

Wizard 483

Chapter 483: I'll Be the Leader of the Knights! (2)

The Corpse Digger nodded. Then, machinery rumbled and alchemy runes lit up.

Swoosh!

The Corpse Digger flew into the air and shot over, creating waves on the surface of the sea.

Boom!

The 50-ton object collided with Levi.

In terms of Strength, even Levi, who had legendary strength, was no match for the Corpse Digger.

After an earth-shattering collision, countless splashes erupted on the surface of the sea.

Levi kept retreating a hundred meters on the surface of the sea.

"Not bad, Ace. You and the Corpse Digger are getting more and more familiar with each other," Levi praised.

Levi could not help but praise Ace. He became excited when he was praised. Just like Captain America's shield, the Tyrant Giant Shield flew toward Levi with a sonic boom.

"Good timing!"

Dark golden scales appeared on Levi's right fist, emitting an ancient and barbaric aura.

It was as if these scales came from a long time ago.

Bang!

Levi punched the shield away.

Levi also retreated a little.

The dark golden scales buzzed and there seemed to be cracks on the surface. However, as the golden light flickered, these cracks quickly recovered.

The golden light was essentially the Golden Snake black gas in Levi's body.

However, after he advanced to legendary, the black gas of various breathing techniques was no longer black, but had different characteristics.

The Corpse Digger's powerful shield attack could shatter the spell defense that almost all First-Circle Wizards were proud of, but it did not break Levi's scales.

Levi leaped across the sea, stepping on the waves and jumping dozens of meters high. Then, his fists collided fiercely with the Corpse Digger's axe.

Crack!

Under the Tyrant's power that was comparable to a second-circle transcendent creature, the giant axe barely tore through Levi's scale defense. Blood flowed and the bones in his hand shattered.

The Tyrant seemed to want to stop. Levi said, "Continue!"

Many harmless scales flew off his bloody palms, revealing the mangled flesh and ghastly white bones inside, as well as green runes.

Under the Tyrant's strongest axe attack, even Levi's scales could not completely block it. A First-Ring Spell like the Rock Body could only weaken a portion of its Strength.

After all, someone had once used the Corpse Digger's powerful close combat ability to forcefully tear apart the Second-Circle Wizard's defensive field and kill him.

Although Levi's Newborn Scales had the defense of an ordinary second-ring spell, it had just been born after all. It still needed some time to grow.

Under the Blood Ember's powerful recovery ability, Levi's mangled hands had already recovered to their original state, and scales covered them again.

The Tyrant's terrifying alchemy cannons poured out!

Boom!

This time, Levi was sent flying not far away.

He walked out of the fire. Other than his scales being slightly charred black, he was safe and sound.

The first-circle alchemy cannon that could once blow up some of his scales could no longer break through Levi's defense.

In the end, Levi, who had controlled the Tyrant to fight him for a hundred rounds, considered that Ace was about to die, so he ended the battle reluctantly.

After Levi's test,

He felt that the defense of the Newborn Scales was almost equivalent to a Grade C second-circle defensive spell.

When the Proficiency of the Golden Snake Breathing Technique was higher, the defense of the Newborn Scales would also increase continuously. Levi estimated that when the Golden Snake Breathing Technique approached level 13, the Newborn Scales should be almost at the level of a Grade A second-circle defensive spell.

In that case, Levi would be the same as a Second-Circle Wizard. He would have a long-lasting defensive field, and he would not need to consume spell power. He would only need to consume stamina.

He had almost adapted to the changes after level 12 of the Golden Snake Breathing Technique. Levi looked at his remaining breathing technique.

The three breathing techniques, Red Lotus, Blood Beast, and Black Whale, were also heading towards level 12. Among them, Red Lotus and Black Whale had transcendent secret medicine, so their cultivation speed was much faster than that of the Blood Beast.

The Silver Mountain Dragon's breathing technique was almost at the maximum of level 11. The Saint Ape's breathing technique followed closely behind.

"Next, I can prepare to return to the human world and meet Anderson and the Black Knights. I can also capture a few Primary Blood Clan members and think of a way to get them back," Levi muttered inwardly.

Now, he already had the defense of a second-circle. Coupled with his three forms and the power of the Golden Revolving Slash, his attack power was also at the level of a second-circle.

He believed that he had almost the combat power of a second-circle cultivator.

Putting aside the giant ape on the Yellow Earth Continent, it was suspected to be an ancient mutant and was very powerful. Levi felt that he had to advance to the second-circle wizard realm to be confident in subduing it. The sea dragon crocodiles in Area 9 and Area 8 were the same.

As for the cultivation of wizards, Levi's current spiritual power was only 40 points. Although it was considered very high among senior first-circle wizards, it was still not the maximum.

Over the years, he did not learn any new First-Ring Spells. Instead, he planned to leave the remaining spiritual force to the Rune Language and the second-circle spell model he planned to build.

In short, Levi should be able to become a Second-Circle Wizard before he turned 50, which was the year 1040 of the Holy Brilliance Calendar.

Levi planned to take a look at the Pan's Labyrinth in a few days.

After cultivating for a few more days and consolidating his realm as a Bloodthirst Knight, Levi discovered that after entering the Bloodthirst Realm, the effects of the Golden Snake secret medicine he had previously refined had decreased significantly. However, he could still barely cultivate..
