

Wizard 490

Chapter 490: First Breakthrough, Boiling Beast Blood, Golden Snake Disturbing the Sea! (3)

The world had changed. The Dreamland Steeple had long disappeared. No one knew its whereabouts.

The appearance of this ancient sea map unveiled an old matter that had been sealed for a long time.

Not only the owner of the Violet Witch, but many wizards were also looking for the map.

Among them were some dark wizards.

The treasures and wizard inheritance contained in the ruins of an uninhabited ancient high-level wizard organization were immeasurable.

Not to mention that this wizard organization might have an entrance to a plane that the wizards had not discovered.

This was the reason why many wizards went crazy.

Every new plane that could be reached was an undeveloped blue sea.

It was enough to set off a magnificent discovery activity in the Wizard World.

Whoever was able to enter it first and obtain a place there would be able to obtain the initiative.

As for the possible dangers, opportunities were bound to be accompanied by danger. These wizards were already mentally prepared.

In the endless wind wall, a Black Iron Curtain revolved and coiled, blocking these terrifying great hurricanes outside.

In the surrounding curtain, figures with strange appearances and bare upper bodies stood in the air.

These figures had all kinds of wings on their backs, and their bodies were solidified with profound and complicated spell runes. Their beast-like strong bodies contained explosive power.

In front of these people, a five-meter-tall wizard covered in black scales with dragon wings on his back was coldly looking at the void in front of him.

His eyes were like the compound eyes of a fly, flickering with light.

"Lord Black Wings, did those people discover us?"

"Impossible. With my third-circle Wizard Tool, the Black Iron Curtain, those people definitely didn't sense our existence. They simply don't want to pass through the Wind Disaster Belt."

The Eye of the Dragonfly Black Scale Giant had a ferocious expression. From time to time, it would spit out its thick and barbed tongue, looking very abnormal.

"The Violet Witch is on the wizard airship. Brothers, keep your spirits up. She is one of the Flower Witch's 24 Flowers. Her strength cannot be underestimated."

"Alright, Boss. As long as we use the Black Iron Curtain to guide this wizard airship into this great hurricane, with the ability of us Boiling Beast Blood wizards, it shouldn't be difficult to deal with this mob.' A wizard with transparent cicada wings and a beetle shell said.

They were the wizards of Boiling Beast Blood.

The leader of the Boiling Beast Blood, the Hundred Beast Berserk Witch, was once a capable disciple of the Life School of Thought's Monster Lady.

However, she colluded with Black Sun Adam and came to the Endless Sea to become a dark wizard.

Therefore, the entire Boiling Beast Blood focused on the bloodline modification wizards in the Life School of Thought.

These wizards looked neither human nor ghost. They looked rather shabby.

However, this organization was based on wildness and violence, so it was different from the aesthetic standards of ordinary wizards. Instead, they regarded the appearance of this mixture of various transcendent creature organs as beautiful.

The more transcendent creature organs you installed, the better you looked and the stronger you were.

For example, it was said that all kinds of powerful transcendent creatures had replaced the leader of the Hundred Beast Berserk Witch. It was simply an ultimate suture monster.

Therefore, the wizards of the Boiling Beast Blood could always be controlled by the beast in their bodies and kill for fun.

Now, Boiling Beast Blood had joined forces with another evil force, the Black Sun Steeple.

These two high-level wizard organizations were the two largest evil Strength forces in the Endless Sea.

The Black Iron Curtain quickly followed behind the wizard airship, carrying many wizards with boiling beast blood, waiting for the right time to attack.

On the wizard airship.

Levi looked at the completely condensed bull pattern in his mind. On the bull's body, starlight flickered and connected, like a constellation.

"Strength rune completed." Levi opened the proficiency panel.

Levi—

Strength Rune: Level 1 (1/1000). Special Effect: Horned Bull Constellation Power (Level 1)

Horned Bull Constellation Power (Level 1): The Rune Language communicates with the Horned Bull Constellation. The power of stars increases your strength. The current effect is 10%. This Special Effect can be upgraded!

"F*ck, awesome!"

Levi could not help but exclaim.

A level 1 Strength Rune Language could increase one's strength by 10%.

Moreover, from the Special Effects, there was no restriction that it was only used for Wizard Tool...

Levi looked at the bull pattern in his mind and thought deeply.

"What will happen if I solidify the Rune Language on my body?"

This thought suddenly flashed through Levi's mind.

He already had Legendary Power. If he increased it by another 10%, it would be equivalent to the peak Strength enhancement of Favored By The Night. It could take effect at any time.

Combined with Red Lotus, Nine Swords, and Giant Whale, he was simply invincible!

Strength could destroy all techniques, and a palm could shatter the stars!

However, this was not mentioned in the Book of Starforge Runes.

Therefore, Levi did not dare to try this for the time being.

He decided to wait until he had the time to solidify the Tyrant's body to see the effect.

When the solidification of the Tyrant was successful, he would use other living creatures to experiment.

If possible, the Rune Language was very promising!

This discovery completely changed Levi's mindset of cultivating the Rune

Language.

"F*ck, I'm going to cultivate it!"

Levi was tireless. After meditating and taking pills to recover his spiritual force, he continued to condense the power of stars..
