

Wizard 482

Chapter 482: I'll Be the Leader of the Knights! (1)

Levi noticed that this time, the Golden Snake Breathing Technique was not the Maximum after level 12.

After fusing with the Golden Horn Breathing Technique, the Golden Snake Breathing Technique could not only be upgraded to level 12, but Levi could also advance to level 13 in one go.

After breaking through the shackles of legendary, many things seemed to be different from before.

"This also means that other than the few breathing techniques that haven't broken through the limit, I don't have to rush around for a long time to find the materials to break through the limit of the breathing technique."

Of course, with Levi's personality, he would definitely let Andrew continue to collect them. It was better to be prepared.

No matter what, Levi heaved a sigh of relief.

There were only so many breathing techniques in this world. If he could only advance by one level every time he broke the limit, as the level of the breathing technique increased, the breathing technique used to break the limit would not be enough.

From the looks of it, Levi was overthinking.

He looked at the proficiency panel.

[Newborn Scales: You have already passed the stage of black gas transforming into scales. The Bloodline Seed in your body has given you the scales of a real Golden Snake. Although this scale is like a newly hatched Golden Snake, it still has an extraordinary defense. This Special Effect can be continuously upgraded as the Golden Snake Breathing Technique improves.]

Levi looked at his heart.

Outside the Furnace Heart, the winding golden snake was more real than before. Its eyes seemed to have real life and were even more lively.

"Therefore, the Life Seed of a knight is actually... a seed of bloodline. When you step into the knight realm, you will condense the extremely weak bloodline of the original ancestor in your body into a Life Seed.

The so-called breathing technique was to continuously refine the Life Seed by consuming secret medicine and using a specific breathing rhythm and posture to cultivate, causing the bloodline power in the body to become stronger and stronger.

Knights, grand knights, legendary knights.

The Life Seed evolved again and again.

"At my current realm, the Life Seed has even transformed into a Bloodline

Seed.”

Levi carefully looked at the Bloodline Seed that looked like a Golden Snake. He could sense the mini Golden Snake’s desire for the bloodline power.

Only by constantly obtaining bloodlines could the Golden Snake grow. The breathing technique was the method, and the bloodline was the raw material!

This yearning.

Levi was enlightened.

"In that case, the new realm after legendary can be called... the Bloodthirst Realm."

"If a legendary knight is a Blood Awakening Knight, the beginning of the awakening of the bloodline and the beginning of becoming a transcendent, then the Bloodthirst Knight is the starting point of the growth of the bloodline.

"It's like how a newborn baby craves breast milk when it wakes up. The Golden Snake bloodline in my body has been awakened, and it's thirsty. It craves..."

Bloodline. Legend is an embryo in its infancy, and blood thirst is the breastfeeding period after birth.”

In this way, Levi created the real realm after the legendary realm according to his own understanding.

Bloodthirst Knight!

After Levi had a better understanding of the Bloodthirst Realm, he might be able to come up with a feasible way for a legendary knight to become a Bloodthirst Knight.

If there were no path forward for a knight, Levi would be the only guide from now on!

"Now, I need to test the defense of the Newborn Scales. Let's see how much defense the level 12 Golden Snake has brought me."

Levi stretched his muscles and bones. He stood up and spat out his snake tongue, waving it in midair. The snake tongue in his mouth was even longer. If the snake tongue in the past was only a foot long, the snake tongue now could reach three feet long!

This was also the change in the supernatural organ after the Golden Snake Breathing Technique reached level 12.

The range of Levi's snake tongue Perception had expanded by a notch compared to when he was at level 11.

Moreover, the accuracy of his Perception and the storage capacity of his database had also increased.

Apart from that, after reaching the Bloodthirst Realm, no new legendary organs were born.

Or rather, the Newborn Scales were actually new legendary organs.

As for the horn on his forehead, it had also undergone a new change. The horn was even more solid, and there were circles of spiral patterns on it.

However, there seemed to be something blocking the horn. Levi wanted to shoot something out, but he could not.

"Looks like this horn is some kind of organ that can release a big move, so the requirement for bloodline is very high."

Levi touched his horn. It felt strange to touch it himself.

Legend had it that the horn of the Golden Horn Beast could shoot out terrifying rays of light that could annihilate an entire world.

Levi believed that the horn would not disappoint him.

As soon as Levi came out, he saw Ace bullying Drogon.

After such a long time, Drogon was completely convinced by Levi's charisma.

"Ace, come here," Levi said coldly.

Ace slowly floated over.

He looked at the Tyrant Corpse Digger standing at the side.

"Go in and spar with me," Levi said.

Ace nodded, not daring to disobey.

It burrowed into the Corpse Digger's body. Then, the Corpse Digger's entire body burned with red flames. It rumbled and moved, causing the ground to tremble.

Rhett, Drogon, Igor, Leviathan, and the others watched the battle curiously.

Among Levi's pets, only Ace, who controlled the Corpse Digger, could almost fight him.

Levi came to the surface of the sea.

He waved at Ace.

"Let's begin. Don't hold back and attack me with all your might!"

Levi's expression was calm as he said confidently..
