

## **Wizard 484**

Chapter 484: I'll Be the Leader of the Knights! (3)

At his current speed, it would take him almost ten years to advance to level 13.

According to Levi's estimation, the level 13 breathing technique should be the corresponding third-circle realm of a wizard.

This speed was neither fast nor slow. It was barely acceptable. If he had the level 2 Golden Snake secret medicine, he might be able to advance to level 13 in seven to eight years.

"Next, I'll hurry up and upgrade the wizard to the second environmental realm. After mastering some second-ring spells, I'll subdue the sea dragon crocodile and use the level 2 secret medicine as soon as possible."

Levi did not forget about the Gray Tower even though his strength had increased tremendously.

He left the Black Fire Island and went back to teach. At the same time, he wanted to know more about the Tower Master.

Gray Tower.

The atmosphere in the tower now seemed to be different from before the Great Expedition.

In the age of war, everyone had a lot of pressure in their hearts. This pressure turned into motivation, making the wizards work harder in their cultivation.

"Teacher, is there still no news from the Tower Master?" Levi asked when he saw Marlene watering the flowers.

"There's nothing else. This fellow really makes me worry. Could he have been drafted away?" Marlene sighed.

Only Levi and Marlene knew that the Tower Master had left. They were worried that there was a mole in the Tower who would leak the news.

Whale Song Island had been dormant for a long time. Levi estimated that Whale Song Island's foundation should have almost recovered.

In the following Autumn of Chaos, this ambitious organization might do something.

This was what Levi was worried about.

"Teacher, I plan to leave the Wizard World for a period of time," Levi said.

"Are you returning to the human world?" Marlene was somewhat puzzled. "Could it be that you still have something to worry about in the human world? It's not suitable for wizards to cultivate there. It's fine if you're an apprentice, but if an official wizard or above stays in the human world for too long, their cultivation might decline instead of advancing. It's not unreasonable for Sauron, the ancestor of wizards,

to choose the Realm of the Unbelievers as the home of wizards. Forget it... Since you've already made your decision, you must have your own considerations. I won't persuade you anymore.

"I heard that the human world is quite chaotic now. If you insist on going, then be careful. Try not to use your spells in the human world and don't expose your identity as a wizard. The Seven Gods and the Wizard Council have always been at odds. Although the Church of the Seven Nations is extremely weak now, they're still alive. Remember not to get into conflict with the Church." Marlene reminded him.

"Teacher, I know. I'm just going to the human world to do something. I might be back soon.'

Levi naturally knew that wizards were not popular in the human world.

Ever since a long time ago, Sauron, the ancestor of wizards, led the Legendary Wizards and a few of the Seven Gods to carry out a true war of gods, the relationship between the Seven Gods and the wizards had not been very good.

According to the Wizard General Education course, after that battle, the Heavenly Father of the Seven Gods asked the Church of Holy Light to fabricate fake myths in the human world to confuse people and discredit wizards. He said that wizards were the product of the remains of saints and were exiled to the Realm of the Unbelievers because they were punished by the gods.

In fact, wizards entered the Realm of the Unbelievers voluntarily because after the battle between the gods and wizards, the power of the elements in the human world kept thinning and flowing away, entering the so-called "Doomsday Era".

Only physical cultivators like knights who did not need the power of elements or seals cultivators like the four great families who combined their bloodlines and spells could barely cultivate in the human world.

However, wizards knew that elemental power would not disappear for no reason.

In the end, the wizards discovered sub-dimensional portals that were attached to and independent of the human world.

This place was larger than the human world, and the elemental power inside was richer. Moreover, it was difficult for the power of the gods in the astral world to infiltrate this place. It was simply a paradise for wizards.

This was the Realm of the Unbelievers, which was also the origin of the Wizard World.

Currently, the relationship between the Seven Gods and the wizard civilization was very delicate. The Seven Gods were very powerful, and their believers were spread across many Multidimensional Planes.

However, the Seven Gods could not leave the astral world. They could only interfere with the Multidimensional Plane in the form of saint incarnations or send their “angels” to travel the human world.

This formed a subtle tacit balance with the wizard civilization.

The Seven Gods would not enter the sub-dimensional portal to interfere with the wizards, and the wizards would not go to the human world to interfere with the beliefs of the gods. Everyone was fine, and it was still the same until now.

However, Levi's main purpose in going to the human world this time was to capture the Blood Clan members. He did not intend to have a conflict with the Church for the time being.

Just like that, Levi took a long leave from the tower. The pharmacist course was taught by a high-level pharmacy apprentice he had brought out.

For the next period of time, he might not come to the Gray Tower often.

After bidding farewell to his teacher, Levi returned to the Black Fire Island to continue his cultivation.

Before long, Levi's Silver Mountain Dragon breathing technique had reached its limit.

Levi—

Silver Mountain Dragon breathing technique: Level 11 (Maximum), Special Effect: Silver Dragon Spine (Solid State)

This Silver Mountain Dragon breathing technique was obtained from the Earl of Silver Mountain. Now that Levi had cultivated it to the limit, it could be considered as fulfilling the Earl of Silver Mountain's dream of cultivating the ancestral breathing technique to the legendary realm.

After the Silver Mountain Dragon Breathing Technique became legendary, the Special Effects it gave birth to were similar to the Hunchback Dragon Breathing Technique. They were both Dragon Spines, which was transcendent endurance.

The Silver Dragon Spine was only of a higher level. In essence, it was no different from the Dragon Spine.

The legendary organ born after the Silver Mountain Dragon's breathing technique was Levi's tendon..
