

Wizard 461

Chapter 461: Flame Prince! Top-notch Vision! (4)

None of the three aristocratic families were kind people. Levi did not believe that they did not have blood on their hands, even for a family like the Golden

Lion Jostar Family which was able to start from scratch and develop so quickly. It was just that he had done them a favor, so they treated him well.

Although the Pan-Plane Wizard Council's law had a certain deterrent effect, with the methods of the three aristocratic families as the local tyrants of the Yellow Earth Continent, it was definitely not difficult to exploit the legal loopholes and snatch the secret realm openly and secretly.

This was especially true for the Al Hidd Family. They had long coveted the Colin Family. The reason why the Colin Family had declined so quickly was because of the Al Hidd Family's secret obstruction.

As long as Levi leaked this news, even if the Colin Family did not have a secret realm, the other factions would definitely not believe it.

Hearing this, Dwayne panicked.

"8,000 Aether Stones for a ticket and a confidentiality agreement. Otherwise, I won't let you succeed even if I have to sacrifice the secret realm to the Wham Family," Dwayne said firmly.

At this moment, the first-circle female wizard suddenly said, "Sir, you can't. The secret realm is an heirloom of our Colin Family. How can we let outsiders enter?"

Dwayne looked at her and said coldly, "Then what do you think we should do, Linda?"

The witch didn't know how to respond. She could only stare at Levi fiercely.

Levi sneered in his heart. It seemed that the Colin Family was not united internally.

"No problem. Let's sign the contract. Clan Leader Dwayne is someone who knows the big picture." Levi smiled and praised.

Money was not a problem. Anyway, he would get the Tower Master to reimburse him when he returned. As long as he could resolve this peacefully and enter the secret realm, that would be enough.

Although he had the strength to deal with the Colin Family, the Pan-Plane Wizard Council was not easy to deal with.

When Dwayne saw Levi's fearlessness, he knew that Levi must have come on behalf of Herman from the Gray Tower.

Otherwise, Levi, a mere First-Circle Wizard, would not be so rich.

It had to be known that 8,000 Aether Stones was not a small sum for the Colin Family.

That was why he gave such a figure. That way, even if Levi had obtained many benefits from the secret realm, it would definitely not exceed 8,000 Aether Stones. The Colin Family would definitely make a profit.

The Colin Family did control the entrance to the secret realm. However, with their family's strength, they could not really explore the secret realm. Every time, they would collect some resources at the safety of the periphery and return. Basically, they would not step into the core area of the inner area that was rich in resources.

The secret realm would only open for seven days. How many valuable things could Levi, a First-Circle Wizard, find in seven days?

In ancient times, even a small secret realm needed an intermediate wizard organization to have the ability to truly explore it.

In the secret realm, there were some unique transcendent creatures. All of them were ancient mutants and were powerful. Even when the Colin Family was at its peak, they did not completely eliminate these dangerous factors.

Therefore, with this thought in mind, Dwayne suddenly felt that it was not a loss, so he drafted a contract with Levi.

"Remember to come on time when the time comes. I won't wait until it expires," Dwayne said as he put away the Aether Stone in satisfaction.

After signing the contract slate, Levi was not worried that Dwayne would go back on his word. He left the Colin Family and found a secluded place in the Rogue Rift to set up a set of defensive arrays.

He had to seize the time to cultivate. Like the Shadow Realm, there might be danger in the secret realm.

It had not been opened for 200 years. Who knew what would be born inside? Therefore, the more powerful it was, the more it would be.

Levi also had a plan for his cultivation. He planned to focus on cultivating the new Heavenly Eagle Breathing Technique.

This was because two months was not enough for other breathing techniques or Meditation Arts to break through. However, if he specialized in the Heavenly Eagle Breathing Technique, he might be able to cultivate it to the limit before entering the secret realm! A few days later.

Western Yellow Earth Continent.

Skyfire City.

This was a city established by the Al Hidd Family. Together with Lion King City and Wind City, it was known as one of the three major cities in the Yellow Earth Continent.

Inside the Wizard Tower of the Al Hidd Family's Clan Leader.

Clan Leader Lehman narrowed his eyes, seemingly deep in thought.

A First-Circle Wizard in a special black robe was prostrating in front of him.

Lehman was also calculating in his heart.

The woman in front of him rushed to the Al Hidd Family overnight and told Lehman something important.

The Colin family had a secret realm.

"Your family really hid it well, but you're still tactful. Since you're sincere in joining our Al Hidd Family, I naturally won't treat you badly. Here are ten Spirit Accumulation Potions. Take them. As long as you help me take down the secret realm and the Colin Family, you don't have to worry about such supplementary meditation potions in the future. It's only a matter of time before you advance to a senior first-circle." Lehman narrowed his eyes and smiled.

"Thank you, Lord Lehman! The Colin Family is already at the end of its rope, and Dwayne is extremely weak. He was threatened by an outsider. That Levi from the Gray Tower must have been sent by Herman. He must have ulterior motives," Linda said.

When Lehman heard this, he seemed to recall 200 years ago when Stella refused to marry into his family and eloped with that wild kid, Herman.

He heard that Herman had also advanced to the third-circle some time ago, which made Lehman unhappy for a long time.

However, the two parties were too far apart, so it was not appropriate for him to do anything. However, since Herman's disciple came knocking on his door, he could not blame Lehman for being ruthless.

In this Yellow Earth Continent, he, the Flame Prince, could do whatever he wanted.

Thinking of this, he asked Linda to leave and return to the Colin Family to continue playing her role.

He stood on the wizard steeple and looked in the direction of Lion King City in the east of the continent. There was a confidence in his face that seemed to control everything. He could not help but mutter to himself,

"With my Al Hidd Family's strength, we can definitely gain a lot from exploring the secret realm. With the support of the secret realm resources, what can a golden lion like you use to fight me?"

Nearly two months later.

Somewhere in the Rogue Rift.

Levi finished cultivating the Heavenly Eagle Breathing Technique for the last time and opened his eyes. His eyes were shining brightly.

He walked out of the cave abode and looked at the sandstorm. In the past, he had to use his Perception to investigate the distance. Now, in his eyes, he was suddenly enlightened. In the yellow sand that filled the sky, he could clearly see a Wind Snake 20 miles away.

His world was clearer than before.

This was a sublimation of absolute vision because Levi had already cultivated the Heavenly Eagle Breathing Technique to the limit today, giving birth to top-notch vision.

He spread his wings and flew high into the sky. Only at such a high place could the Eagle Eye be more useful.

Levi's eyes were as sharp as an eagle's, able to see through everything.

Levi could see everything within a radius of dozens of miles, including the ants on the ground. He could see clearly how many bodies and legs there were.

Levi opened the proficiency panel.

Levi—

Heavenly Eagle Breathing Technique: Level 7 (Maximum), Special Effect:

Top-notch Vision
