

## **Wizard 486**

Chapter 486: I'll Be the Leader of the Knights! (5)

"We've experienced the baptism of civilization war after civilization war. We've fought against the gods as equals. We've fought bloody battles with the Abyss for a thousand years. We won't fall, nor will we admit defeat!

Because we are wizards!

Grand Council Chairman, Blazing Sun God Wizard Edmund, 2 years of the Great Expedition, speech before the war!

Edmund's speech was like the legendary spell he created, Eternal Blazing Sun, burning the blood of every wizard.

In the boundless Land of Darkness, countless stars shone. These stars were like stars that emitted light in the darkness.

These were planes. Most of them were chaotic lands that were unsuitable for life and the birth of civilizations. Only a few were civilization planes.

Sky City of the Dark Blue Sage, quietly made its way to the destination of this expedition.

On this battle fortress called Dark Blue City, the 9th and 10th battle groups led by the Dark Blue Sage were curiously looking at this scene that they had never seen before.

Among so many wizards, two balls were particularly eye-catching.

A big ball and a small ball.

It was the Tower Master and his wife Stella.

"Have you told them about your participation in the expedition?" the small ball, Stella asked.

"Yes, they will probably receive the news after a while. Then, they will scold me, an old bastard, for being inhumane. They will secretly run away with my wife and abandon the Gray Tower," Herman said.

"You're indeed not human. I'm not human either. We're both balls. Herman, can't your aesthetic taste be a little higher..." Stella said helplessly.

"My aesthetic taste is very advanced. According to the research of wizards, spherical shapes are the most reasonable and perfect shapes in the universe, so planes are basically spherical. The sun and stars in the Land of Darkness are also spherical," Herman argued.

Stella snorted and rolled to the edge of Sky City, staring into the endless darkness in silence.

Herman rolled over and said, "I've thought a lot over the years when I was preparing to resurrect you.

"Since I have already embarked on the path of no return for alchemy, I might as well go further.

"The two of us will take this opportunity to go there and sharpen ourselves in battle to pursue a higher profundity of alchemy."

"What if we die in the Myriad Machine Plane?"

"Then we transform into alchemy remains and bury ourselves deep in the Earth. We'll sit together and watch the sea change."

Endless Sea, Gray Tower.

"What? Herman! You old bastard!"

It was rare for Marlene to curse. She did it very gently.

She read the letter from the messenger.

"My dear Marlene, forgive me for leaving without saying goodbye. I have already resurrected my beloved wife, Stella, a few days ago.

"When you see this letter, the two of us, oh no, the two alchemy balls, should have already set off for Sky City in the Myriad Machine Plane.

"For many years in my life, I have been working hard for the wizard tower that my teacher Salman passed down to me.

"I still remember your uneasy and nervous freckled face the first time you came to the tower. I also remember Marko, the unsmiling little boy, and Mr. Tim, the little guy who could get along with anyone.

"During this period, some wizards came and left. I didn't ask them to stay. Only you guys accompanied me for a long time on this remote island in Area 9.

"I've said so much just to tell you.

"I'll pass on the position of Tower Master to you, Little Marlene!

"Are you happy? Are you surprised?

"There are so many outstanding wizards in the tower now. With Levi, a young man that I can't see through at all, no matter what difficulties you encounter in the future, don't be afraid and face them bravely!

"Of course, if you encounter danger that you can't deal with after I leave, please don't stand on ceremony. Don't hesitate to seek help from Area 9's Star Supervisor, Modi. Modi is a friend of my teacher, Salman. He will help.

"Herman, two years of the Great Expedition."

Holy Brilliance Calendar Year 1037, Month of Flowers.

Black Fire Island.

Levi looked at the letter from Ms. Marlene with a sad face.

"The Tower Master..."

He wanted to curse but stopped.

He was a heartless man who had abandoned his territory and people. He did not seem to have the right to say anything about the Tower Master.

It was only right for him to pursue the life he wanted.

No matter what, the Tower Master had successfully revived Stella. Levi was truly happy for him.

"The Myriad Machine Plane, the origin of the School of Alchemy. Perhaps the Tower Master, an alchemy genius, will have his own place here. I should be worried about myself."

Levi tidied up the Black Fire Island. He had prepared secret medicine in advance that was enough for him to use for about a year. This caused the transcendent creatures on the Black Fire Island to be emptied by Levi.

When these guys had almost recovered, Levi left these transcendent creatures to guard the Black Fire Island.

He took the living dead, Saint Scorpions, Ace, and Tyrant, and left the Black Fire Island on Leviathan.

He was going to the Star Sea and using the sub-dimensional portal to go to the human world.

After leaving the human world for nearly 20 years, he went from a low-level apprentice wizard to a senior first-circle wizard.

He even broke through the legendary shackles that had troubled so many legendary knights.

Now, he, Levi, the Nameless of the Wizard World, had returned!

Of course, before going to the human world, Levi planned to take a look at the lost Pan's Labyrinth..
