

Wizard 485

Chapter 485: I'll Be the Leader of the Knights! (4)

In Levi's body, the meridians that were like mercury were attached to his limbs and bones. He called them Silver Tendons.

Levi had yet to fully understand the effects of the Silver Tendon. From the results of his preliminary experiment, the Silver Tendon had slightly increased Levi's flexibility, explosive power, endurance, and other attributes.

Other than that, Levi did not discover any other uses of the Silver Tendon.

He had a feeling that this tendon's effect was not limited to this. He might have to slowly unearth its potential.

After reaching the maximum of the Silver Mountain Dragon's breathing technique, Levi used the Hunchback Dragon Breathing Technique and the shallow endurance breathing technique as materials to break the Silver Mountain Dragon's limit.

After breaking through the limit, the Hunchback Dragon Breathing Technique left Levi a slightly ugly Hump as a legacy. Like the blood sac, it became the tears of the era.

To be honest, the Hunchback Dragon Breathing Technique was indeed a little ugly, so Levi heaved a sigh of relief.

If he used the Hunchback Dragon Breathing Technique as his main focus for endurance, his looks would decrease by at least 50%.

As a result, Levi had gathered his Legendary Defense, Strength, Endurance, Speed, and Physique. He only had one Legendary Perception left.

Perception-type breathing techniques were rare, and it was even rarer for someone to reach the legendary realm directly. Therefore, Levi left it to fate.

With his current Top Perception and top-notch vision, together with the Black Snake's Message, it was barely enough.

Needless to say, Levi was a wizard, and wizards could use their mental power and detection spells to perform Perception.

Three months after the Silver Mountain Dragon's breathing technique broke the limit, Levi finally figured out the use of the Silver Tendon.

During a sparring session with the Corpse Digger, Levi discovered that as he fought intensely, the muscles in his body stretched and contracted. The dense silver tendons in his body began to release light blue electric currents under friction like high-voltage wires leaking electricity.

Levi was shocked by this discovery.

Had he become a Canadian electric eel from another world?

The Silver Tendon's function was to generate electricity!

Levi concluded that the current Silver Tendon could only release electricity during high-intensity battles or exercises.

The intensity of the electric current was about the same as a first-circle thunder spell.

Levi was overjoyed by this discovery.

He created a new move based on the ability of the Silver Tendon.

Lightning Strike!

The key to Lightning Strike was to release as much electricity as possible from the Silver Tendon through high-speed attacks.

While causing physical attacks, it could also cause the effect of spell attacks, enough to electrocute or paralyze enemies.

Unfortunately, such a powerful move.

Levi could not find a suitable opponent to fight with.

Because the Corpse Digger was immune to ordinary electric current attacks, Levi's other pets were too weak.

For a moment, Levi felt that his life was as lonely as snow.

He did not waste any more time and began to prepare for his trip to the human world.

Of course, before heading to the human world, he had to make a trip to the lost

Pan's Labyrinth.

Holy Brilliance Calendar Year 1037, Month of Grass.

Year 2 of the Great Expedition.

After more than a year of intensive recruitment work, the ten battle groups were all ready.

Under the lead of the legendary wizards, the grand expedition of the five realms began.

As the five rebellious federations were quite far from the Wizard World, this expedition alone would take a lot of time.

Even the most advanced spatial teleportation technology in the Wizard World could only be used in this plane or nearby planes. To carry out an expedition across many planes, one still needed to use the “Sky City” of a Legendary Wizard to travel at high speed in the Land of Darkness.

Sky City was the most advanced war fortress developed by the Legendary Wizards of the Pan-Plane Wizard Council. It was one of the few means of transportation that could safely cross the Land of Darkness.

So far, such a Sky City could only be popularized among Legendary Wizards.

In addition, only high-level wizards and above could cross the land of darkness with their primordial souls, but they would face all kinds of unknown dangers in the land of darkness.

The five Legendary Wizards who led the team this time were the Dragon Flame God Lehger of the Burning Faction, Deep Blue Sage Luther of the Ocean

Faction, Frost Witch Gullwig of the Frost Faction, Thousand Mountains Immortal Alexander of the Earth Faction, and Mist Sky Guardian Marvin of the Storm School of Thought.

These five Legendary Wizards, who were shining like stars, were currently riding their respective Sky City under the gaze of the entire Wizard World. They used the Legendary spells solidified on Sky City to temporarily tear apart the thick crystal wall wrapped around the sub-dimensional portal and drove towards the boundless darkness.

As Sky City slowly disappeared into the pitch-black rift, the crystal wall slowly closed.

"The Great Expedition has begun! Charge!"

"Only the wizards are immortal, only the truth lasts forever!"

Sky City, which was filled with the crystallization of the wizard civilization, slowly disappeared.

At this moment, even he could not help but feel excited!

He wished he could immediately set foot in Sky City and follow that Legendary Wizard's footsteps to conquer the five worlds!

"This is the greatness of the wizard civilization. It's not the shine of an individual, but the charm of a group!"

"We rose from humble beginnings to warm ourselves up. Generations of wizards stood on the shoulders of our predecessors in pursuit of the unattainable truth and reproduced a brilliant wizard civilization!
"As mortals, we touched the authority of God and did transcendent actions!"
