

## **Wizard 459**

Chapter 459: Flame Prince! Top-notch Vision! (2)

Lyon said affectionately. The Golden Lion Jostar Family had a deep obsession with legendary knights.

"Don't worry, Father. With Sir Levi's guidance, I will definitely reach legendary within ten years!" Dinos was confident. He had seen how powerful Levi was.

Five days later.

Levi had already arrived at his first stop, which was the Rogue Rift. He had to find the Colin Family first. After all, the Tower Master's mission had a time limit and could not be delayed.

The Rogue Rift was about 2,000 miles from east to west. Strong winds blew here all year round, sending sand and rocks flying like a sandstorm.

Therefore, visibility was very low in this valley. Fortunately, Levi relied on his snake tongue and Top Perception to investigate. Although the wind affected him, it did not affect him much.

The high-speed wind hit the sand on Levi's body, making crackling sounds.

If it was an ordinary wizard, without a Wind Avoidance Wizard Tool or a protective force field, such a strong wind was enough to injure their bodies.

Levi searched the other end of the rift with his Perception.

In this violent wind, his flight was greatly affected, so he simply landed on the ground. Fortunately, he was not slow.

From time to time, unknown creatures would appear on Levi's biological radar. He would avoid them whenever he could. If he really could not avoid them, Levi could only kill them.

Half a day later.

The wind was getting stronger and stronger, Levi was probably at the level of a

Level 3 great hurricane.

Although he could withstand it, it was too much of a waste of stamina because it was against the wind. He simply hid in a cave in the mountains to rest.

There was a pattern to the wind. Every once in a while it would weaken and then intensify. It went on and on.

"This place is really not for humans to stay in. That Colin Family is really ruthless to settle down here." Levi could not help but complain.

However, to be honest, the wind elemental power here was indeed much denser, almost at Level 2.

It was a pity that Levi did not cultivate the Storm Faction's Meditation Art at the moment. He had too many Meditation Arts now. It would not be too late to cultivate them when he obtained the wind element affinity talent in the future.

When the gale subsided a little, Levi was about to go out when he sensed two auras fighting not far away. One of them was from a wizard, and the other was from a transcendent creature.

"It's probably someone from the Colin family. I'll go take a look." Levi walked out of the cave. Not long after, a figure was swept up by the strong wind and blown towards Levi.

He waved his hand and grabbed this person. It was an apprentice wizard.

This person was already unconscious. Levi looked ahead and saw a transcendent snake-like creature swimming in the wind.

"Wind Snake, the strength of a high-level apprentice wizard."

Levi had previously investigated the information of the transcendent creatures in the Rogue Rift.

This ungrateful fellow charged straight at Levi, but Levi did not move at all. The Wind Snake slammed into Levi's body, causing the Black Gold Scale to buzz. The Wind Snake was in so much pain that it saw stars. Levi grabbed the snake's tail with his other hand. Smack! Smack! Smack!

Three times.

Levi smashed the Wind Snake into a pile of mud. Levi took some useful materials and burned the corpse.

Then, he came to the cave. The mid-level apprentice wizard woke up after a while and looked at the strange man who was looking at him.

"Wasnt I being chased by the Wind Snake..." He clearly didn't understand the situation.

"I saved you," Levi said with a smile.

When the apprentice wizard heard that and sensed Levi's powerful mental fluctuation, he knew that he was an official wizard who was as powerful as the current family head of the Colin Family.

He quickly thanked him. "Thank you, Lord Wizard. My name is Macken, an apprentice wizard of the Colin family. I... I don't have anything valuable on me.

I don't know how to thank you."

At this, Macken blushed, embarrassed.

"Are you from the Colin Family? What a coincidence. I'm going to the Colin Family. There's no need to thank me. You're just an apprentice. You don't have anything that I'm interested in," Levi said with a smile.

Through this conversation, he slowly made this apprentice wizard, who seemed to be ignorant of the world, lower his guard. Then, he also learned some information about the Colin Family from the other party.

As for the secret realm, Levi did not mention it. This must be something that only the upper echelons of the Colin family knew. A rookie like him would definitely not know. If he mentioned it, he might alert the enemy.

"The family head is a senior first-circle wizard, and there are also two first-circle official wizards. A starving camel is still bigger than a horse. Or rather, with a resource point like a secret realm, even if the Colin Family has declined, it's still slightly stronger than I imagined. However, it's still within my control." Levi muttered to himself.

The young wizard who was saved by Levi seemed to be ostracized by his family. Therefore, he had to try to hunt some transcendent creatures in the Rogue Rift and go to the nearby wizard market to exchange for some cultivation resources.

Because his late great-grandmother, Stella Colin, was the sister of a controversial figure in the family.

Stella was the Tower Master's deceased wife.

The Colin Family used to be a large family. As a Second-Circle Wizard Organization, they naturally had their own pride.. However, Stella ignored the objections of her family and ran away with Herman, who was traveling to the Yellow Earth Continent!
