

Wizard 498

Chapter 498: Saint Ape Fusion Giant, Levi's Fourth Form!(4)

He came to the city and searched, but he did not find the Shining Tavern.

This made him slightly disappointed.

However, when he was strolling around Flying Dragon City to buy maps, he inadvertently heard that there seemed to be evil spirits or Blood Clan stirring up trouble in the capital of the East Pole Empire recently. Several nobles had already been killed, and it was now a hot topic in the city.

Levi was immediately interested.

One of his goals in coming to the human world was to capture a Blood Clan alive and bring them back. If he could meet the Primary Blood Clan in the East Pole Empire, it would save him the effort of taking the initiative to search.

With that thought in mind, Levi hurried towards the Myriad Dragon City. He was not in a hurry to return to Flower City.

He had never been to the empire in the easternmost part before. He could take this opportunity to experience the culture of this foreign land and see if he could get some breathing techniques back.

Dragon Plains.

Myriad Dragon City.

The First City of the East Pole Empire.

Because of the dragon worship in this country, all the cities were named after the dragons in various myths and legends.

Levi did not know if these dragons really existed or if they were just making it up.

In any case, he did not find a city named Red Lotus Dragon on the map.

In the distance, the majestic city was crawling on the ground. The city walls were filled with strange ferocious dragon statues or murals. Levi easily infiltrated the Myriad Dragon City with Thousand Faces.

He went straight to the Shining Tavern.

He ordered a cup of Lion King's Spirit.

He now looked like Dinos, a handsome young man with blond hair. Dinos had never been to the human world, so no one knew him.

He looked like an ordinary grand knight, even though he was already an overlord in the human world.

The owner of the tavern was a young-looking beauty.

"Miss, I'm a wandering ranger. I heard that there have been evil beings causing trouble in the city recently?" Levi asked.

The owner glanced at Levi and could not help but take another look at his handsome face.

"That's right. It's been a month, and the business of this tavern is getting worse. Many knights have temporarily left this place to take refuge. They'll come back after the Church deals with the evil creature." The boss sighed.

Currently, there were only a few people in the Shining Tavern. It seemed that the evil beings had indeed affected the business of the Shining Tavern.

"Don't tell me you're asking about this to get rid of evil beings in exchange for a bounty?"

"King of Ten Thousand Dragons, on account of your good looks, I advise you to leave as soon as possible."

"A few grand knights have already been killed in the Myriad Dragon City. The evil creature this time is abnormally powerful. So far, those who have seen the

Evil creature nave all mea..."

"I'm just asking around. I cherish my life very much." Levi took a sip of wine and chuckled.

"By the way, has Master Golden Warhammer released any new works recently?" Levi asked again.

The owner smiled and said, "Don't even think about it. The work of Master Golden Warhammer, even if it's just a knight's sword, has already been sold for hundreds of gold coins. A set of armor is even worth thousands of gold coins.

After all, the work of Master Golden Warhammer is getting fewer and fewer. Master will also grow old and won't be able to iron smith."

Levi sighed. "Looks like I won't be able to buy Master's works in my life."

He sat in the Shining Tavern again and listened to the conversation of the others. There was indeed something dirty causing trouble in the city recently, but he did not know if it was an evil spirit, a vampire, or some other monster.

Levi found a small hotel and stayed there.

He looked at the Dragon God Church in the middle of the city and the members of the Holy Dragon Knights who patrolled the streets from time to time. His heart was as calm as an ancient well.

He used his Top Perception to check the Myriad Dragon City, but he did not find any clues that were suspected to be Blood Clan.

He decided to cultivate the Saint Ape breathing technique while waiting for the Blood Clan to arrive.

With his current perception, he could detect any Blood Clan who stepped into his perception range.

Just like that, a week passed quickly.

The bad news was that Levi did not get the Blood Clan he wanted.

The good news was that Levi had cultivated the Saint Ape breathing technique to its limit.

Levi—

Saint Ape breathing technique: Level 11 (Maximum), Special Effect: Long Arm (Solid State)

Levi stretched out his palm. His palm was as wide as a cattail leaf fan and covered in golden fur. It contained an incomparably violent power.

He took advantage of the night and came to the wilderness far away from the city. There was no one around. He gently slapped the ground with his palms, and the surface of his palms lit up with a golden light.

Boom!

The ground trembled and cracks spread out.

"What great strength. Moreover, that golden light seems to have the effect of vibrating. It's similar to my Golden Cross Slash."

These palms were the legendary organs born from the Saint Ape breathing technique.

Levi called it the Holy Palm.

The biggest feature of this legendary organ was that it greatly increased the strength of Levi's palm. Apart from that, there was also the golden light.

As for the Long Arm Special Effect, it increased the strength of both arms, similar to the Frost Arm.

However, his long arms could also lengthen Levi's arms, making him look like a gibbon. In terms of looks, he was completely outshone by Frost Arm.

All in all, the Saint Ape breathing technique was not as powerful as Levi had imagined. It could only be said to be average.

When Emperor Mu said that the Saint Ape breathing technique was on par with the Red Lotus Breathing Technique, he was clearly bragging and flattering his family..
