

Wizard 413

Chapter 413: Surpassing Legendary Rank! (5)

This was similar to channeling himself.

The reason why Levi had learned Nature's Secret Language was mainly to tame some extraordinary creatures to be used as a drug primer.

Levi's taming methods were definitely not as gentle as the shamans of the School of Spiritualism. He would directly beat them half-crippled before capturing them alive and bringing them home to slowly train them...

Levi believed that as long as one had a similar level of intelligence and was afraid of death, there would be no supernatural creature in this world that could not be tamed with one's fists. If there was, it would be because one's fists were not hard enough.

With the special effect of [Nature's Heart] , Levi's speed of cultivating Nature's Secret Language was not slow.

Three months later, in the year 1032 of the Holy Brilliance Calendar, the Month of Vitality, Levi raised this spell to Level 4.

Levi-

[Nature's Secret Language: Level 4 (2567/20000)] Nature's Heart.]

A Level 4 Nature's Secret Language could form a contract with a first-circle transcendent creature and a first-circle Nature's Secret Language could at most form a contract with two first-circle transcendent creatures. However, it should be after reaching the peak of level 5.

"From the looks of it, the early stage of the School of Spiritualism is actually quite good. After all, I could control two first-circle spirit beasts with one soul ring. However, under normal circumstances, extraordinary creatures of the same realm were not a match for wizards. After all, the natural spell-like abilities of extraordinary creatures were too few compared to the spells that wizards mastered."

Of course, if one wanted to truly unleash the power of a Spiritual Beast, it was best to start training it from a young age and personally nurture it. Furthermore, one would need to master all kinds of special meditation techniques and support spells from the School of Spiritualism. This would increase the various attributes and combat power of the Spiritual Beast, allowing the Spiritual Wizard and the Spiritual Beast to form perfect cooperation. However, Levi did not have any of these.

"Although I'm at the fourth level of Nature's Secret Language, I don't have a transcendent creature right now."

Levi felt helpless.

Levi ended his closed-door cultivation and went to the herbal field on Fire Dragon Peak. Currently, the seedlings of the herbs in the herbal field were growing healthily. However, these herbs generally needed more than ten years to mature, so they could not be harvested for the time being.

The Swordsman Mantis and mantises patrolled the herbal field without complaint. The corpses of some seabirds were everywhere around the herbal field, turning into fertilizer to nourish the land. These were the medicinal thieves who had been shot down by the Swordsman Mantis.

Seeing that nothing had happened in the herbal field, Levi checked the magic circles he had set up all over the island. After confirming that there were no problems, he went to the living room of his cave abode and picked up the newspaper sent by the Pan-Plane Wizard Council some time ago. Then, he used his mental power to check on the major events that had happened recently.

[A wizard said that he encountered an “experimental subject” that Ms. Rollin had escaped from the laboratory some time ago. Ms. Rollin had sent her assistant wizards to the Realm of Azure Cloud to capture and contain the experimental subject. I would like to ask the wizards of the Realm of Azure Cloud to be careful when they go out in the near future. If you encounter this experimental subject, please contact the parliament in time. Do not capture it yourself, or you will bear the consequences.]
“Why are we in the Realm of Azure Cloud?”

Levi had a bad feeling.

Ms. Rollin was a ninth-circle Grand Wizard from the Life School of Thought. If an “experimental subject” created by a powerhouse like her escaped to the Realm of Azure Cloud, it could be a disaster.

Levi did not pay attention to this news at first, nor did he look at the picture of the experimental subject. Now that the experimental subject had escaped to the Realm of Azure Cloud, he had to take a look, in case he did not know he had met it and then foolishly went up to seek death.

He looked at the picture of the experimental subject and realized that it was a tree...

"What the hell? Trees can run away in this day and age? However, this was the Wizard World, so it was normal."

This tree looked like a Christmas tree. It was covered with fruits of various colors and shapes. There were human-shaped fruits, beasts, birds, and everything else.

These fruits were tender and juicy, and their color was full. It made people want to have a taste, and it also made Levi inexplicably think of the Ginseng Fruits from his previous life.

"Yes, if we meet this tree in the future, we must take a detour."

Levi memorized the tree in his mind. The Realm of Azure Cloud was so big that the probability of him encountering this tree was almost zero, so he did not take it to heart.

[The Black Sun Steeple and the Boiling Beast Blood have recently joined forces to raid the Abyss City, the Deep Sea Prison. Even though the warden stopped them in time, there were still many dark wizard prisoners who escaped from Abyss City. All wizard organizations in the Endless Sea are requested to make preparations for protection and reduce unnecessary travel. Under the premise of ensuring your own safety, fight against the dark wizard forces to the end! Anyone who kills the dark wizard fugitives mentioned above can use proof to receive double the reward from the Star Tower!]

Levi muttered with a complicated expression, "Troubled times."

The Black Sun Steeple and the Boiling Beast Blood were two famous dark wizard organizations in the Endless Sea. Levi knew that the leaders of these two organizations, "Black Sun Adam" and "Hundred Beast Berserk Witch", were high-level dark wizards from the Dark Faction and the Life Faction respectively. Levi did not know their specific strength. In short, they were powerful existences who could kill him with a glance. They were able to get away with it for many years under the law of the Pan-Plane Wizard Council. It was enough to show how powerful these two dark wizards were.

On the stone tablet were the names and characteristics of these fugitives, as well as the spiritual imprints they had collected when they were imprisoned. As long as he recorded these spiritual imprints, Levi could sense the spiritual fluctuations emitted by them if he encountered them in the future to determine their true identity. Then, he could choose to avoid them or take the opportunity to kill them. Otherwise, it would be impossible to find a dark wizard who was proficient in shapeshifting and disguising just by relying on a portrait..
