

## Wizard 419

Chapter 419: Legendary Giant, Each Wisp of Breath Turns into an Arrow! (1)

It was the year 1032 in the Holy Brilliance Calendar, Month of Harvest.

In the human world, in the Emerald Kingdom, Flower City, a man wearing a gold mask placed a rough but extremely well-made armor in front of the staff of Shining Tavern.

The tavern staff asked, "Golden Warhammer Master, is this your new work?"

The muscular man with the golden mask nodded, "That's right."

The staff member said, "Alright, Master. We'll arrange the auction immediately. In addition, Master, there's something I have to tell you." The golden-masked man said calmly, "Tell me."

"The Lord of the Northern Icewind Territory, the Earl of Silver Mountain, wants to contact you through us. I don't know..." The staff member said with some difficulty.

The golden-masked man said without hesitation, "No problem."

"Yes, Master. We will inform the Earl of Silver Mountain." The staff member left the place as if he had been granted amnesty.

In front of this Golden Warhammer Master, he felt like a lonely boat that could be drowned at any time by the aura of a powerhouse.

"Earl of Silver Mountain? Why was he looking for the Golden Warhammer?" Andrew muttered to himself as he quietly returned to the Black Snake Castle.

The Golden Warhammer was Andrew's transformation. When Levi left the human world, in order not to waste the status of the Golden Warhammer Vest, he had prepared dozens of armor and weapons for Andrew. He asked Andrew to go to the Shining Tavern to auction one every one or two years.

Therefore, even though Levi had left the human world for more than ten years, the name of the Golden Warhammer was still passed down in the human world.

The chess game in the castle was empty. There was no one playing chess. Since the disasters of the Blood Clan became more frequent, there were more rumors about vampires in the human world. There were constant incidents of vampires attacking humans. It was not only the Emerald Kingdom but also the other six countries.

This was undoubtedly something Anderson did not want to encounter. He bid farewell to Andrew and began his long journey through the Seven Kingdoms. The former Blood Knight Brad was now Anderson, and it was hard for him to change his old habits. He still wanted to try to save some pitiful people in this suffering world, get rid of the evil in front of him, and do the good in front of him. That was all.

On the other hand, Anderson was also looking for other legendary knights. Just as Levi had thought, he wanted to establish a Twilight Knight legion made up of legendary knights. This way, everyone could interact with each other, and perhaps it would be helpful in breaking through to the Legendary stage.

After Anderson left, Andrew lived alone in Black Snake Castle, completing the mission that Levi had given him.

Three days later, at the Shining Tavern in Icewind City, Andrew saw the slim Earl of Silver Mountain in the box.

The Earl of Silver Mountain had a head full of silver hair, and his face was more weathered than before. In the long Blue Frost Calamity, this Earl had experienced too many things for his family and people.

"Master, long time no see," he sighed.

"Earl, why are you looking for me?" Andrew asked.

"Master, do you remember me saying that our Silver Mountain Clan's breathing technique is also of perfect quality?" he asked.

"Yes," Andrew said calmly.

"Due to some reasons, I don't have much time left. I won't keep you in suspense. I want to use half of our family's wealth and even our family's breathing technique to ask you to do something." "What is it?"

"Bless my heir, my son, for twenty years... Ahem."

The Earl of Silver Mountain suddenly coughed.

"Your heir?"

Andrew could not help but recall the information about the Earl of Silver Mountain. The Earl of Silver Mountain liked men, so he did not marry in his early years. It was not until he was middle-aged that he was forced by the pressure of the family inheritance to marry the daughter of an old earl and give birth to a son. If he counted according to the time, this child might just be 20 years old and was still a young man.

Andrew thought for a moment and felt that the Earl of Silver Mountain was worried that his family would not be able to withstand the pressure from all sides without a grand knight after his death. Therefore, he used his ancestral breathing technique and wealth as a reward to let Golden Warhammer protect his heir for 20 years, so that his son, who was only a Quasi-Knight now, could develop and become a real grand knight.

"Why is the Earl looking for me?" Andrew asked.

"I believe in your strength. Most importantly, I believe in your character," he responded firmly.

"Give me some time to think about it," Andrew's heart was calm. He planned to write a letter to ask for his master's opinion. He also wanted to mail some things.

The Earl of Silver Mountain thanked him sincerely, "Alright, thank you for coming despite your busy schedule."

After returning to Flower City, Andrew started writing letters. Ever since Levi became rich, he had Anderson write to him every year to report on the situation and send him the breathing technique.

In Area 9 of Realm of Azure Cloud, on Black Fire Island, Levi was counting his recent business gains.

"Seven thousand Aether Stones."

Levi heaved a sigh of relief. In the past few months, he had earned more than 3,000 Aether Stones by selling arrays and alchemical creatures. Adding on his previous savings, he had reached the 7,000 Aether Stones mark.

Among them, the best seller was the [Spider Web Alert] magic circle. After Levi's reputation and fame gradually spread, many official wizards from nearby wizard organizations came to Levi to buy the array.

On the other hand, the sales of [Cloud Mist] were not as good as Levi had imagined. He had conducted a private market survey and found that most apprentice wizards could not afford to buy such a thing. Although some official wizards could afford it, they were used to taking advantage of the free labor of apprentice wizards. They gave up the idea of buying the Cloud Mist arrays..
