

## Wizard 445

Chapter 445: Level 5 Devil Blade, Silver Mountain Dragon!(3)

Apart from that, the Saint Scorpion larvae had almost reached maturity, and many were born when Levi was in seclusion.

The entire cave was densely packed with Saint Scorpions. There were about 5,000 of them.

Levi left the larvae behind and put away all the adults into the Bug House.

He now had two Bug Houses. Other than the one for the Saint Scorpions, he had another with Red-Faced Sea Ghost Spiders sealed inside. Unfortunately, Levi dared not open it, afraid the spiders would bite him. Fortunately, these Red -Faced Sea Ghost Spiders were very resistant to hunger. They would enter hibernation if not fed for long, so Levi was not worried about them starving.

After a round of inspection, all the arrays on the island were functioning normally. When the Bone Snake Igor saw Levi, it was incredibly close to him, crawling around him to curry favor.

"Perfect," Levi exclaimed.

It was the Year 1034 of the Holy Brilliance Calendar, the Month of Flowers.

After two months of cultivation, Levi's Body of Ghost Fire had reached level 2, and his left hand could also be elementalized. However, this skill was still useless to him.

The proficiency of the Big Fireball Technique had increased quite a bit, and its power was much stronger than when Levi had just learned it. He could now release a fireball with a diameter of about 1.5 meters, much larger than the Fireball Technique. However, if he wanted to unleash the power of the Big Fireball Technique, the diameter of the fireball had to reach three meters. Levi still had a long way to go.

As for Nature's Secret Language, Levi had also cultivated it to the maximum of level 5. With this, Levi could form contracts with two first-circle spiritual beasts. Levi had already thought of the two spiritual beasts he wanted to form contracts with. One was the Red Sand Ape, which Levi could use for his subsequent cultivation of the Saint Ape Breathing Technique. The other was a first-circle creature with the Undying Bird bloodline, which he could use after he had broken the limits of the Undying Bird Breathing Technique.

Two contracts were far from sufficient for Levi. He had many breathing techniques and could open a zoo on Black Fire Island with the corresponding types of transcendent creatures he needed.

However, the Undying Bird Breathing Technique was more critical, so Levi prioritized getting a creature corresponding to it first.

At any time, regardless of whether he could use it in his daily life, he had to prioritize his own safety. This way, if he encountered danger, he could escape. It was the same principle as building a fire escape. The Undying Bird was Levi's fire escape, his last line of defense.

Levi had made some progress and breakthroughs in both the path of wizards and the path of knights. His strength had reached new heights, especially after the Black Devil Blade reached level 5.

He felt it was time to set off for the Yellow Earth Continent. The Yellow Earth Continent was rich in natural resources and had terrestrial transcendent creatures that other regions lacked. All of these were quite tempting to Levi.

However, he had to travel to the Gray Tower before he left. First, he had to pick up his package. He also had to request leave from the tower.

Levi received a package from Andrew in the Gray Tower's mail room.

He opened the storage bag. There were a few breathing techniques and a letter inside. Levi opened the letter.

"Dear Master, I have followed your instructions and become the patron of the

Silver Mountain Family. In the Month of Beginning of Year 1034 of the Holy

Brilliance Calendar, the Earl of Silver Mountain died peacefully in the Silver Mountain Castle on a night when a snowstorm struck. Per your will, I did not take half of the wealth of the Silver Mountain Family. I only took a symbolic gold coin and the ancestral breathing technique of the Silver Mountain

Family."

Levi sighed after reading the letter.

The Earl of Silver Mountain was a good collaborator and a dutiful lord. He was one of the few ordinary grand knights and nobles that Levi respected. He had some valuable qualities. In Levi's opinion, if not for the long battle with blue frost, the Earl of Silver Mountain would have the potential and character to become a legendary knight.

Levi murmured, "May his soul find peace."

Levi put away these breathing techniques. Other than the Silver Mountain Dragon Breathing Technique passed down from the Silver Mountain Family, the other breathing techniques in the package were not worth mentioning.

Levi then copied down the Silver Mountain Dragon Breathing Technique. After studying the basics of the breathing technique, he was sure his copy was usable. Levi then sent out the only original of the breathing technique and a letter detailing his assignments for Andrew to complete for the following year.

There were few people Levi respected in the mortal world. The Earl of Silver Mountain was one of them. Naturally, he would not keep the original inheritance diagram of the Silver Mountain Family's breathing technique. He would return it to the family, hoping the Silver Mountain Family could continue to exist as long as possible.

Levi commented, "No family lasts forever. Only destruction is eternal. Families rise and fall, and the cycle repeats itself. The most important thing is still to strengthen oneself. It's not too late to talk about establishing a family after one has enough capital."

Levi believed there was no right or wrong choice between focusing on personal growth or one's family. It was just that everyone had different values.

The Silver Mountain Dragon Breathing Technique and the Hunchback Dragon Breathing Technique were both endurance-type breathing techniques.

However, one had a starting grade of perfect, while the other was only excellent.

The Silver Mountain Dragon was a legendary silver-white dragon. Rumor has it that this dragon would travel between the Multidimensional Plane for its entire life. It was the most docile of all dragons, possessing intelligence that surpassed other dragons. Therefore, the Silver Mountain Dragon was often a great sage or prophet of the Dragon Clan. While traveling between planes, it often met many experts of different races and became friends with them.

Therefore, one should never try to offend a seemingly docile Silver Mountain Dragon.

"The Earl of Silver Mountain's gentle personality might have something to do with this breathing technique." Levi's heart skipped a beat.

This was the second breathing technique named after a dragon that Levi had obtained, and its secret medicine was naturally related to the Dragon Clan.

The main ingredient for its secret medicine was Earth Dragon Blood. The blood of a dragon with earth-element affinity would have the best effect on the secret medicine.

Levi thought out loud, "Leviathan has water-element affinity while the white snake has frost-element affinity. I only have the blood of the Earthly Dragon

Beast with earth-element affinity. However, its blood is of low quality. When I

Go to the Yellow Earth Continent, I must look for better alternatives. There were more transcendent creatures that have earth-element affinity there.”

Without the blood of other earth-element Dragon Clan, Levi could only use Earth Dragon Blood to replace it in his secret medicine. He could still cultivate the Silver Mountain Dragon Breathing Technique faster than usual. After all, the requirement for using the blood of earth-element Dragon Clan in secret medicine was mainly for the post-legendary stage. Before the legendary stage, the conditions for the secret medicine were lower.

Levi was in a hurry to cultivate this breathing technique because he believed the Silver Mountain Dragon Breathing Technique was more important than the Saint Ape Breathing Technique. This breathing technique would determine whether Levi could have Legendary Endurance and advance to the

Five-Dimensional State. Therefore, he could not set it aside like the Saint Ape

Breathing Technique and had to cultivate it as soon as possible..
