

Wizard 453

Chapter 453: Spirit Binding Ring, Subduing the Fire Elemental spirit! (2)

The arrival of Ace gave it a great sense of crisis. It felt that its important position, second only to Leviathan, had been greatly affected. Although it was the second brother, it was obvious that Ace, the third brother, was far more talented and powerful than it. It was purely because it had come early to be the second brother.

Levi did not care about Igor's thoughts. He let Ace go to the underground magma to recover from his injuries. The Fire Elemental Spirit was a complete elemental spirit creature, so it would not be fatally injured. As long as he had the rich power of fire elements, Ace would be able to recover quickly.

Moreover, his Black Fire Island was obviously suitable for Ace's growth. There might even be a chance for him to advance to a level 2 Fire Elemental Spirit in the future. In that case, Ace would have the combat power to rival a level 2 wizard. Of course, the advancement of the Fire Elemental Spirit would take a

Long time. If Levi's realm stopped at the First-Circle Wizard realm, it might have died of old age and not advanced successfully.

"It's a pity that I don't have the weapon-making blueprint and materials for the Spirit Binding Ring. Otherwise, I can refine more of these things. I can use them when I subdue transcendent creatures in the future."

After settling Ace down, Levi checked the condition of his island and found that everything was normal. Whether it was the medicinal field or the nursery, everything was safe and sound. This made him feel relieved. It seemed that this witch wanted to take over his island, so she did not touch the things on it. Otherwise, Levi would have suffered a great loss.

After cleaning up the battlefield, he put away the witch's storage bag and cleaned up the traces of the battle. Under the protection of Jorman and Ace, he slept happily for a day and a night. After a big battle with that damned witch, he felt a little weak...

He had used almost all of his strength and trump cards to kill a Second-Circle Wizard. Although the other party seemed to be in an unstable state now, he was still a genuine second-circle.

Of course, without Jorman, Levi would not do such a dangerous thing. He knew that there was a reliable snake like Jorman behind him, so he rushed forward without hesitation.

"The Black Gold Scale is indeed powerful. It can actually withstand the attack of the Five Fireball Technique. Under the superposition of the Five Fireballs, its power is much stronger than the Big Fireball Technique. This is a genuine second-ring spell attack."

Of course, it was not completely blocked. The explosion of the Five Fireballs was too powerful. A layer of Levi's scales was blown away, and Levi's Rock Body was forced out. With the Rock Body, Levi's vital internal organs were not injured at all. Only a layer of the surface of his body was burned. To other wizards, this was a fatal injury.

To Levi, this was merely a fatal injury.

With the Blood Ember's powerful regeneration and self-healing ability, these superficial wounds could be healed almost instantly.

Hence, the five Fireball Techniques that were thrown at Levi's face did not kill him.

This was undoubtedly a fatal psychological blow to the Red Flame Witch. She couldn't imagine what kind of monster could withstand the explosive power of the core area of the Five Fireball Technique. Except for those second-circle transcendent creatures known for their defense, such as the damn sea dragon crocodile, ordinary transcendent creatures would be seriously injured if they were not killed by the Five Fireball Technique.

In the end, this Second-Circle Wizard, Claur's lover, died on her way to escape.

"I can't be arrogant. It's still a little difficult for me to deal with a Second-Circle Wizard now. In two years, when Golden Snake advances to level 12, I should have the strength to fight ordinary Second - Circle Wizards without Jorman's help. "

After Levi rested, he took out the storage bag from the woman and began to count the gains inside. After reading it, his face darkened.

"Why is he so poor? Only 3,000 Aether Stones? Is he a Second -Circle Wizard?"

"Damn it, she doesn't even have a Second-Circle Wizard Tool. To think that I spent so much effort. What the hell is this? This woman doesn't even have the consciousness to save money."

In the end, Levi tragically discovered that the most valuable things on this woman seemed to be the spirit Binding Ring and the level 1 Fire Elemental Spirit.

Over the years, the Red Flame Witch had almost used up all the items in her storage bag in order to heal her injuries and avoid the enemy. Even her Second-Circle Wizard Tool was completely damaged in a battle with the enforcers. She detonated it and was able to escape.

Therefore, although the current Red Flame Witch was a Second-Circle Wizard, she was not as rich as many First-Circle Wizards. She was in dire straits. Her glory as Claur's mistress was gone, and now she had died under Levi's hands. A beautiful woman's life was just so-so.

"Forget it, I can't be too greedy. One Fire Elemental Spirit is enough."

Apart from being used for combat, the Fire Elemental Spirit could also be used as a mobile refining furnace. This was because it was equivalent to a mobile spiritual flame. Therefore, some ancient weapon craftsmen, pharmacists, alchemy wizards, and those from other professions would aim to have a Fire Elemental Spirit that belonged to them. This could save a lot of trouble.

Moreover, the Fire Elemental Spirit could also possess the bodies of powerful alchemical creatures as its power source. By providing sufficient fire elemental power, it could save a lot of Aether Stones.

With that thought, Levi felt much better. His gloominess was swept away.

When he returned from the Yellow Earth Continent, he would refine the first-circle alchemical creature, Corpse Digger..
