

Wizard 477

Chapter 477: Great Expedition Era! Level 12 Golden Snake!(3)

Looking at the violent eyes of the Corpse Digger, Levi smiled.

"I succeeded."

The Corpse Digger slowly moved.

His movements went from unpracticed to skilled.

In the control core of the Corpse Digger, there were the most basic combat techniques that Levi had recorded through memory spells. These techniques were not that fancy, and only had one function-killing!

For wizards who were not good at close combat, these basic combat techniques were enough.

In any case, as long as one had enough strength, any technique would be superfluous.

Levi brought the Corpse Digger out of the cave.

The Bone Snake and the Red Sand Ape trembled as they looked at the five-meter-tall, ferocious metal monster.

With their biological instincts, they could feel the terrifying power coming from this big guy. It was an aura that could crush everything.

"Do you guys want to try out your new friends?" Levi suddenly laughed.

The Bone Snake and the Red Sand Ape shook their heads like rattles and fled one after another to find the Crimson Fire Dragon Lizard.

Even the strongest Ace left silently after hesitating for a while.

Levi had no choice but to jump into the sea with the Corpse Digger. He had to test the Corpse Digger's ability to fight on water. After all, most of the Endless Sea was filled with water.

As soon as the Corpse Digger jumped into the sea, it started swimming quickly. Levi followed behind it unhurriedly.

At the same time, he was also observing the consumption of the Aether Stones.

About two hours later, after swimming in the sea for so long, the Corpse Digger had consumed five pieces of Aether Stones.

"Although the consumption rate of the Aether Stone is much higher than that of the Swordsman Mantis and the others, it's still acceptable for this size. This normal form doesn't consume much energy," Levi analyzed in his heart. At this moment, they were already far away from the Black Fire Island.

Unknowingly, they had entered a dangerous sea area.

Suddenly, a huge two-headed shark swam out of the deep sea.

The two-headed shark was about 10 meters long. Although it was shorter than Leviathan, this first-circle sea beast was very strong. It was the descendant of the ancient creature [Overlord Megalodon] that was comparable to the second-circle existence. Its strength was not much weaker than a senior first-circle wizard.

Without needing Levi to say anything, the Corpse Digger crashed into the two-headed shark.

Boom!

Under the water, a violent vibration came.

Levi watched from afar.

The two-headed shark shook its head. Clearly, the collision just now was not good.

From its two heads, it spat out a white frost spell ability, wanting to freeze the Corpse Digger.

The Corpse Digger did not dodge. Its magnetic field was activated and directly reversed. A powerful suction force came over. Caught off guard, the two-headed shark was sucked in front of the Corpse Digger.

The two-headed shark wanted to dodge, but blue electric currents shot out from the body of the Corpse Digger, and the two-headed shark was temporarily paralyzed.

The Corpse Digger did not hesitate to use its giant shield to slam against the two-headed shark.

Crash!

A dull sound echoed underwater.

One of the two-headed sharks' heads was smashed off.

The Corpse Digger swung his axe and the other head was also chopped off.

It seemed to be dissatisfied. It grabbed the two-headed shark's body with its hands and tore it apart. Then, it nailed the corpse to its back.

After doing all this, the big fellow stopped and remained motionless.

This was because Levi had stored over a hundred Aether Stones.

After a battle, this guy had already used up all his energy.

"And this is without the use of alchemy cannons. This thing is indeed worthy of being a huge consumer of stones. If we didn't encounter a second-circle enemy, there's no need to let it take action."

"The Corpse Digger has been successfully refined. Next, Ace can fuse with the Corpse Digger. Ace will be the mecha pilot in the future."

Levi was satisfied.

"Since you're so cruel, I'll name you Tyrant."

Levi returned with Tyrant and handed it to Ace.

"Ace, fuse with this guy's power core, and then infuse your fire elemental power into it, bit by bit," Levi said.

Ace nodded and entered the body of the big guy that he feared uneasily.

"Let's begin."

Then, Levi saw the Tyrant's heart begin to burn with raging flames, just like his own furnace heart.

Immediately after, layers of red flames appeared on Tyrant's body, making him look mighty and extraordinary.

Levi chanted.

Then, the Tyrant's eye sockets emitted a red flame.

Because the energy of Aether Stones was chaotic and had all four elements, it was similar to chaos and had no attributes. There were no obvious elemental characteristics.

However, Ace was a fire elemental. Once he entered, the entire Tyrant turned into a Flame Tyrant.

Levi willed it.

The alchemy cannon on the Tyrant's chest suddenly appeared and fired at him.

A pillar of red flame shot out.

Levi's Black Gold Scales were layered. He wanted to test the power of the alchemy cannon.

Boom!

Levi was sent flying by the terrifying shockwave.

It landed in the sea hundreds of meters away.

Ace hurriedly crawled out of Tyrant's body.

It was dumbfounded and said, "I didn't attack my master..."

Levi's laughter came from the sea.

He came to the Black Fire Island and looked at his burnt scales, which were disappearing bit by bit.

"Not bad. It's not much weaker than the Big Fireball Technique. This kind of power is enough for first-circle alchemical creatures. Anyway, Tyrant's main focus is on melee physical attacks. These long-range attacks can only be said to be icing on the cake."

"When I have time to learn the language of runes, I'll give the Tyrant a

Probably be similar to a second-circle existence.."
