

Wizard 439

Chapter 439: Advancing to Senior First-Circle! (4)

"There is mail for Mr. Levi Schneider. Please receive it," The wizard said loudly.

Levi was about to leave when he stopped abruptly.

"Ms. Marlene, Winnie, please wait for a moment. I'll go take a look," Levi said.

"Go, there's no hurry." Marlene waved her hand and told Levi to go over quickly. The two ladies went to wait for him by the shore with Leviathan.

Levi returned to the reception room and took the storage bag from the messenger. The messenger transformed into an albatross and left.

There were two types of messengers in the Owlery. The albatrosses delivered domestic mail, and all of them were wizards. The owls delivered cross-border mail, and all of them were witches, such as Eve.

Therefore, Levi knew that this wasn't something Andrew had sent him. This made him quite curious. Those who had a good relationship with him in the Azure Realm were all in the Gray Tower. There shouldn't be anyone in the other regions who would send him things, right?

Levi carefully opened the storage bag. He was not worried that there would be dangerous items inside, because dangerous items could not pass the inspection of the Owlery.

After opening the storage pouch, he saw a small pouch full of Aether Stones. Even Levi, who now had 20,000 Aether Stones, could not help but gasp.

"Ten thousand Aether Stones? Who sent it? Did they send it to the wrong person?"

In the end, Levi found an exquisitely crafted golden envelope in the corner of the storage bag.

There was a majestic golden lion drawn on the envelope's cover. It was noble and dignified, and it seemed to belong to the Jostar Family. Levi opened the letter.

"My dear Lord Levi, greetings. Forgive me for not bringing enough Aether Stones last time. Other than a ship of goods I had just bought, I didn't have anything else then. I could only borrow 3,000 Aether Stones from the butler to express my gratitude. Just as I said, the Jostar Family will pay all grace. After I returned home and told my father Lyon about what I had experienced, the Old Golden Lion berated me and said that I was insensible. These 10,000 Aether Stones are a thank-you gift from me, my father, and the Jostar Family for saving my life. Please accept it. If you have time, do come to Lion King City on the Yellow Earth Continent as a guest. The Jostar Family is looking forward to your arrival."

It was signed by Dinos Jostar.

Levi was slightly stunned.

"This..."

To be honest, perhaps his poverty had limited his imagination, or perhaps it was because he had killed those dark wizards too easily, his previous actions were nothing to him.

After all, he had already taken the storage bags and bounties of the four dark wizards. If it were not for Dinos and the butler, it would have taken him a lot of effort to kill the remaining three dark wizards too.

Therefore, Levi did not think that 3,000 Aether Stones were too shabby as a thank-you gift. Rather, for most wizards in the outer circle sea area, it was a huge sum.

"Maybe this is the world of the rich... This kid is really thoughtful." Levi silently praised the other party, and his impression of the Jostar Family rose to another level.

As expected of the descendants of a Legendary Knight, they were really skilled in the way of humans.

Judging from the Legendary Knights that Levi had met so far, whether it was the Blood Knight or Emperor Mu, all of them seemed to have a certain quality that stood out. They really had the virtue of a knight which was very precious in this world. Perhaps it was because of these knight qualities that these Legendary Knights were formed.

"I haven't even sold Naga's Blessing, and I already have 30,000 Aether Stones. Life is full of surprises." Levi sighed in his heart. 30,000 Aether Stones was enough to buy a low-grade wizard ship.

He warned himself not to be arrogant, to increase income and reduce expenditure, and to use the money where he truly needed it. He already had

Leviathan, a transportation tool that consumed 100 pounds of meat for every 100 kilometers. Why would he need a wizard ship that wasted the Aether Stones?

Levi solemnly accepted the thank-you gift from the Jostar Family and went to regroup with Marlene and Winnie who were waiting by the coast. They sat on Leviathan and set off for the Haitian Wizard Festival.

The venue of the Haitian Wizard Festival was a deserted island in an uninhabited sea. This uninhabited sea was located at the edge of the uninhabited sea between Areas 8 and 9. Levi had crossed this sea before.

A third -circle array, the Heaven-defying Sea Curtain Array, had been set up on this deserted island now, specifically for the Haitian Wizard Festival. It was much more advanced than the Gray Tower's second-circle array. Unless a fourth-circle existence or multiple three-circle existences attacked, the array would not be breached.

Moreover, the sea beasts near this uninhabited sea area had been cleared in advance, so there was no need to worry about the risk of sea beasts.

After all, those who came to participate in the Haitian Wizard Festival were at least official wizards. Although there weren't many of them, their numbers still reached about a thousand. A thousand official Wizards was enough to crush all the forces in this sea area. Even an intermediate wizard would not gain any advantage here. Moreover, a few intermediate wizards had also come to participate in the event.

Three days after Levi and the others set off, they arrived at the venue of the

Haitian Wizard Festival. At this time, the festival had already started for a day.

On the deserted island, there was a blue array that covered an area of nearly

Ten miles. Various temporary buildings could be vaguely seen inside, just like an amusement park from his previous life.

"Third-circle array... How grand." Levi couldn't help but sigh. Even his Book of Cypher only recorded some second-circle arrays. Inheritances that contained third-circle arrays were even rarer. Only the Star Tower and the wizard organizations in the inner sea region could possibly have such inheritances..
