Chapter 480: Great Expedition Era! Level 12 Golden Snake!(6)

No matter how chaotic and uneasy the outside world was, on Black Fire Island,

Levi methodically absorbed his experience. His Golden Snake Breathing Technique was getting closer and closer to level 12. Right now, there was nothing more important than this.

However, it was unknown whether the Tower Master had succeeded in resurrecting Stella. He had not heard from him for a long time.

During the Month of Harvest, Levi's Big Fireball Technique had also reached the limit of level 6, reaching the Grade A-rank attack limit of a First-Ring Spell.

As for the Body of Ghost Fire, it was already at level 4. Basically, both of Levi's arms and legs had achieved elemental conversion.

This made him speechless. The most important part was actually the last step to achieve elementalization.

After this period of training, Levi's maximum spiritual force had reached 35 points. He had stabilized his rank as a senior first-circle wizard. He was still 15 points away from the limit of a First-Circle Wizard, 50 points.

According to his current speed, he would only be able to break through the limit of the first circle and the second circle when he was around fifty years old.

Although there was still some time before he could reach the second circle, Levi had already started to prepare the [Eye Devil's Gaze] potion.

This second circle breakthrough potion, not to mention the materials needed for the auxiliary potions, the main ingredient required as many as five precious materials. After Levi had deliberately collected all four main ingredients over the years, including the Windchasing Grass, he had most of them.

The only thing missing was the last and most important main ingredient, [Eyeball of the Eye Devil].

It usually only existed in another plane that was as powerful as the wizard civilization.

The Abyssal Plane.

If the Nine Hells were a paradise for the undead and devils, then the Abyssal Plane was the lair of the demons.

In history, the wizard civilization and the abyss civilization fought more than once. Each had its own victories and losses, but in general, they were evenly matched.

The abyss civilization had never given up on invading the Wizard World. They would come and cause trouble every once in a while. However, the last time it invaded was 2,000 years ago.

Levi felt that the Abyssal Plane might take advantage of the awakening of the Dark Wave at the plane intersection to make a comeback. At that time, both the human world and the wizard world would be even more chaotic.

The wizard civilization had high-level and legendary wizards. The abyss civilization also had powerful demon lords.

So far, the 666 levels of the Abyss had been explored. Each level had a powerful Demon Lord. The weakest was a high-level primordial soul wizard. The further down, the stronger the Demon Lord was. Even the Astral Gods had suffered a lot from these Demon Lords.

Eye Devils were a type of level 2 demon. They were as powerful as Second-Circle Wizards and were considered inferior demons.

Levi had asked Ms. Marlene about it. After a long period of hunting, there were not many Eye Devils left in the Wizard World. Marlene had bought it from a wizard who was exploring ancient ruins at a high price.

In this world, Eye Devil might only exist in some lost ancient ruins.

This reminded Levi of the sea map he had previously obtained. On it was recorded an ancient ruin, the Lost Pan's Labyrinth.

He planned to wait until he broke through the shackles of Legend and reached the twelfth level of the Golden Snake. Then, he would take some time to go around Lost Pan's Labyrinth and see if he could find

anything. Apart from that, Levi had never stopped inquiring about the whereabouts of the transcendent creatures required for the secret medicine.

While Levi was quietly cultivating, the dark tide of the Wizard World was surging because of this sudden expedition.

In the Western region of the Yellow Earth Continent was the Flame King's Al

Hidd Family. In Lehman's Wizard Tower, the Flame Prince, who was high and

Mighty in the family, was now bowing and scraping, holding an ancient black mirror with a respectful expression.

On the surface of the black mirror, the shadow of a black sun slowly appeared. In front of the shadow, a middle-aged man in a black robe and a wizard hat was projected.

"Lehman greets Teacher Adam!" Lehman said excitedly.

The person who had appeared in the Al Hidd Wizard Tower through a projection was the leader of the Black Sun Steeple, a high-level primordial soul wizard, Black Sun Adam!

"No need for formalities," Adam said calmly.

Although it was only a projection of a communication Wizard Tool, Al Hidd still felt a suffocating pressure in front of this high-level primordial soul wizard.

High -level wizards were the true powerhouses in the entire wizard civilization.

After all, even with the fifty federal planes under the Congress, the number of Legendary Wizards and Grand Wizards added up would not exceed a hundred.

And such existences rarely showed their faces in public. Therefore, to a certain extent, high-level primordial soul wizards were the peak of combat power in the wizard world in the conventional sense, almost invincible.

"Teacher Adam suddenly came looking for me. Lehman was terrified. I wonder if there's anything that I can do," Lehman asked.

"Lehman, do you know why I agreed to take you as my disciple?" Adam asked

"Because I have a one-in-a-million dual-element affinity with the earth and fire elements," Lehmann said confidently.

When Adam heard this, he laughed out loud.

Lehman was puzzled, but he did not dare to express it.

He thought, "Although I can't compare to a true genius like my teacher, I'm still one in a million. What's so funny about that?"

"Dual-element affinity. Haha, in my eyes, let alone dual-element affinity, even the Children of the Elements are nothing. Not even one in a hundred dual-element affinity geniuses could become a high-level primordial soul wizard. The reason why I took you in as my disciple was because of the bloodline in your body," Adam said..
