

Wizard 474

Chapter 474: The Black Knight! (6)

The mysterious knight said helplessly, "As expected, with the Blood River Will around, these Primary Blood Breeds really can't be killed."

He ignored the dumbstruck Andrew and said to the Blood Knight, "Long time no see, Blood Knight Brad."

The Blood Knight laughed, "Black Knight Blake, you're finally here. Oh right, just call me Anderson from now on. Let bygones be bygones."

"In the name of the vice commander of the Twilight Knights, I represent the

Guild Leader, Sir Levi, to welcome the Black Knight into our Twiling Knights. From now on, we are a family."

At the same time, in the Azure Realm, Levi had already returned to Black Fire Island.

Dinos, on the other hand, went to complete his trade mission first before meeting up with Levi at the Gray Tower.

After returning to the island, Levi found a cave and placed the vice commander inside. He then tied it to a huge pillar with an iron chain.

"Ace, Rhett, you two keep an eye on this guy."

Taming the Crimson Fire Dragon Lizard was not something that could be completed in a day or two. Levi needed time to slowly endure it.

After settling down these extraordinary creatures, Levi checked his Black Fire Island and found that it was no different from before he left.

It seemed that there were no intruders during this period of time.

This made Levi heave a sigh of relief.

If there was a stranger in the house every time he went home, how terrible would that be?

During this trip to the Yellow Earth Continent, Levi solved the problem of the secret medicine for the Saint Ape Breathing Technique and the Red Lotus Breathing Technique. Now, he could start to concoct the secret medicine.

However, now was not the time. After Levi confirmed that there were no thieves in his house, he took the Leviathan and rushed to the Gray Tower.

He had to hurry up and give the Seven Days Soul Returning Grass to the Tower Master, hoping that he did not delay his matters.

Inside the tower, Levi saw that Ms. Marlene was going to class.

"You're back? Did it go well?" Marlene asked with a smile. "Everything is going well, Teacher. Is the Tower Master here?"

"He hasn't come back yet."

After saying this, Marlene stopped in her tracks and called Levi to her room. "You know that the Tower Master went to Hell, right?" Marlene said.

"Yes, Teacher. What's wrong?"

"The Tower Master has been in Hell for three months and has yet to come out," Marlene said solemnly.

"Hell is very big. Perhaps he was delayed on the way," Levi said.

"I hope so," Marlene sighed, "Did you succeed in your mission?"

Levi nodded. Up until now, only he and Marlene knew what the Tower Master was doing. The other wizards were not aware of the situation.

"It's a success. This is the Seven Days Soul Returning Grass. I'll have to trouble you to pass it to Tower Master when he returns," Levi solemnly took out a small box and handed it to Marlene.

"Alright, we don't know how to enter Hell, and our strength is not enough. We can't help the Tower Master. Sigh..." Marlene sighed.

"It's okay, teacher. I believe in the Tower Master. I believe that Stella will be resurrected," Levi smiled and said.

Suddenly, a picture appeared in his mind. Two spherical alchemical creatures were holding hands, and the scene was a little strange.

Marlene carefully put away the Seven Days Soul Returning Grass and placed it in the safest place.

While he was in the tower, Levi made up for the lessons he had missed in the past few days. He also went to Manla to collect some materials. His main goals in the short term were to level up the Golden Snake Breathing Technique to level 12 and to refine a Corpse Digger.

No matter which of these two succeeded, it would bring about a huge increase in his strength.

Apart from that, Levi also saw the package that Andrew had mailed to him in the mail room.

After he opened it, he found a few breathing techniques and a letter. The letter was written by Anderson.

After reading the letter, Levi was delighted.

"As expected of the Blood Knight. Only an old antique like him could dig out those legendary knights hidden in the human world."

"Black Knight Blake, another famous Legendary Knight has joined the Dusk Knights."

Levi was excited.

He had already recruited two of the seven Glittering Legends whom he had once admired.

Apart from the Snowflake Knight and the Thousand Faced Knight, Levi also knew the whereabouts of the other Legendary Knights.

"So, legendary knights might not be dead. They might just be living in seclusion, faking their death, or even entering the Wizard World. This is also to avoid conflict with the church."

Even old Anderson had high praise for Knight Blake's character, which made

Levi feel more at ease.

"When Dinos becomes a Legend and inherits the title of Lionheart Knight, there will be five Legends."

Levi happily put away the letter and returned to the Black Fire Island with satisfaction.

In the following days, he began to prepare the Saint Ape Potion and the Red Lotus Potion.

In the end, after three months of experimentation, both potions were successfully refined.

After consuming the Saint Ape Potion, Levi managed to cultivate the Saint Ape Breathing Technique to level 6 in just a month!

It was not difficult for Levi to cultivate breathing techniques before level 11.

Now that he had high-grade potions, his cultivation speed was like a rocket.

As for the Red Lotus Breathing Technique, after consuming the Transcendent-grade Red Lotus Potion, it had also stepped onto the fast track of cultivation and advanced relatively quickly towards Level 12.

At the same time, Levi also began to make preparations for refining Corpse Digger. In his spare time, he visited all the markets near Area 9 and finally collected all the materials.

The three arts of array, weapon making, and Pharmacy skills were also cultivated.

After being busy for so long, Levi did not need to run around for a long time. His daily life returned to that simple and plain cultivation routine.

During the Month of Winter, Levi returned to the Grey Tower for class.

On the seventh floor of the White Tower, he saw the heavily injured Tower Master.

A lot of his alchemy armor and nails had fallen off, and many parts were directly exposed. The only human-like face on him looked very tired, and the few white hairs on his body had all fallen off.

"Tower Master, did you succeed?" Levi asked, his emotions complicated.

The Tower Master did not say a word, which made Levi's heart skip a beat. Had he failed to find the Nirvana Soul-Beckoning Wood?

"Hahahaha! I succeeded!"

The Tower Master suddenly could not hold back his laughter. He laughed until his stomach hurt and the parts inside scattered all over the ground.

"I'm really happy, really...Stella can be resurrected soon."

The Tower Master seemed to be a little delirious. He kissed the sealed amber that contained a piece of Stella's brain and said.

Stella's brain trembled slightly as if she had sensed the Tower Master's call.

"Thank you, Levi. I'll be going into seclusion for a long time. My hundred years of hard work will be put into seclusion this time. No matter what the final result is, thank you for your help."

When Levi heard this, his expression relaxed.

At this time, the Tower Master still did not forget to tease him. This was not fun at all!

Levi bid farewell to the Tower Master and told him to focus on resurrecting his lover. He then returned to Black Fire Island.

He also wanted to go into seclusion.. This time, Golden Snake would not stop until it reached level 12!
