

Wizard 415

Chapter 415: Group Breaking Limit! (2)

As a result, Levi's breathing technique was in a good state.

The Golden Snake, Red Lotus, Blood Beast, and Black Whale all broke through the limit of level 11 and slowly moved toward level 12.

As for Ostrich Mountain and Giant, they were getting closer and closer to the peak of the eleventh level.

As for the remaining Undying Bird, Hunchback Dragon, and Human-Faced Owl, these three major dimensional breathing techniques were temporarily unable to break through the limits.

The Saint Ape was the worst. Due to the lack of secret medicine, Levi had never cultivated.

For a long period of time, Levi's main task was to prepare all these Transcendent Exotic Potions for the breathing technique so that his breathing technique cultivation speed could catch up.

At the end of the Month of Vitality, Levi had a group of living dead and bone Igor watch the house while he rode the Dragon King Whale towards the Gray Tower.

He had to go back to class tomorrow because he had a Pharmacist class. He could also take a look at the recent situation in the tower and get a blueprint for a first-circle alchemical creature from the tower master.

Because he was worried that there would be dark wizards coming out of Abyss

City to rob him, Levi was very careful along the way. He basically stayed in Leviathan's mouth and advanced in the deep sea area. This was the benefit of having the Black Whale's Lungs. Levi was equivalent to half of the Sea Clan, swimming in the sea with Leviathan.

The next day, Levi arrived at the Grey Tower safely.

It had been a month since he had come, but everything in the tower was as usual.

After arriving at the Gray Tower, Levi first went to Manla's shop. Manla saw Levi and could not help but smile, "What a rare guest. From the looks of it, your cultivation must have improved recently."

"It's alright, I've gained something. Manla, do you have any clues about the formula of the meditation supplementary potion?" Levi asked.

Manla shook his head, "I've asked around for you. There are too few of them. I suspect that the meditation supplementary potion formula you want is not even in this sea area. After all, even a second-circle pharmacist like Granny Marlene doesn't have it. How can anyone else have it?"

Levi couldn't help but sigh, "You are right."

For many official wizards, it was already good enough to have a meditation supplementary potion like the Sandman Potion to increase their cultivation speed by 10%. They did not dare to ask for a better potion.

"However, I've helped you find clues about the extraordinary ape creature you wanted," Manla suddenly changed the topic and smiled.

"Oh? Tell me." Because he did not have any secret medicine, the Saint Ape

Breathing Technique had not yet taken off, so Levi paid special attention to it.

"I heard from a material supplier that there's a first-circle extraordinary creature called the [Red Sand Ape] in the [Yellow Earth Continent] of Area 7 of the Outer Ring Sea. This creature has great strength and thick skin, and it lives in the desert of the [Sea of Quicksand]. If you want to go there, I can find you a guide who's familiar with the situation and routes there," Manla said.

The Yellow Earth Continent was actually an island in the Endless Sea. Wizards called it the Yellow Earth Island. However, this island was too big. Its area could be ranked in the top ten in the entire Endless Sea. It was about the same size as a mortal country. Many mortals who lived on it called it the Yellow Earth Continent.

Levi thought about it and decided that it would not be too late to go after he had advanced to become a first-circle veteran wizard and mastered the Big Fireball Technique and the Body of Ghost Fire. In any case, it seemed that there should be a group of Red Sand Apes living there, so it would not go extinct in a short period of time.

"Thank you, Manla. I won't go now. I'll contact you when I go, old friend," Levi patted Manla on the shoulder and chatted with him about the recent market situation of various materials. In this aspect, Manla was definitely an expert.

Levi also learned that Manla's daughter, Dora, was doing quite well at Sighing Sea Breeze and was now a mid-level apprentice wizard. This gave Manla hope for her life. He worked even harder to save money so that his daughter could go further on the path of a wizard. If she could become an official wizard like Levi and stay in the Sighing Sea Breeze as a teacher, Manla would die without regrets.

After exchanging pleasantries, Levi left behind a piece of Aether Stone and left Manla's store.

When she heard that Levi had returned to the tower, Marlene immediately asked Winnie to call Levi to her room.

Levi saw that Ms. Marlene was in good condition and was in high spirits.

"Not bad, I can feel that your spiritual power is getting closer and closer to that of an experienced wizard," Marlene smiled.

"Junior Brother Levi, what's your current spiritual energy level?" Winnie asked.

"I'm 27 now. What about you, senior sister?" Levi smiled.

When Winnie heard this, she said with a dejected expression, "I only have 23 points. I clearly advanced to the first ring earlier than you, junior brother. How could I be surpassed by you?" Winnie felt that she might have a fake triple affinity. She was not even as good as Levi, who was one of the Children of Chaos.

"Don't forget, I'm an official pharmacist. If Winnie wants to be like me, you can come to me to buy potions," Levi joked.

"Forget it. I'm a poor man. I can't compare to a rich pharmacist like you," Winnie shrugged and said helplessly.

"Winnie, if you worked as hard as Levi, you wouldn't have fallen so far behind," Ms. Marlene suddenly said.

"Granny Marlene, but I feel like I've already worked very hard," Winnie pouted.

"It's far from enough. Levi doesn't leave his house all day, he just stays at home and cultivates. He'll go into seclusion for ten days to half a month. Can you do the same?" Marlene asked..
