

Wizard 494

Chapter 494: First Breakthrough, Boiling Beast Blood, Golden Snake Disturbing the Sea! (7)

"This is a precious third-circle Wizard Tool. You can take it. However, you have to give me Black Wings's head. As for the things in the storage bag, we'll split them 70-30. I'll take 70% and you take 30% "

The witch looked at Levi and said firmly.

Levi threw the Eye of the Dragonfly head out.

"This person's aesthetic sense is really bad," Levi muttered.

He was naturally very willing to exchange the head of a second-circle dark wizard for a powerful third-circle Wizard Tool.

After all, without the witch's control, it was impossible for Levi and the Tyrant to defeat the dark wizard who had a third-circle Wizard Tool, let alone kill him so easily.

As for the things in the storage bag, it was reasonable. After all, the most precious thing had already been distributed to Levi. He could not be too greedy.

The Violet Witch put away Black Wings's head, while Levi put away Tyrant and the third-circle Wizard Tool.

The two of them did not speak anymore. After dividing the Aether Stone and other things in the wizard Black Wings's storage bag, they returned to the sea.

Levi looked around. The items in the storage bag added up to the value of a third -circle Wizard Tool. Coupled with the head of the dark wizard, both of them did not suffer a loss.

If he hadn't displayed his second-circle combat strength, the other party might not have discussed distribution with him.

On the surface of the sea.

The group of passengers and the guards of the wizard airship were still pecking at the noobs of Boiling Beast Blood.

When the Boiling Beast Blood Mages discovered the head of the black-winged leader in Violet's hand, they immediately scattered like birds and beasts, and were finally killed by everyone.

Levi also killed a small fry that ran to him in a panic. After throwing the corpse into the Bug House, he returned to the wizard airship with a huge hole.

One after another, the other surviving passengers boarded the ship. Some of them looked happy and seemed to have gained a lot, while others were still in shock.

The captain also sat in his seat. The captain, who was deliberately protected by everyone, was not injured.

"Can the airship still fly?" Violet asked.

"Lord Violet, this airship can still fly for a distance. I've already contacted the headquarters. A new airship will come to pick us up in a few days."

The captain examined it and said helplessly.

Levi heaved a sigh of relief.

He returned to his first-class cabin and began to count his gains.

First, it was the third-circle Wizard Tool. This Wizard Tool was very powerful, and Levi was beaten until he was dizzy and had no temper.

This Wizard Tool was the same as Nezha's Armillary Sash. It could fly, whip people, and defend. This was the strongest Wizard Tool Levi had seen so far.

However, it was the same as the longsword-shaped Wizard Tool he had obtained on the Yellow Earth Continent. Levi had to go to a specialized Wizard Tool appraiser to learn how to use this Wizard Tool, so he temporarily put it away.

Moreover, as a First-Circle Wizard, he could not use a third-circle weapon.

Apart from that, Levi still received 15,000 Aether Stones, many precious materials, and a few supernatural organs sealed in bottles and jars.

This allowed Levi's Aether Stone reserves to break through the 30,000 mark.

There were also some bloodline modification spell books from the Life School of Thought. Levi planned to study them when he had time and see if he could inspire himself to practice the breathing technique.

In the end, Levi took out a blood-colored crystal ball. He had obtained it from the minion just now. The crystal looked like Klein Crystal.

After Levi's research on the Life School of Thought's General Education books in the small fry's storage bag,

He learned that this crystal was called the Rowling Crystal.

The Rowling Crystal was a special Wizard Tool crystal invented by the Monster Lady Rowling to assist in the cultivation of the wizards of the Life School of Thought.

This was similar to the Klein Crystal. Klein was also a famous Legendary Wizard in the Wizard Council. It was he who developed the Klein Crystal to help the wizard test his mental power and spell power.

As for the Rowling Crystal, it was a tool used to detect bloodlines.

It was mainly used to let the wizards of the Life School of Thought have a clear understanding of the bloodline composition of the monsters they had modified or those bloodline modification wizards.

At the thought of this, Levi erased the original owner's mark and dripped a drop of blood on the crystal.

Immediately, lines of blood-colored characters appeared in the void.

[Unknown Dragon Clan Bloodline 5%, Red Lotus Dragon Bloodline 4%,

Unknown Blood Clan Bloodline 2%, Swimming Dark Whale Bloodline 3%,

Silver Mountain Dragon Bloodline 1%, Ostrich Mountain Bird Bloodline 0.9%,

Frost Giant Bloodline 0.93%, Undying Bird Bloodline 0.9%, Human Bloodline....]
