

Wizard 469

Chapter 469: The Black Knight! (1)

Levi picked up his storage bag, put away the Saint Scorpions and the living dead, and used a Big Fireball Technique to blow up the crime scene.

Then, he quickly left. Not long after Levi left, a pair of furry hands reached out from the spatial rift and hesitated for a moment.

The giant ape crawled out of the secret realm. It breathed in the fresh air and felt a different atmosphere. It revealed an excited expression.

Then, he chased after Levi without looking back.

I'm not staying in this secret realm anymore!

Levi, who was flying in front, suddenly had a change in expression.

"Damn it, I forgot about this giant ape. It's really persistent."

Levi flapped his wings with all his might. He could not defeat the giant ape to begin with, and now that he was in the weakened state of Red Lotus Blood, it was even more impossible for him to defeat it.

Just like that, the man and the ape ran wildly in the wilderness.

The next day.

In the end, Levi, who could fly, was better. When he was tired, he would use his spells and the escape techniques that came with the Wizard Tool to fly or let Ace fly with him. Then, he would rest and continue to use the Blood Wings.

In the end, he completely got rid of that big guy.

Levi flew for another day.

After finding a quiet place and setting up an array, he collapsed on the ground.

"I'm so tired."

"What's going on with the Colin Family?"

"Logically speaking, it's impossible for other factions to know about the secret realm. If that was the case, the Colin Family would have been long gone." Levi lay on the ground, puzzled.

He couldn't be killed for no reason. At the very least, he had to know who wanted to mess with him so that he could deal with it better.

However, it was time to rest, so Levi did not think about anything else.

Three days and three nights later, under the protection of Ace and the others, Levi had a good sleep and replenished a lot of energy and potions.

His wound had healed long ago and he was fine now.

This was the effect of the Legendary Physique. As long as it was not a fatal injury, it would recover in no time.

Levi hid in the temporary shelter and took out the things in the storage bags of the three wizards to see what spoils of war there were. At the same time, he wanted to find some clues about the mastermind.

Levi was overjoyed when he was done counting.

The three wizards added up to nearly 20,000 Aether Stones. That Second-Circle Wizard alone had 15,000 Aether Stones.

Levi silently put it away.

After expending so much of his Aether Stone reserves in Lion King City and the Colin Family, he had returned to 30,000...

This feeling of not being able to spend all the money was really good.

"Pharmacy is just for fun. If I really want to earn money, it has to be from a dark wizard." Levi could not help but complain.

In addition to the Aether Stones, there was also a Meditation Art of the Burning Faction that Levi had never seen before.

Black Sun Meditation Art.

"Black Sun Meditation Art... Why do I feel that this Meditation Art is related to the Black Sun Steeple or Black Sun Adam?"

Levi suddenly thought of something when he saw the Meditation Art.

This was because most of the Burning Faction wizards used the Sun Meditation

It was easier to find the content of the subsequent advancement for this Meditation Art. The Sun Meditation Art was divided into eleven chapters, corresponding to the apprentice stage, the first-circle

to the ninth-circle, and the legendary chapter. As long as one had money, one could buy these things from the Burning Faction.

Besides, the Sun Meditation Art had been tested and proved that one could indeed reach the legendary realm. After all, the Blazing Sun God Wizard Edmund was practicing the Sun Meditation Art.

Levi had never heard of the Black Sun Meditation Art before.

"In any case, I don't want to learn this thing. The Sun Breathing Technique is enough."

Levi put away the Black Sun Meditation Art. This Meditation Art also had corresponding spells. For example, the second-ring spells used by the boss of the Black Flames, such as the Black Flame Spear, were all very powerful. One had to cultivate the Black Sun Meditation Art to use these spells.

However, Levi had already made up his mind to practice the Fireball Technique to the end, so he did not want to learn other spells.

He did not want to specially cultivate a Meditation Art that was suspected to be related to a big-shot dark wizard just to learn these unorthodox spells.

In addition, Levi also found three Wizard Tools.

The two First-Circle Wizards each had a one-ring Wizard Tool. Levi was not interested in them, so he kept them for the black market to sell in the future.

The only thing that made him slightly excited was the black longsword -shaped Wizard Tool he found on the Second-Circle Wizard's body. The spell runes on it were dense and extremely profound.

Levi couldn't tell what this Wizard Tool was, nor did he know how to use it.

He planned to find a specialized Wizard Tool appraiser in the future and let the appraiser help him see how to use this thing.

In the end, in addition to a large pile of various materials, Levi also found something familiar.

The key to the secret realm.

There was a transparent crystal ball in Levi's hand. The white tornado inside had disappeared.

This meant that the entrance to the secret realm had been closed.

"It seems that this secret realm key doesn't need an incantation. No matter what, I'll put it away first and study it in the future. If that secret realm can only be opened once every 200 years, this secret realm key won't be of much use to me, but I'll still have something to think about."

"However, since the key to the secret realm is here, it seems that Yuko and Linda have most likely died at the hands of these black-robed wizards of unknown origins. I have to ask Dinos if he has heard of the Black Sun Flame."

In the end, Levi concluded that he had gained a lot from his trip to the secret realm.

The value of the Seven Days Soul Returning Grass was immeasurable.

It cost him 8,000 Aether Stones for his ticket, but his returns were at least 30,000 Aether Stones worth of potion materials..
