

Wizard 488

Chapter 488: First Breakthrough, Boiling Beast Blood, Golden Snake Disturbing the sea! (1)

Bass Island.

This island was Area 9's most important transportation port. Many sea and air routes passed through this place.

Levi had already used the Thousand Faces Technique to transform into the handsome face of White Wolf Geralt, with a look that revealed some vicissitudes of life.

He wore a black windbreaker-style robe and hunting boots as he walked through the port of Bass City in a low-key manner.

He arrived at the ticket counter of the witchcraft airship.

The so-called wizard airships were airships made using wizard technology.

It could be seen as a super low-end version of Sky City.

So far, there were not many organizations in the Endless Sea that had mastered this technology.

Similar to ordinary wizard ships, wizard airships were mainly developed by the Seven Waters Steeple.

However, wizard airships were several times more expensive.

Generally speaking, only mid-level and high-level wizard organizations would buy private airships for their members to use.

Compared to the cost of purchasing a wizard airship, the daily maintenance and fuel costs were the highest.

After all, this thing was the same as alchemical creatures. It consumed a lot of Aether Stones. For small wizard organizations, it was not cost-effective.

The Seven Waters Steeple had also become one of the top five high-level wizard organizations in the Endless Sea because of the wizard airships and wizard ships.

At the ticket office, the witch, who was wearing a blue robe, was busy.

"My beautiful lady, may I know when will be the next flight to the Star Sea?" Levi asked.

"Greetings, sir. The next ship is in three days," the witch said sweetly. Her service attitude was very good.

"Okay, I'll get an economy class ticket."

After buying a ticket, Levi found a small inn along the coast of Bath and stayed there.

"As expected of the transportation hub of Area 9. Based on a rough Perception, there are more than 20 official wizards in Bass City, and there's even a Second-Circle Wizard."

Levi set up a simple alarm array in his residence. Then, he calmed down and took out the Book of Starforge Runes while waiting. He planned to learn the Strength Rune Language first.

The Strength Rune Language was probably the simplest and most practical Rune Language in the Book of Starforge Runes.

Levi looked at the rune structure on the book. His spiritual force had already reached 37 points, which was much higher than when he first obtained the book.

Therefore, he did not look as groggy as before. He tried his best to condense the structure of the Strength Rune Language in his mind with his mental strength. At the same time, he tried to sense the distant, deep, and mysterious power of stars.

Unknowingly, two days had passed.

A bull-like outline of a rune appeared in Levi's mind.

"Is this the embryonic form of the Rune Language of Strength? It doesn't seem very difficult," Levi murmured in his heart.

"But I'm still a long way from constructing the model structure for the runes.

It'll take some polishing. No rush. I'll take my time."

Levi was overjoyed. He was already very satisfied with this speed.

In any case, the path of weapon-making was just as he had thought at the beginning. He just had to leave it to fate.

On the third day, the wizard airship heading to Star Sea finally arrived at the port.

The hundred-meter-long ship slowly landed on the sea.

At the same time, someone on Bass Island shouted through a Wizard Tool, "The wizard airship Q648 has arrived. Please board the airship within 15 minutes."

Levi walked out of his Strength rune state.

"I can also take some time to build it when I return to the human world." Levi came to the boarding gate and looked at the white and blue airships.

One by one, the wizards or apprentice wizards began to board the ship in an orderly manner.

He also noticed that the Second-Circle Wizard was a very beautiful witch. Her curly hair was like a black waterfall, and she was wearing a robe decorated with violet flowers. It was very impressive.

Under everyone's gaze, she gracefully flew into the first-class cabin of the airship.

Levi did not know what was so good about the first-class cabin. In any case,

The ticket price was 300 Aether Stones. In Levi's opinion, it was not worth it.

When the door of the witch's first-class cabin was closed, Levi's top Perception seemed to hear some wizards discussing the witch in the economy class.

"Did you see that? That's a big shot from the Star Sea, the Violet Witch. She's returning to our godforsaken outer ring to pay respects to her ancestors.

"Like me, the Violet Witch was born in a very ordinary gathering place of mortals in Area 9. Later, because of her talent in dual-elemental powers, she was discovered by an Intermediate Wizard Lord who passed by.

Then, she went straight to the Star Sea and became the maid of Lord Wizard.

"This is fate. She's about the same age as me now, but she's already a Second-Circle Wizard. I'm still an ordinary First-Circle Wizard."

A wizard with a weathered face said enviously.

"Such a talented Second-Circle Wizard as a maid. What a grand show. I wonder where the Intermediate Wizard came from?" A colleague beside him asked.

"I think she's a genius witch who rose to prominence in the Star Sea in recent years. I don't know her exact name, but she's a senior member of the Star Tower and is only one step away from becoming a high-level primordial soul wizard."

"Then he's really a big shot. A high-level wizard. This is a realm that I can't even imagine in my dreams.."
