

## **Wizard 430**

Chapter 430: Unpredictable Human Hearts, City Destroying Battle, Certification Successful! (1)

The next day, Levi, who had spent the night cultivating in the inn, opened the window and enjoyed the sea breeze.

From time to time, streaks of light flew across the sky.

According to Levi's rough perception, although the Hot Wind Harbor Wizard Alliance claimed that they had 20 official wizards, there were at least 30 official wizards living in Hot Wind City.

Hot Wind City itself was a place similar to the Blacksail Wizard Market, so it was normal for many nomadic wizards to live here.

Unlike the wizard organizations in Area 9 which had the ideal of "double super and multiple strong", there was only one absolute overlord in Area 8, and that was the Hot Wind Harbor Wizard Alliance.

Other than this third-circle organization, there were only a few second-circle organizations. The others were all "peacefully" swallowed up by the rapidly expanding Hot Wind Harbor Wizard Alliance while the latter relied on its well-known pharmaceutical and weapon-making abilities to create huge profits.

Coupled with the prestige of the two third-circle wizards, many small organizations could not resist the pressure and chose to compromise. This was because the official wizards of their organizations were almost all poached by the Hot Wind Harbor Wizard Alliance, making even normal teaching a problem. Although such an act was somewhat shameless to many wizard organizations, it did not violate the laws of the Pan-Plane Wizard Council, so no one dared to say anything.

It was said that the Master of Flames was a very ambitious third-circle wizard. He had been in the third circle for a hundred years and was now three hundred years old. He was abnormally strong and could be said to be the strongest in Area 8. His goal was to merge the entire Area 8 into the Hot Wind Harbor Wizard Alliance and make the Tower of Flames the absolute ruler of this sea area.

In Levi's opinion, those who could do such things in remote areas like this must have connections and backgrounds in the Star Tower, just like Morpheus. The reason why they were so unscrupulous was that they had the support of the mysterious five-circle powerhouse.

To be honest, Levi did not have a good impression of the Burning Faction. So far, he had met two official wizards from the Burning Faction, Kane and Terell, who were both not good people.

Perhaps it was because the Meditation Art they cultivated was of the fire element, but the wizards of the Burning Faction were generally more radical. They were easily provoked and angered, and they would easily attack at any slight disagreement. They were the type that would not talk if they could fight.

Of course, it was also possible that the Burning Faction's wizards were getting too arrogant because Blazing Sun God Wizard Edmund was the current Grand Council Chairman.

There were still two days left before the pharmacist certification assessment.

Levi currently had 10,000 Aether Stones on him, so he planned to walk around Hot Wind City and see if he could buy anything he wanted. Of course, he would only buy some cheap things. He had to save the Aether Stones to buy potion formulas at the Haitian Wizard Festival.

As he strolled around, Levi arrived at a small shop.

"Doug's Wizard Tool Store. So this guy opened a Wizard Tool shop here."

Levi thought of that Doug who had struck up a conversation with him yesterday, and his heart skipped a beat.

The shop was closed, otherwise, he would have liked to go in and check out the prices of Wizard Tools and understand the market situation in Area 8.

After that, Levi quickly browsed through all the shops in Hot Wind City and returned to his hotel in satisfaction.

"To think I found an endurance-type breathing technique."

Levi took out an inheritance diagram of the Mountain Wolf Breathing Technique. It was a basic breathing technique that he had found in an antique shop.

The Mountain Wolf Breathing Technique could be cultivated to the limit of level 5. Although it was very trashy, it had a limit breaking point of 2 points.

Endurance-type breathing techniques were too rare. The more, the better.

Apart from that, Levi did not find any potion formulas, which was within his expectations.

At night, Levi cultivated the Golden Snake Breathing Technique in the hotel. Of course, he was not completely relaxed as his Spider Sensing had been giving him a slight warning today. This was not a good sign. Either someone in Hot Wind City wanted to harm him or some of his enemies were cursing him from far away.

The golden snake's forked tongue flicked while the Advanced Perception was also activated. After all, this was a foreign land, so it was always better to be more cautious.

[Golden Snake Breathing Technique Proficiency +56]

By the time Levi finished his cultivation, it was already late at night.

When he opened his eyes, his expression suddenly changed.

Through the snake tongue's perception, he sensed a familiar aura approaching the hotel. Beside this aura was another unfamiliar aura. It seemed to be a first-circle wizard.

"Doug."

Although they were heading over, he was not sure if they were heading toward him or someone else.

"Don't worry about things that have nothing to do with me," Levi muttered to himself.

He carefully recalled that since he came to this place, he had never provoked the other party, nor had he ever been involved in any trouble. Therefore, he felt that he was overthinking.

Unfortunately, as the Spider Sensing's warning became stronger and stronger, Levi knew – there was a high chance that those two were here for him and they were hostile!

Levi immediately left the hotel with the principle that it was better to avoid trouble.

At the same time, it was to determine if Doug was here for him. With that, he left the hotel and quickly disappeared into the sea..
