from the trace of the dragon bloodline in my body. If used well, it should be able to play a significant role in battle. So far, it’s equivalent to the low-level Conqueror’s Haki.”

After studying the newly mutated breathing technique, Levi touched the golden horn on his head and stuck out the Golden Snake tongue in his mouth.

"The Golden Horn and the Black Snake’s tongue are still here, but the Black Snake’s tongue has now been renamed the Golden Snake’s tongue." Levi heaved a sigh of relief.

The snake’s tongue was very important to Levi. He could not lose it. Even though the breathing techniques had mutated, these supernatural organs still existed. The mutated Golden Snake had perfectly inherited these two supernatural organs from the Black Snake and the Golden Horn Beast.

"Now, I have to test the defense of the Black Gold Scale. It should be stronger than the pure Black Scale and Golden Scale. Otherwise, this mutation would have been a waste," Levi muttered.

Levi focused his will, and a black gold gas emanated from his legs and condensed into hideous scales that shone with light. These scales were a little rougher than the black scales from before. They were less dense, but it was obvious that their defense was stronger.

Without hesitation, Levi took the Poseidon Trident and stabbed it at his calf with the power of the Golden Revolving Slash.

Such an attack could break all levels of First-Ring Spell defenses except for Grade A defense.

Clang.

Sparks flew in all directions, and the crisp sound of metal colliding echoed in the cave abode.

Levi watched as the Revolving Force stubbornly attached to the Black Gold

Scales slowly dissipated. The Black Gold Scales were also forcefully pierced by the Revolving Force, leaving a small bloody hole in Levi's leg. However, the bloody hole quickly healed and disappeared after a few minutes. This level of injury was like a needle prick for Levi.

"It took the Revolving Force so long to penetrate the Black Gold Scale, so it's indeed stronger than the Black Scale. However, this test is inconclusive because I didn't use my full strength. I need to continue testing."

He then covered his entire body with Black Gold Scales and had the living dead Kane cast a fireball. Without any hesitation, the latter bombarded Levi with a fireball.

Boom!

Flames soared into the sky as the fireball exploded.

Levi was enveloped in raging flames, yet he emerged unscathed. He shook his body and dusted the flames off him. After the flames dissipated, the Black Gold Scales were only slightly charred. A small portion of the scales had cracked from the force of the explosion, but it was not a big deal. The attack posed no threat to Levi's safety at all.

"A fireball with Grade B attack power cannot break through my Black Gold Scale. I wonder if it can block the attack of a Second-Ring Spell."

Although Levi wanted to experiment further, he wouldn't throw his life away battling a Second-Circle Wizard, so he could only give up for now.

Although they were both at level 11, the Black Gold Scale's defense was definitely stronger than the Solid State Black Scale.

The Solid State Black Scale was almost as strong as a Grade A first-ring defensive spell. This Black Gold Scale should be at least Grade A+ or Grade S.

However, Levi could not test whether the Black Gold Scales could block an ordinary Second-Ring Spell attack. He felt it should be able to do so for a short time.

Levi muttered, "Although it's good that the breathing techniques mutated and assembled, it also means that I need to adjust the secret medicine."

He continued, "When my Golden Snake Breathing Technique reaches the maximum of level 12, it will be time for me to break through the shackles of a legendary knight. I wonder what kind of changes will happen after level 12."

No matter what, he was probably the only person who had created a breathing technique that surpassed the legendary grade so far. It could also be considered a new chapter in the path of knights.

After the birth of the Golden Snake, Levi tried to cultivate the Golden Snake Breathing Technique without using any secret medicine. Sadly, he discovered that his cultivation speed was extremely slow.. Even with the proficiency panel, if he did not rely on the secret medicine and continued cultivating other skills simultaneously, it would take at least 15 years to advance the level 11 Golden Snake Breathing Technique to level 12!
