

Wizard 454

Chapter 454: Spirit Binding Ring, Subduing the Fire Elemental Spirit!! (3)

This would be Levi's ultimate weapon against the Second-Circle Wizards before he advanced to the second-circle. If he worked with Levi, the two giant killing monsters would be enough to resist the Second-Circle Wizards.

The Corpse Digger's strength was naturally exchanged for its high cost of manufacturing and fuel. The energy consumed by this huge creature that weighed dozens of tons fighting with all its might was far from what a lightweight alchemical creature like the Swordsman Mantis could compare to. It might consume hundreds of Aether Stones in a battle. This was undoubtedly burning money.

But now, there was Ace. As long as Levi let Ace fill the underground fire under the Black Fire Island with fire elemental power in advance, he could use Ace as a "mobile power source". When Ace was fighting, he could integrate into the undead digger's activation furnace and replace the burning of the Aether Stone to produce energy.

The Aether Stones that could be saved for Levi would definitely be a huge sum of money in the long run.

After Levi had rested, he did not waste any more time. He let Jorman return to the Gray Tower by himself. The Tower Master was about to enter Hell. The Gray Tower needed Jorman to guard it so that some people with ulterior motives would not take advantage of it.

On the Black Fire Island, Levi only left the Rock Troll couple and Bone Snake Igor to take care of the house.

He brought Ace and the other five generals of the living-dead family with him. This trip to Area 7's Yellow Earth Continent was different from the past. It was a place that was more powerful than Area 8 and Area 9 combined. It also meant that more powerful enemies might appear. Therefore, he had to bring more living dead with him. After all, protecting his life was the most important thing.

If the house was gone, they could still buy it. If the person was gone, it was

Really gone.

After everything was ready, Levi left the house on Leviathan.

The main purpose of this trip to the Yellow Earth Continent was to subdue as many transcendent creatures as possible that could provide him with secret medicine. This way, after returning, Levi could cultivate the knight breathing technique in peace and strive to cultivate to level 12 as soon as possible.

When he passed by the sea dragon crocodile, Levi used Perception again from afar. The sea dragon crocodile was indeed still in the same place, which made Levi feel relieved. He did not alarm it and took a detour to leave quickly.

Area 9 and Area 7 were separated by an entire Area 8. Levi traveled day and night, relying on Advanced Vibrosensing, Spider Sensing, and the Black Snake's Message to avoid those possible dangers. In the end, it took him less than a month to pass through Area 8 and enter Area 9.

Yellow Earth Continent was at the border between Area 9 in the outer region and Area 6 in the inner sea region.

His idea was to go to Lion King City first, find Dinos, and visit the city of the Jostar family.

Of course, the most important thing was that Levi wanted Dinos to use his family's power to help him find the whereabouts of the Colin Family. He did not forget the Tower Master's mission. In two months, the secret realm would open. He had to find the Colin Family before he could enter the secret realm.

The secret realm was similar to the Shadow Realm. In essence, it was a part of the Realm of the Unbelievers. It was the sub-dimensional portal plane of this world.

However, the reason why secret realms were secret realms was that they were fixed. Moreover, they had all been modified by wizards and turned into the backyard of powerful wizards. Wizards regularly obtained resources in the secret realm for cultivation. There would also be conflicts because of the secret realms. In history, a large portion of wizard wars were to fight for the ownership of the secret realms.

As far as Levi knew, the Intermediate Wizards and high-level wizard organizations in the inner circle usually had more than one entrance to the secret realm.

However, what he did not expect was that the declining Colin Family also secretly controlled the entrance to a secret realm.

He thought that if this family was not very powerful, he would think of a way to snatch this secret realm. If he could have a secret realm, even if it was a small secret realm, Levi would not have to worry about many resources. It was equivalent to having his own logistics reserve base.

The Tower Master was too kind. He did not want to hurt his wife's family, but Levi was different. He did not care who the other party was. The Tower Master had said that Levi could threaten or bribe him. It was equivalent to telling Levi that as long as he achieved his goal, he would do anything.

Holy Brilliance Calendar Year 1034, Month of Flowers.

Levi finally saw the Yellow Earth Continent.

From afar, the border of the continent could be vaguely seen.

Leviathan was waiting for him nearby, so Levi went to the mainland alone.

As soon as Levi stepped into this place, he felt a heavy aura coming at him. It was the power of the earth element. If he cultivated the Meditation Arts and spells of the Earth Faction here, he would definitely be able to achieve twice the result with half the effort.

Because Dinos had given Levi a map of the Yellow Earth Continent, Levi quickly headed to Lion King City after asking the local mortals about his location.

He had the Blood Wings and could fly like a bird. His traveling speed was extraordinarily fast. Although the Yellow Earth Continent was called a continent, it was only a slightly larger island after all. The distance between it and Area 7 was far inferior to the distance between Area 9 and Area 7 for Levi.

When Levi was tired, he found a safe place for Ace and the others to protect him. He took the opportunity to cultivate the Earth Meditation Art. After resting, he continued on his way.

Levi's Earth Meditation Art was only one step away from level five, so he made a breakthrough the next day.

Levi—

Earth Meditation Art: Level 5 (1/30,000)

Now, only the Deep Sea, Night Crow, and the Furnace Meditation Art were still at level 4. Levi was not in a hurry. In any case, he only needed to ensure that at least one Meditation Art could be cultivated quickly. It would not be a problem to increase his wizard realm first and then slowly cultivate other Meditation Arts.

Three days later, Levi saw the port city on the distant coastline, the Lion King City which lay dormant like a lion.

Who would have thought that such a huge city would start from an insignificant legendary knight in the Wizard World?
