

Wizard 414

Chapter 414: Group Breaking Limit! (1)

After reading this issue of the newspaper, Levi silently returned to his cave abode and continued cultivating.

Levi was already prepared to break through the limits of the Red Lotus Breathing Technique. He had learned a lot of strength breathing techniques, so he was not worried about not being able to do so.

On a sunny afternoon, Levi injected 10 points into the Red Lotus Breathing Technique in his cave abode. On the proficiency panel, the Red Lotus Breathing Technique had also undergone some changes.

Levi-

[Red Lotus Breathing Technique: Level 11 (1/300000). Special Effect: Flame

Body (Solid), Red Lotus Blood.]

"I'm so disappointed that there's no third Special Effect."

The Red Lotus Breathing Technique's Limit Breaking was a fusion of the high-level and the low-level, so there was no problem of mutation. After breaking the limit of this breathing technique, other than being able to continue cultivating, it did not bring any other changes to Levi.

"As more and more Dragon Clan breathing techniques break through the limit, the demand for blood from mixed-blood dragon creatures above the First Ring will increase. I can't keep taking advantage of Leviathan and Jorman. I have to actively look for other mixed-blood dragon creatures."

Not only were there mixed dragon race creatures, but there were also extraordinary earth-type ape creatures, as well as Undying Bird Bloodline creatures with one ring and above, and whale bloodline extraordinary creatures. All of these required Levi to prepare in the future, so as to facilitate the subsequent cultivation of the Six Dimensional Breathing Technique.

Then, Levi rested for a while to adjust his mental power and condition. He then struck while the iron was hot and broke the limit of the Blood Beast Breathing Technique, which could also break the limit.

Levi-

[Blood Beast Breathing Technique: Level 11 (1/300000). Special Effect: Blood Wings (Solid), Blood Contract, Thousand Faces.]

Just like the Red Lotus Breathing Technique, the Blood Beast Breathing Technique's breakthrough was very calm. There was no difference, and there was no third Special Effect.

Levi was completely clueless about the specific conditions to activate the Special Effect. At that moment, he concluded that there were three possibilities.

The first was that the breathing technique was born naturally, such as "Red

Lotus Blood” and “Bone Shrinking Transformation.”

The second was the fusion or mutation of breathing techniques, such as

“Thousand Faces” and “Dragon’s Intimidation.”

The third was something even more illusory, similar to the birth of a Blood Contract.

Although there was no third Special Effect, Levi was not disappointed. The Special Effects he had now were more than enough to use.

“The Blood Beast’s secret medicine also needs to be improved and iterated. In

The future, the blood of the Blood Clan members needed to refine the Level 1

Blood Beast secret medicine may have to be obtained from the human world. After all, the human world is currently experiencing the disaster of the Blood

Clan.”

The main ingredient of the Blood Beast's secret medicine that Levi had used before was originally from a mortal animal called the Bloodthirsty Bat. Later on, after Andrew was born, Levi changed the main ingredient to Andrew's blood. Therefore, the cultivation of the Blood Beast Breathing Technique advanced by leaps and bounds and soon reached its limit.

But now that the Blood Beast Breathing Technique had broken through its limit, Andrew's secondary Blood Breed bloodline was obviously not enough. Levi tried it out, and the old version of the Blood Beast's secret medicine was better than nothing in terms of increasing his cultivation speed.

As for Knight Anderson, the effects of his blood might be slightly better than Anderson's, but it was definitely limited. They were both secondary Blood Clan members, so the effects were not much different. Anderson was stronger than Andrew not because of his Blood Clan bloodline, but because of his Legendary Knight cultivation.

With Levi's current Blood Beast realm, if he wanted to refine a real transcendent level 1 Blood Beast secret medicine, he would have to refine it with the original blood of the Primary Blood Clan members.

As for the Primary Blood Clan members, they were basically hard to find in the current Wizard World.

After all, they were not stupid. They could comfortably be the ancestors in the human world and treat mortals as food. Then, they could change their appearance at will and get away with it.

However, in the wizard World, even if official wizards were not everywhere, there were still quite a few of them. Any one of them could at least fight with the Primary Blood Clan members.

If they encountered a stronger one, they would be captured and brought back for experiments. This was the most terrifying thing for the Primary Blood Clan members.

Because these wizards would not kill them or let them commit suicide, they could not be reborn in the Blood River.

They could only become slaves to the wizards forever until the long life of the Primary Blood Clan came to an end. They would die of old age or torture the wizards to death.

After the Primary Blood Clan members died of old age, they would truly die. Their souls would forever sleep in the endless Blood River and become a part of it, unable to be reborn.

Therefore, if Levi wanted to capture Primary Blood Clan members alive, he would probably have to make a trip to the human world. He planned to do all of this after he advanced into a first-circle veteran wizard, or after he had reached the twelfth rank of the Golden Snake Breathing Technique. Of course, he would need enough money.

He had been in the Wizard World for more than ten years, and he needed to return to the human world. Other than the Primary Blood Clan members, there were many other problems that needed to be resolved.

It was obviously not worth it to waste 4,000 Aether Stones on two round-trip tickets just for the Blood Clan.

After the Red Lotus and Blood Beast Breathing Technique, among the remaining legendary breathing techniques, the Undying Bird Breathing Technique could not break through the limit due to insufficient

points. Therefore, the only breathing technique that could break through the limit was the Black Whale Breathing Technique, which was also at the peak of Level 11.

After resting for a while, Levi followed suit and broke through the limits of the Black Whale Breathing Technique.
