

Wizard 489

Chapter 489: First Breakthrough, Boiling Beast Blood, Golden Snake Disturbing the Sea! (2)

Levi closed his eyes and pondered.

The wizard airship under him slowly rose into the air. The waves parted, and Bass Island gradually became smaller.

Although Levi, who had Blood Wings, was already used to flying, this was his first time riding an aircraft from another world.

In the end, the wizard airship flew to a height of 10,000 meters and kept accelerating. Its speed became faster and faster, even faster than the escape techniques of low-level wizards.

From afar, layers of air enveloped the wizard airship. Then, the invisible array solidified on the wizard airship began to take effect.

In the end, the wizard airship in the sky completely disappeared.

This way, it could avoid being attacked by most transcendent creatures flying at high altitudes.

Seven days later, the airship was only a quarter of the way there. The inner sea region was much larger than the outer sea region.

If the Endless Sea was treated as a huge basin of water, the outer ring might be the sea area bordering the crystal wall at the edge.

Even with the speed of the wizard airship that surpassed the escape techniques of low-level wizards, traveling day and night, crossing the inner sea region, and heading to the Star Sea would take a full month.

If Levi were to fly or swim there by himself, it might take him half a year.

Not only was it a waste of time, but the powerful sea beasts in the inner sea region were also safety hazards.

During the journey, Levi had no choice but to upgrade to a first-class cabin. The economy class was really too noisy. Although the passengers were all wizards, it felt no different from when he took the green car back then. When he changed to first class, it was immediately different.

Each of the first-class cabins was a small private room.

There were soundproofing and Perception isolation arrays in the private room, as well as some safety arrays.

This way, Levi could cultivate in peace. Otherwise, a month's worth of journey would be wasted.

However, Levi still set up an alarm array himself. It was safer this way.

After that, Levi continued to construct the Strength runes that he had yet to complete.

As for the rest of the time, he would cultivate the Saint Ape breathing technique and strive to cultivate it to the limit as soon as possible. Then, he would fuse it with the Giant Breathing Technique and mutate it to see what breathing technique he could create.

In this way, the journey of half a month was safely completed.

The wizard airship was very stable and safe.

Unlike Azure Ship, he did not encounter attacks from dark wizards from time to time.

The construction of Levi's Strength rune was very smooth. He felt that there might be a chance of success before he got off the ship.

The Saint Ape breathing technique was getting closer and closer to the maximum of level 11.

However, on the third week of the trip, he still encountered a little accident.

In the captain's cabin of the wizard airship, the captain looked at the boundless wind wall formed by the black hurricane that suddenly appeared in front of him and immediately started broadcasting.

"Encountering a great hurricane, it is a rank five great hurricane, the airship needs to change its route urgently!"

After the captain finished speaking, the airship turned to the right and swam around the wind wall.

If it was a level 4 wind disaster, the wizard airship could forcefully break through. However, the wind disaster in front of him was level 5 and could instantly destroy the spell defense of a First-Circle Wizard. A Second-Circle Wizard could not stay inside for too long.

Moreover, great hurricanes were not static, they could change levels at the last minute.

Therefore, generally speaking, unless they were in a hurry, wizard airships would not forcefully pass through the great hurricane area.

From the window, Levi looked at the thick wind wall that pierced through the sky and the sea.

"Level 5 great hurricane, is this the natural disaster of the Wizard World?"

This was also the first time Levi had encountered a wind disaster in the Endless Sea. He was also incomparably shocked.

The width of this wind wall stretched as far as the eye could see, as if it pierced through the entire Endless Sea.

In the first-class cabin next to Levi, The Violet Witch looked solemn. On the surface, she was here to pay respects to her ancestors, but in fact, she had a mission.

With a thought, an ancient sea map appeared in her hand.

If Levi saw it, he would be surprised. The style and material of the map were basically the same as his own.

The only difference was the map on it.

The sea map obtained by the Violet Witch was obviously not a sea map of Area 9, but a different sea area.

However, there was also a location marked somewhere in the sea.

"The Lost Pan's Labyrinth."

The Violet Witch looked at the great hurricane in front of her and had a bad feeling.

She had obtained the map from a collector in Area 9.

According to her master, this sea map was not only a map, but also a key to enter a certain place!

It was the place marked "Lost Pan's Labyrinth".

Through some clues that had long been buried in the yellow sand, the owner of the Violet Witch knew that this was the relic of an ancient high-level wizard organization.

This ancient wizard organization was called the Dreamland Steeple.

It was said that this was the first wizard organization to study dreams.

However, because they were studying dreams, they seemed to have violated some taboos.

In the end, everyone in the wizard organization disappeared overnight!

From high-level wizards to apprentice wizards, none of them were spared!

According to the information her Master had obtained from the few School of Dreams wizards, the Dreamland Steeple might have unintentionally summoned some kind of monster while researching the School of Dreams knowledge, or perhaps it was connected to an unknown plane, causing this disaster..
